

SOFGSD RFI - QnA Responses (17 Dec 2024)

We appreciate all of the responses to the QnA portion of this RFI. Please note that duplicate request, in any format, have not been included. Answers to questions can be found in responses below.

Q#	RFP Document	Para. Section	Question / Comment	Answer
1	SOW / Scoring Matrix	Pg 4 Para 5.4	The SOW contains a task area titled “Engineering and Technical Services,” but the self-scoring matrix and pools do not reflect any LCATs that correspond to this task area. Will there be engineering LCATs associated in either the general pool or another specialty pool that will be required to be scored on the scoring matrix?	No, not all LCATs called out in the SOW will be scored in the HTRO matrix.
2	SOW / Scoring Matrix	Pg 3 Para 5.1	The SOW calls out Exercise Support as part of task 5.1 Training and Education Services, but on the Scoring Matrix they are identified as 2 separate specialty pools. Would the government reconsider the inclusion of all exercise subtasks as part of the Training and Education pool as opposed to having them in 2 separate pools?	No, the pools are intended to emphasize different areas of task 5.1.
3	Scoring Matrix	Instructions/ Columns Tab	Can the government please clarify how teammates (subcontractors) are to be scored? Are there minimum/maximum number of work samples to be scored by the primes/subs?	The Government's requirements will be contained in the solicitation.
4	General	N/A	Will the government permit the addition of subcontractors post-award based on emerging task order requirements not anticipated at IDIQ award?	Yes, as the need arises.
5	General	N/A	Does the government anticipate restricting offerors from cross-teaming? (An offeror submitting as a prime contractor while simultaneously a subcontractor on another team)	Yes, the Government has determined that cross-teaming, also known as “over/under agreements” shall not be authorized on the SOFGSD IDIQ. This applies to individual members of a Joint Venture (JV), as well as the JV itself. Cross-teaming is defined as a SOFGSD Prime contractor teaming as a subcontractor for another SOFGSD Prime contractor.

6	General	N/A	Will the government require the managing partner of a joint venture to possess a TS FCL and CMMC Level 1 rating or may the junior partner satisfy these requirements?	SPRS/CMMC Level 1: Although not explicit on JV's, FAR 52.201-21 is prescribed by FAR 4.1903 which states, "The contracting officer shall insert the clause at 52.204-21, Basic Safeguarding of Covered Contractor Information Systems, in solicitations and contracts when the contractor or a subcontractor at any tier may have Federal contract information residing in or transiting through its information system." DFARS Clause 252.404-7012 requires DoD contractors to implement NIST SP 800-171. You can have a primary responsible entity; however, if they have access to CUI then they are required to have it. Considering 90% of our task orders will have CUI SOWs due to Security Requirements then yes all are required. The entity within the JV that most directly manages, or accesses CUI would lead the NIST SP 800-171 assessment and compliance reporting in SPRS, but the other entities info would also be reported (see DoD Assessment Methodology). While this methodology doesn't specifically address JVs, it outlines the processes for assessing compliance with NIST SP 800-171, which can be helpful for understanding how a primary responsible entity might conduct these assessments. TS FCL: The Offeror or all members of the Joint Venture must have a Final TOP SECRET Facility Clearance as accredited by the Defense Counterintelligence and Security Agency (DCSA) at the time of proposal submittal. Reference Directive-type Memorandum (DTM) 24-004, "Facility Clearance Requirements for Covered Joint Ventures." Anticipated RFP language: The offeror must possess, at the time of proposal submission, a Top Secret Facility Clearance as accredited by the Defense Security Service (DSS) in accordance with the contract level Contract Security classification Specification (DD Form 254). Storage of classified information is not anticipated to be required at the contract level, however the need to store classified RFPs/SOWs for task order level requirements is expected. As such offerors are encouraged to prepare for this eventuality. If an offeror does not possess a TS facility clearance at the time of proposal submission, their proposal will be excluded from competition.
7	General	N/A	For past performance evaluation may an offeror combine multiple Task Orders under an IDIQ as one work sample?	Work Samples will be defined in the solicitation.
8	General	N/A	Can the government clarify the time range acceptable for past performance included in the offeror's proposal?	Past Performance will be defined in the solicitation.
9	General	N/A	Will the government allow subcontractors to provide past performance, and to what extent will this be allowed?	Past Performance will be defined in the solicitation.
10	General	N/A	Can the government provide the anticipated number of awardees per Task Order?	Each TO will be awarded to a single prime from the award pool.
11	General	N/A	Does the government anticipate additional socioeconomic categories in the 15 awards?	The Government's requirements will be contained in the solicitation.
12	General	N/A	Does the government expect to change the size standard?	No. The size standard is based on the NAICs Code.

13	General	N/A	How does the government anticipate the basis of award for task orders under this IDIQ as best value or LPTA?	Under SCS, we primarily used Best Value Trade-off. It is task order requirement dependent.
14	RFI	On/Off Ramp	Will the government consider allowing a prime to transfer an award to another entity like a JV at the 5-year recert period if the new entity meets all the certification criteria and the awardee no longer qualifies for the size standard?	No. Awardees that size out at the five year mark can finish any awarded task orders to their conclusion, but will not be able to compete for new work on this IDIQ.
15	RFI	Intended Acquisition Approach	Does the government intend to limit offerors to five work samples for the proposal, or is it five work samples each for the General Pool and each of the specialty pools?	Work Samples will be defined in the solicitation.
16	RFI	Intended Acquisition Approach	Of the work samples to be provided, how many work samples will the government require to come from the prime?	Work Samples will be defined in the solicitation.
17	RFI	Intended Acquisition Approach	Will offerors be allowed to submit performance on IDIQs as work samples, or will they be limited to Task Orders and stand-alone contracts?	Work Samples will be defined in the solicitation.
18	RFI	On/Off Ramp	What are the different criteria the government will use to off-ramp a vendor? size standard change after the 5-year recertification period, non-participation?	Off-ramp will be defined in the solicitation.
19	RFI		3 The government's requirement for a \$1M LOC is significantly higher than most small businesses can provide. If you leave this number at \$1M you will only receive proposals from very large "small" businesses such as billion-dollar JVs and firms with dozens of small business subsidiaries. A high LOC criteria means you give up agility and innovation limiting offerors to most of the same traditional contractors that you have today. Recommendation: If you want rapid "Speed of SOF" innovation, a broad contractor base, and healthy small business competition, we recommend reducing to \$250k at contract start date.	The Government determined the LOC amount based on communications with Industry and Financial Institutions, in relation to the Government's intent for this requirement. It was determined that a \$1M LOC would be appropriate and is not anticipated to be adjusted.

20	Self Score Matrix	Work Sample	What is the government's criteria for an acceptable "work sample"? Is this a contract reference, a sample intelligence report, or a deliverable produced under another contract? Many of the relevant and responsive work products may be sensitive or classified. Many of these work products may not be releasable without extensive review, redaction, and CO approvals. Will the government accept classified work samples? What is the criteria for the government to count a "work sample" as acceptable? How will the government treat work samples that cannot be released to USSOCOM?	Work Samples will be defined in the solicitation.
21	RFP	General	a) Does the Government anticipate releasing a DRAFT RFP, and when might that be expected? b) If the Government is releasing a new DRAFT RFP, should offerors expect similar proposal format and content requirements as the 2019 RFP?	There will be a DRFP released prior to Industry Day.
22	Atch 3 – HTRO Self Score Matrix	N/A	Will the government provide clarification for what the Work Sample (WS) Tiers are meant to represent in Column E?	The Tiering definitions will be provided in Section L.
23	General	N/A	Will a Prime Offeror be permitted to use a teammate's experience for a Work Sample?	Work Samples will be defined in the solicitation.
24	RFI	Intended Acquisition Approach	How will the government determine if a bidder can or cannot participate in one/some of the specialty pools?	The solicitation sections L and M will provide additional details on the scoring methodology.
25	RFI	Intended Acquisition Approach	If all 15 awardees desire to participate in each of the three specialty pools, will the government restrict participation?	The solicitation sections L and M will provide additional details on the scoring methodology.
26	General	N/A	How will SOCOM decide which vehicle to use for RFTOPs?	That will be decided at the TO level.
27	General	Scoring Matrix	Please provide clarification regarding the evaluation of past performance in the scoring matrix. Specifically, will the past performance of our subcontractors be considered and contribute toward meeting the past performance requirements?	The solicitation sections L and M will provide additional details on the scoring methodology for past performance.
28	ITO /RFP	Pg. 1 Administrative & Responsibility Material	Are the qualifications required by the offeror prime contractor or can the qualification be provided by an offeror's subcontractor/teammate?	Work Samples will be defined in the solicitation.

29	ITO /RFP	Pg. 1 Administrative & Responsibility Material	Is there a minimum or maximum number of work samples that may be used? In addition, could the Government clarify if there are any restrictions with work samples provided by an offeror's teammate?	Work Samples will be defined in the solicitation.
30	Attch.3 Scoring Matrix	General Scoring (General Tab; Column C, Row 10)	Can the Government clarify if points are assessed per individual billet or can points be added per quantity of each billet? For example, if an offeror has a quantity of 4 Logistics Analysts, is the correct assessment 4 (Billets) x 5 Points = 20	The solicitation sections L and M will provide additional details on the scoring methodology.
31	Attch.3 Scoring Matrix	General Scoring	Considering there is some duplication of focused FTEs within the General Pool and the Specialty Pools, can the Government clarify how if the General Pool will be competed separately (or as a first gate) from the Specialty Pools (Education, Training, Exercise)?	Only those Offerors who pass the General Pool scoring will be able to compete for the specialty pools.
32	SOW	Pg 3 Sec 5.1.f	Do simulation environments span virtual, constructive, and live environments? Or is there a focus on one specific environment?	This is determined on a TO specific basis.
33	SOW	Pg 1 Sec 1.2 Sec 8.0	We understand some of the tasks require direct support on location, however are technical development tasks able to be delivered remotely?	This is determined on a TO specific basis.
34	Attach 1	Pg 1/Para 3	Is the government's plan to run SCS and GSD concurrently between June 2026 and March 2028?	Yes, there will be continuing task orders. All new work or expiring task orders will be competed on SOFGSD once awarded.
35	Attach 3	Column C Category and Criterion	Is the government considering adding/subtracting/modifying the LCATS currently listed in the matrix?	The Government's requirements will be contained in the solicitation.
36	Attach 2	General	SCS issues numerous task orders for support services that are not present in the draft SOFGSD SOW. Is there an expectation that these type of support services (such as Enterprise IT, Cybersecurity, DevSecOps) will not significantly appear as SOFGSD requirements?	It depends. There are multiple vehicles that SOCOM could use for this. Once requirement is received SOCOM would determine if it is knowledge-based or IT services, as well as OCI determination. We will not add any "IT Services" based requirements to the scope of SOFGSD.
37	Attach 3	Column C Category and Criterion	Is the government contemplating the inclusion of all SOW requirements (i.e. 5.1 through 5.7) in future versions of the HTRO matrix?	No.

38	Attch 4, SOF GSD RFI Questionnaire	Line 14: (Q3) APPROVED ACCOUNTING SYSTEM	Will the Government clarify the difference between the "Approved Accounting System" mentioned on line 14 (Q3) in Attachment 4, and the "Adequate Accounting System" mentioned in Attachment 1, section Administrative and Responsibility Material (4).	The correct phrasing is an "Adequate Accounting System", and in this case you may assume that "Approved" is synonymous with "Adequate" in that it meets all FAR requirements. Anticipated language: a) The Offeror shall provide a current (within 12 months from the date of proposal submittal) audit report, finding, or letter from the Offeror's cognizant DCMA Administrative Contracting Officer (ACO) or DCAA office stating that the Offeror's accounting system has been audited and/or determined to be both compliant with the FAR and is adequate for cost type contracts. A cost type contract may only be awarded if the limitations in FAR 16.301-3 are met. This reference establishes limitations that the Contractor's accounting system must be adequate for determining costs applicable to the contract. Therefore, no award can be made to an Offeror whose accounting system has not been determined to be adequate for cost type contracts. This impacts all Team Members/Subcontractors if the Prime Offeror anticipates awarding cost type subcontracts to them. If no cost type subcontracts are to be awarded, the Offeror shall so state. If cost type subcontracts for Team Members/Subcontractors are to be awarded, the Offeror shall provide the necessary information from them. b) If it has been over 12 months since the accounting system was reviewed, the Offeror shall provide a statement that the accounting system has not changed since being reviewed along with the most recent audit report, finding, or letter from the ACO or DCAA. If the accounting system has changed, a certification shall be provided indicating that the changes have not impacted the approval or adequacy of the accounting system. The certification (if needed) shall be signed by someone with the legal authority to bind the company. c) If the Offeror has not had an audit as stated in paragraph a), the offeror shall so state. d) If Offeror does not meet the above requirements they shall provide a completed Pre- Award Survey of Prospective Contractor Accounting System (SF 1408 criteria) and submit with their proposal.
39	N/A	N/A	Will all awardees be required to bid on all task orders for this opportunity?	No; however, there will be "off-ramp" procedures for those that go dormant and will be provided in solicitation.
40	SOW Self-Score Matrix	Intended Acquisition Approach	Would the government clarify/differentiate between the General Pool and the three Specialty Pools? Is it envisioned that Offerors will: - Bid on the General Pool and the Specialty Pool(s)? - Bid on the Specialty Pool(s), and then those awardees will make up the General Pool? - Bid on Specialty Pool(s) and not the General Pool?	Anticipated: Offerors can compete in as many pools as they desire; however, only those proposals who pass the General Pool scoring will be able to compete for the specialty pools.
41	ITO /RFP	Attach 3	Can we aggregate Task Orders under an IDIQ as one work sample?	Work Samples will be defined in the solicitation.

42	Attch 1 SOFGSD RFI	Pg 3 Intended acquisition approach	Will the Government provide clarification on its intended acquisition approach? Does the Government intend to award 15 contracts as part of the General Pool and only select a specific number of vendors from that General Pool for each Specialty Pool? Or is the Government planning to make separate and distinct awards for General and each specialty pool?	Anticipated: The Government will award to XX offerors that have the highest scores.
43	Attch 3 SOFGSD HTRO Self Score Matrix	N/A	Will the Government clarify what is meant by different "Tiers" within the self score matrix?	The Tiering definitions will be provided in Section L.
44	RFI	Q5, SPRS Score	There seems to be a disparity between the CMMC level 1 requirement and the minimum SPRS score of 110, which seems inordinately high. CMMC level 1 generally corresponds to an approximate SPRS score of up to 88, with CMMC 2 generally considered to be a score of above 88, but not necessarily at the maximum of 110 in the SPRS's range of -203 to 110.	The Government is determining CMMC and SPRS requirements. The requirement will be defined in the solicitation.

45	RFI	Q5, SPRS Score	Areas addressed by the SPRS score are technically complex and require expensive third-party vendors to assist small businesses that are not Information Technology specialists in achieving and maintaining compliance. Given this complexity and the high costs of adapting systems and procedures to reach the maximum SPRS score, the 110 minimum to bid on the IDIQ seems unnecessarily high when the vast majority of the work described in the SOW typically does not involve sensitive contractor company-Government exchanges. In most cases Government-offeror exchanges only involve non-sensitive information, such as invoices, contract reporting, and non-technical deliverables like contract financials and candidate resumes. Sensitive technical services and work products are usually rendered by contractors operating within Government spaces and systems, and their outputs and products never leave Government systems. We recommend the Government lower the SPRS standard for the contract as a whole to an appropriate level of 88 for CMMC 1 and reserve a higher standard only for those task orders that feature unavoidable or extraordinary exchanges of CUI.	The Government is determining CMMC and SPRS requirements. The requirement will be defined in the solicitation. Of note, due to security requirements, 90% of our statement of work's contain CUI.
46	SOW	5.7 Administrative and Other Services	Throughout the SOW, but in section 5.7 in particular, the references to provided technical products (e.g., position papers, reports, etc.) do not specify whether these are prepared externally at the company-level by the contractor, or produced by contractors who are embedded in supported USSOCOM organizations. Making this distinction in the SOW would potentially enable the Government to lower the CMMC/SPRS burden on itself and offerors. Similarly, identifying in the IDIQ that some tasks may require CMMC 2 and an SPRS score above 88 would similarly enable the Government to acquire the majority of SOW services without encumbering itself with the protocols of the higher standard across the entirety of the contract.	The Government is determining CMMC and SPRS requirements. The requirement will be defined in the solicitation.

47	HTRO	Scoring Summary Tab	Does the Government intend to provide a minimum required score to be eligible for the General and Specialty Area pools? If so, will offerors be afforded the opportunity to gain access to additional Specialty Areas later in the IDIQ period of performance? Q: Will any minimum score standards be inclusive of subcontractor-provided work samples, etc., or are they to be only the prime's?	Only the highest rated technical offerors will be selected IAW the solicitation. The Government is contemplating an onboarding process to add additional qualified vendors to maintain a competitive environment.
48	HTRO	General and Specialty Area tabs	Please confirm that the instruction "Work Samples that contain the following 15 LCATs" (and similar HTRO wording) refers to samples containing any of the LCATs referenced. Q: May additional LCATs not referenced in the HRT0 be proposed for scoring purposes?	Only the LCATs called out in the scoring matrix will be scored.
49	HTRO	Instructions Tab	Would the government please provide the draft evaluation criterion so that the HTRO can be better understood? While many specifics may remain undecided, the broader aspects of the acquisition strategy are of special importance, especially those relating to subcontractor contributions to proposals and HTRO points, as they directly impact potential offerors' teaming decisions and strategies.	The Government will release the Draft RFP with all criteria.
50	HTRO	Instructions Tab	May a single work sample be applied to multiple specialty pools of the HTRO? Q: May a single work sample be applied to both the General and specialty pools of the HTRO?	Work Samples, and their use, will be defined in the solicitation.
51	RFP	N/A	Will the Final RFP be classified in any manner?	No. The SOFGSD solicitation will be posted via Sam.gov.
52	Past Performance	N/A	If a contract supports multiple OCONUS TDY assignments, can Offerors count each TDY location as a Performance Location?	Additional details will be provided in the draft solicitation.
53	Attachment 3	N/A	What are the minimum qualifying scores or criteria for consideration in the specialty pools (Education/Training, Intelligence Support, and Exercise Support?	Only the highest rated technical offerors will be selected IAW the solicitation.
54	Attachment 3	N/A	Will past performance be evaluated separately for each pool, or will overall corporate experience be considered holistically?	Past performance will be evaluated in the HTRO scoring.
55	Attachment 1	Intended Acquisition Approach	Will task orders be competed among all 15 awardees in the general pool, or will certain task orders be restricted to specialty pool holders?	Only the highest rated technical offerors will be selected IAW the solicitation.

56	Attachment 2	Section 5.0 Requirements	What is the anticipated breakdown of task order types (FFP vs Cost Plus) across the various service categories?	The Government will not provide specific breakdown, but a vast majority of our task orders are cost type contracts.
57	Attachment 1	Section 2. Safeguarding	What is the timeline for verification of the CMMC Level 1 certification? Will conditional awards be made pending certification?	Additional details will be provided in the draft solicitation.
58	Attachment 2	Section 7.0	For the reporting requirements in Section 7.0, will the government provide templates for the Monthly Status Report and Quarterly Contractor Self-Assessment?	Additional details will be provided in the draft solicitation.
59	HTRO Self Scoring Matrix	General	Will the Work Samples submitted to support the General requirement also be allowed to be used under the Education, Exercise, and Intelligence areas?	Additional details will be provided in the draft solicitation.
60	Atch 1: RFI	Intended Acquisition Approach	When does the government expect to identify how the Specialty Pools will be broken out by vendor population?	Additional details will be provided in the draft solicitation.
61	RFI	Page 3, SOF GSD FRI	RE Specialty pools. Can a individual Prime contractor be considered for more than one (1) potentially all three of the stated Specialty Pools given their past performance warrants such selection? Based on a 15-awardee plan for GSD, how will the government determine who falls into the domains?	Additional details will be provided in the draft solicitation.
62	Self-Score Matrix	General Tab, Row 4 (Category 2)	Can the government clarify whether the max count is 25 (column G) or 5 as written in the description	Scoring methodology will be updated to include the # of points per site.
63	Atch 2 - SOW	5.4	Will the Engineering and Technical Services section include any software development, DevSecOps, agile framework implementation, continuous integration/continuous deployment (CI/CD) pipeline, cloud infrastructure, user interface/user experience (UI/UX) design, model based system engineering (MBSE), or other related activities?	It depends. There are multiple vehicles that SOCOM could use for this. Once requirement is received SOCOM would determine if it is knowledge-based or IT services, as well as OCI determination. We will not add any "IT Services" based requirements to the scope of SOFGSD.
64	Atch 2 - SOW	8.0	Will USSOCOM consider remote or hybrid staffing for any positions?	This is requirement specific at the TO level.
65	Atch 4 – RFI	Q14	If USSOCOM decides not to set up the “SOF GSD Marketplace” site, will it still disseminate the Company Capability Statements to all the responders that marked “Yes” to this question?	The Government is still determining the way forward for this.

66	SOW	Section 5.4 Engineering Documentation Support	Are there specific technologies, platforms, or tools (e.g., CAD/CAM, GEOINT software) that USSOCOM prefers or requires contractors to use?	This is requirement specific at the TO level.
67	SOW	Section 10.0	Will training or onboarding resources for the SPOT system be provided by the government, or is the contractor expected to have full proficiency before contract start?	Full proficiency would be required.
68	SOW	Section 11.0, Security Requirements	Will vendors currently in the process of obtaining a Top-Secret Facility Clearance be considered eligible if evidence of the application process is provided at the time of submission? Q: Will the OCI Disclosure Form referenced in the RFI be shared before the draft RFP is released, or only upon the final RFP issuance?	Must have at time of proposal.
69	SOW	Section 6.0, IDIQ and Task Order Administration	Are there additional key personnel roles anticipated beyond the IDIQ Program Manager and Task Lead? If so, will their qualifications be detailed in the RFP?	The requirements will be provided in the draft solicitation
70	SOW	Section 6.3, Management of Personnel	Are there limitations on the number or type of subcontractors that vendors can propose as part of their team?	The requirements will be provided in the draft solicitation.
71	RFP	Atch 4 – RFI Questionnaire	Q: Are there expectations for additional narrative explanations beyond the multiple-choice answers in the questionnaire? If so, will a format or template be provided?	There is a comment section. This is an RFI. A draft solicitation will also be released for this.
72	RFP	HTRO Self Score Matrix (Atch 3)	Q: For the "in-person vs. virtual" Industry Day preference (Q7), will both formats include opportunities for one-on-one discussions with the contracting team?	The Government is determining that now, details will provided in the draft solicitation.
73	RFP	HTRO Self Score Matrix (Atch 3)	Q: Does the government prefer separate submissions for the RFI Questionnaire and capability statement, or should they be combined into a single document? Q: Are there specific parts of the HTRO matrix that should align with responses in the RFI Questionnaire or the capability statement?	Should be separated documents. The purpose of this RFI is to seek feedback on the proposed Matrix setup. Capabilities statements are not required. However, if submitted, capability statements may be used in development of market research and possible use on the "SOFGSD Market Place", and therefore are not required to align with the matrix or questionnaire.

74	RFP		Q: Is strict adherence to the provided Atch 4 – RFI Questionnaire format required, or can vendors modify the layout for clarity or additional explanations?	Yes. Please provide in the format required. You can add another tab for "additional explanations" if so desired.
75	RFP		Q: Should the Atch 3 – HTRO Self Score Matrix be submitted with the RFI response, or is it for internal use only at this stage?	No, the Government is not requesting Atch 3 be provided. Provide all comments/recommendations via Atch 4.
76	SOW	Section 6.3, Management of Personnel	Q: Can teaming partners be added after the IDIQ is awarded?	Yes.
77	SOW	Section 6.3, Management of Personnel	Q: What is the minimum or suggested number of sub partners, based on current vendor experience?	The Government will not limit.
78	RFI	Tentative Milestone Dates	Q: Will the government provide a detailed timeline for each phase of the proposal submission and evaluation process leading up to award announcements?	We are still in Acquisition Planning. This timeline will be provided in the Draft RFP.
79	Atch 3	All tabs	Q: Is it the government’s intent to have only five total work samples? Is the intent to grade those 5 WS against the general pool as the base requirement and allocate specialties?	Work Samples, and their use, will be defined in the solicitation.
80	Atch 3	All tabs	Q: Would the government consider allowing the Offeror to provide 3 of the 5 work samples and any subcontractors provide 2 of the 5 work samples?	Work Samples, and their use, will be defined in the solicitation.
81	General	N/A	The RFI states that the contractor must have CMMC Level 1 and an NIST score of 110 to bid on this solicitation. A NIST score of 110 is congruent to CMMC Level 2. Can the Government please clarify whether a CMMI Level 1 or 2 is required?	The requirements will be provided in the draft solicitation.
82	HTRO	General Tab, Category 3, Line 8	Can the Government please clarify if contracts with less than 25 billets can still be utilized to fulfill this requirement?	Work Samples, and their use, will be defined in the solicitation.
83	Atch 3 - SOFGSD HTRO Self Score Matrix 25 Nov 2024	All	Will the Government please confirm that offerors can use the same work sample (WS) across multiple functional areas, for example can one contract can be used in both the “Education” and “Exercise” functional areas?	Work Samples, and their use, will be defined in the solicitation.

84	Atch 3 - SOFGSD HTRO Self Score Matrix 25 Nov 2024	Tab: General, Category 1	Will the Government confirm that offerors may submit multiple task orders under the IDIQ they were awarded? We recognize the importance in demonstrating an offeror's ability to maintain workforces of 50+ FTE, however, we believe that limiting a WS to a task order may have the unintentional consequence of restricting competition and/or creating an unbalanced acquisition in favor of large businesses only.	Work Samples, and their use, will be defined in the solicitation.
85	Atch 3 - SOFGSD HTRO Self Score Matrix 25 Nov 2024	Column Cs	Is the USG using LCAT and FTE interchangeably? For example, Work Samples that contain the following LCATs, one point per LCAT (does this equate to an FTE)?	No, LCAT and FTE have different definitions as stated in the solicitation.
86	Atch 3 - SOFGSD HTRO Self Score Matrix 25 Nov 2024	Tab: Intelligence, Category 1	Will the Government confirm if the maximum count for Category 1 is 150 or if this should be a maximum count of 50 as inferred by the "Column Explanation" tab?	The final list of requirements will be included with the Draft RFP.
87	General	N/A	Are there anticipated task orders requiring contractors to have higher than Top Secret clearances (e.g., SCI, SAP)? What cybersecurity safeguards beyond CMMC Level 1 does the government expect for sensitive task orders?	Yes. Requirements will be defined at the task order level.
88	General/ ITO		What volumes will be required as part of the proposal submission?	The final determinations and requirements will be listed in the Draft RFP.
89	RFI and Checklist	CPARS requirement s	Given that CPARS are not required on contracts under \$250,000, what other means will be accepted to confirm past performance? Can the government add a PPQ template that can be used for relevant contracts without a CPARS?	The final determinations and requirements will be listed in the solicitation.
90	SOW	Pg 27, Section 7	What specific metrics will be used to evaluate contractor performance for services provided under this IDIQ?	The final determinations and requirements will be listed in the solicitation.
