

EDM EXTENDED WARRANTY 2025

Requirements Document

For

704th Test Group/846th Test Squadron

10 March 2025

1.0 PURPOSE

The 704th Test Group's (704 TG) mission is to be the premier provider of unique test and evaluation capabilities relevant to tomorrow's warfighter through world-class people improving technical excellence, cost-effectiveness, and agility. The 846th Test Squadron (846 TS) is one of the units assigned as part of the 704 TG. The 846 TS's primary test capability is the Holloman High Speed Test Track (HHSTT) where they utilize rocket powered sled trains to simulate flight like environments and scenarios with the control and recovery of a ground based system.

The 846 TS utilizes a Mitsubishi Wire Electronic Discharge Machine (EDM), model number MV4800, to machine complex rocket sleds, test track hardware and test articles. This machine is vital to manufacture hypersonic sled parts for missions. In March 2025, the machines purchased extended warranty plan expires, leaving the machine without a repair plan. A single repair would exceed the cost of a extended warranty plan. The 846 TS require the purchase of a new extended warranty to support current and future test missions for a period of performance of one (1) year from date of award and three (3) option years.

2.0 SCOPE

The contractor shall provide the 846 TS with repairs of the Mitsubishi Wire EDM, model number MV4800, SN: 58MV4243 that meets OEM specification. Contract covers all parts, labor, travel and expenses for a period of one year. It also includes one, 2 day Preventive Maintenance (PM) visit each year that does not include travel or expenses. Lastly, contract includes all Platinum Support Contract Benefits for the period of the contract.
