

[REDACTED]

JUSTIFICATION FOR AN EXCEPTION TO FAIR OPPORTUNITY (JEFO)  
BD Parata Pharmacy Automation Systems  
SPE2D1-22-D-0009

1. Defense Logistics Agency (DLA) Troop Support, Medical Supply Chain, Capital Equipment Division, is the contracting activity.
2. The action submitted for approval is a JEFO for an acquisition of full-service annual maintenance coverage for automated pharmacy equipment from BD Parata's Patient Monitoring and Capital Equipment (PMCE) contract SPE2D1-22-D-0009, valid through March 3, 2027. This JEFO will allow the acquisition to proceed without following the fair opportunity process.
3. The requirement is for full service annual maintenance coverage for automated pharmacy equipment to be acquired from the BD Parata Pharmacy Workflow, Automation (Mini and Max), WillCall (IntelliCab), and Unit-Dose (ATP2) Systems that are deployed across ninety-nine (99) Defense Health Agency (DHA) Military Treatment Facilities (MTFs) supporting two hundred (200) physical pharmacies. [REDACTED]  
[REDACTED]
4. The authority waving the competition requirements is FAR 16.505(b)(2)(i)(B), only one awardee is capable of providing the supplies or services required at the level of quality required because the supplies or services ordered are unique or highly specialized.

The BD Parata Pharmacy Automation System is an automated medication dispensing system for medications with linked and computerized quality assurance software. The Parata Pharmacy Automation Systems are linked to computerized quality assurance software that interfaces with the iA NEXiA pharmacy workflow system and the Military Health System (MHS) GENESIS system. IA/cybersecurity compliance is a DHA requirement for the BD Parata Pharmacy Outpatient Automation System (POAS-P). The required software updates are pushed to all facilities on a monthly and as required basis and due to their proprietary nature cannot be accomplished by any other source aside from Parata. The vendor includes specific items in the quote for maintaining the Risk Management Framework RMF cybersecurity compliance. The maintenance required by MTF Pharmacies is only available from Parata.

Parata is the only company on the market to provide maintenance of this type that is compatible with the current medical facility network, the iA NEXiA workflow system and MHS GENESIS. Only Parata Workflow system software can connect to the existing Parata Pharmacy Automation robots currently in use at the MTFs.

5. [REDACTED] has previously been determined fair and reasonable via comparison with commercial list pricing and commercial discount practices. As the contracting officer, I have determined based on the information above that the anticipated cost to the Government will be fair and reasonable.
6. There are no other facts supporting the use of this JEFO.
7. DLA Troop Support has continually conducted market research during the life cycle of the Electronic Catalog (ECAT) Program and PMCE acquisition planning, spanning from September 2013 through the present. Market research indicated that there were no other sources that could satisfy this requirement and are compatible with existing software/licenses. In an effort to remove barriers to fair opportunity on subsequent acquisitions, DLA will continue to perform market research to locate other sources for any future procurements. PMCE vendors have the opportunity to add products that fall within the scope of the contract at any time throughout the year, enhancing competition for future acquisitions. Furthermore, DLA Troop Support will continue to monitor the market. The results of the current market research indicate BSD Parata is the only known supplier that can meet the requirements.
8. As the Contracting Officer, I hereby certify that the information contained in this justification is accurate and complete to the best of my knowledge and belief.
