

STATEMENT OF WORK
for
VGSTUDIO MAX Software Maintenance Renewal 2025
3/17/2025 v2

1. SCOPE

The following is a statement of work for NSWC-IHD, Nondestructive Evaluation (NDE) Branch. The NDE Branch requires support and maintenance for computer software, entitled “VGSTUDIO MAX” for 3D data set visualization, analysis and item disposition. This shall include several of the optional add-on modules, as included in the previously purchased “Universal” bundle.

2. REQUIREMENT

2.1. General Requirements

The Contractor shall provide support and maintenance for two instances of the 2024-offered software bundle called “Universal” of VGSTUDIO MAX software, from Volume Graphics. This includes phone/email support and downloadable updates as released during the performance period, minimum 365 days from the expiration of the previous support agreement.

2.1.1. Packaging and Compatibility

The software shall work under a Microsoft Windows 10 (64-bit) environment and Microsoft Windows 11 with no equipment/computer hardware changes required to move between the two operating systems. The software must be installable in an offline mode (i.e. fully downloaded first, then moved to the licensed installation machine for installation). At no time will the licensed installation be allowed to connect to the Internet.

2.1.2. Work Location Requirements

Due to NSWC IHD being a federal government, US Navy facility, support must be available via phone and email, as a direct external connection to a computer running the purchased software is not allowed.

2.2 DELIVERABLE

Quantity 1 – Minimum 1 year (12 months) support and software maintenance for two existing VGSTUDIO MAX “Universal” bundle software, commencing from day after expiration of the previous support agreement.

3. DELIVERY

Naval Surface Warfare Center Indian Head Division
