

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes

☒ No

Contracting Activity:

Project/Program Name: ThinkLogical| Video Wall Matrix

Purchase Request / Local ID Number:

Estimated Contract Cost (including Options):

Section B: Description of the Supplies/Services Required

The Government intends to solicit a brand name product and award a new firm-fixed priced purchase order for ThinkLogical equipment for a Video Wall Matrix. The required delivery date is 60 after receipt of order (ARO).

Required ThinkLogical Line Items:

0001 - ICT-PPC-100032 (i7 Processor Platform Card, 32GB DDR4 RAM, 1TB SSD); Quantity: 4

0002 - ICT-XMC-C00022 (Transmitter Card, Dual 4K/30, Copper, Analog Audio, USB HID and Separate USB 2.0); Quantity: 2;

0003 - ICT-XMF-C00022 (Transmitter Card, Dual 4K/30, Fiber, Analog Audio, USB HID and Separate USB 2.0); Quantity: 2

0004 - CHS-HD0018 (ICT18 Chassis, Fan and Control Module); Quantity: 2,

Section C: Justification for Soliciting from a Single Source or Brand Name

IAW FAR 13.106-1(b)(1), for purchases not exceeding the simplified acquisition threshold. (i) Contracting officers may solicit from one source if the contracting officer determines that the circumstances of the contract action deem only one source reasonably available (e.g., urgency, exclusive licensing agreements, brand-name or industrial mobilization).

Single Source Justification (Simplified Acquisition)

Section D: Efforts to Obtain Competition

Market Research was first conducted by searching the individual part numbers on GSA 2GIT and NASA SEWP. Multiple vendors on NASA SEWP and GSA 2GIT appeared to offer the items requested. After reviewing one quote, the customer received, the Government was unable to determine whether that vendor was on any Government pre-priced contract vehicle. A Sources Sought was posted on SAM.gov and NASA SEWP for 7 days (31 Jan 2025 - 7 Feb 2025) for ThinkLogical items and to collect information about what business size/type the potential vendors would be. Following mandated software/hardware order of precedence from the DAFMAN 17-1203, it had been found, at this stage in the market research, that existing BPAs were on 2GIT only, not NASA SEWP. Four of the responses were from small businesses, 2 of them stated they have 2GIT schedules with the requested equipment, and the other 2 could only provide open market items.

From mid-February to present, the Contract Specialist conducted additional market research to confirm not only if parts were on 2GIT schedules, but also to verify that no other brand is compatible with existing infrastructure. After reaching out to one of the vendors it was discovered that although they claimed these parts were on their schedule, they were not. The Contract Specialist also contacted a GSA consultant for assistance and was advised that the part numbers were incorrect. However, the ThinkLogical customer support POC verified and the part numbers were actually correct. While furthering direct communication with the ThinkLogical POC, the company declared the ThinkLogical switch components are able to work with other third-party devices with the appropriate compatible software. The software could possibly be procured in the future to allow for other devices to integrate with the system.

The Contracting Officer determined the product numbers required are NOT on 2GIT schedules, so these products will be acquired by soliciting on SAM.gov.

In summary, after searching for these part numbers, on all mandatory sources, we cannot prove there are any vendors with a pre-priced contract vehicle that are capable regardless of their responses to our Sources Sought posted on SAM.gov. It is in the best interest of the Government to solicit this brand name requirement as a small business set-aside on SAM.gov and award a Firm Fixed Price purchase order.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

Unless the existing infrastructure USSPACECOM uses is overhauled, an alternate solution for any future procurements related to ThinkLogical equipment does not exist. The Government continually evaluates the latest technology and will continue to monitor trends as well as developments in this area. Additionally, the Government will continue to acquire ThinkLogical as a primary until, or unless, something in the market meets, at minimum, or exceeds current ThinkLogical capabilities and is compatible with the existing infrastructure. However, currently there are no anticipated changes in industry.
