

NOTICE OF INTENT TO SOLE SOURCE

The Acquisition Management Division (AMD) at the National Institute of Standards and Technology Physical Measurements Lab, Guided Wave Electromagnetics intends to procure calibration services for two (2) calibration kits using Simplified Acquisition Procedures for Commercial Items (FAR Parts 12 and 13) on a sole source basis with the Federal Institute of Metrology (METAS).

NIST requires traceable S-parameters with uncertainties to 69.5 GHz of two (2) economy calibrations standards that includes female (1) short, (1) open, (1) load standards and male (1) short, (1) open, (1) load standards. The standards will be used to create traceable S-parameters used for complex permittivity traceability measurements to 69.5 GHz. The objective of the requirement is to enable traceable complex permittivity to 69.5 GHz and provide known permittivity measurements for on-wafer traceability for S-parameters, Power, and Phase. This requirement supports the NIST CHIPS program to develop and disseminate NIST best practices and algorithms for complex permittivity and on-wafer measurement. Market research findings demonstrated only METAS has the capability to provide NMI traceable calibration service to 69.5 GHz.

METAS does not have authorized 3rd party service providers.

The North American Industry Classification code for this acquisition is 541380, Testing Laboratories and Services, with a small business size standard of \$19 million.

A determination by the Government not to compete the proposed acquisition based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

No solicitation package will be issued. This notice of intent is not a request for quotations; however, all responsible sources interested may identify their interest and capability to respond to this requirement. Interested parties that believe they can satisfy the requirements listed above must identify their capability in writing before the response date of this notice. Only responses received by 6:00 p.m. Eastern Standard Time on May 13, 2025, will be considered by the government. Responses shall be submitted via email to raae.armstrong@nist.gov with a cc to Donald.collie@nist.gov.
