

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: SLD 30 CONS

Project/Program Name: Okaya Software Services

Purchase Request / Local ID Number: F4D3ZZ5063AW01

Estimated Contract Cost (including Options): \$9,000.00

Section B: Description of the Supplies/Services Required

Trial of software to determine if its ongoing use will help alleviate stress and increase operational effectiveness for VSFB personnel

Section C: Justification for Soliciting from a Single Source or Brand Name

Okaya, developed by SmarTec, is the only US cloud hosted software with a current Investigational Review Board (IRB) approval from the 711 Human Performance Wing and AFRL to handle, safeguard and provide credible guidance on how to reduce stresses for service members operating high operational tempo roles. The product has been proven to reduce stress and increase operational effectiveness for Osprey rated aircrew members.

Okaya, developed by SmarTec, is the only US cloud hosted software with a current Investigational Review Board approval from the 711 Human Performance Wing and AFRL to handle, safeguard and provide credible guidance on how to reduce stresses for service members operating high operational tempo roles. The product has been proven to reduce stress and increase operational effectiveness for Osprey rated aircrew members. SmarTec developed the software after being awarded Phase I SBIR funding (FA864921P0971) and Phase II funding (FA864924P0008) from the Air Force's SBIR/STTR program office.

Okaya, the prototype arising from the previously mentioned Phase II award to SmarTec, uses proprietary technology to provide unique well-being support to its users. It utilizes Artificial Intelligence to analyze the user's inputs. The users will provide a video entry talking about their experiences on the job. The platform then analyzes not only the speech inputs but the body language inputs users express while talking about their experiences. Market research indicates this type of cross-analysis of visual and speech inputs is unique to the Okaya platform. This layered analyses appears to provide more meaningful insights that will improve users' well-being progress.

Market research indicates that Okaya is the only platform that is not only capable of analyzing body/speech inputs, but also has the requisite IRB approval to handle/safeguard generated data and provide well-being guidance to AF users.

Single Source Justification (Simplified Acquisition)

Section D: Efforts to Obtain Competition

A comprehensive search of companies was made to identify competitors that shared the same features and capabilities that Okaya provides, and were approved for use by the IRB, but none were found to match the unique analysis that Okaya is capable of.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

If this technology proves to be of value to the USSF we will open up an RFI to identify competitive vendors that could obtain IRB approval and provide these services.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
