

GFP RFI Questions

USAF respectfully requests responses submitted to alexandra.crothers@us.af.mil by 4pm CT on Friday 8 Nov 2024.

The USAF is considering the implementation on industry interest in the F117 Follow-On Contract if GFP in the form of tooling and test equipment is not provided/recalled by the USAF. This would not affect GFM provided by F77.

1. If the USAF does not provide/recalls GFP tooling and test equipment for the follow-on F117 contract, would you still be interested in bidding on the contract?
2. What specific challenges will you have if GFP tooling and test equipment is not provided/recalled?
3. Does the previous stated timeline given to stand-up a depot change if the USAF does not provide/recalled GFP tooling and test equipment?
4. What, if any, portion of the work would you still be interested in performing if GFP tooling and test equipment was not provided/recalled?
