

DEFENSE LOGISTICS AGENCY
DLA CONTRACTING SERVICES OFFICE – PHILADELPHIA 700
ROBBINS AVENUE
PHILADELPHIA, PENNSYLVANIA 19111-5092

DCSO EFO 2025-30

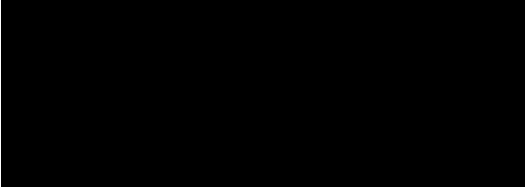

JUSTIFICATION FOR AN EXCEPTION TO FAIR OPPORTUNITY
(FAR 16.505(b)(2) ADDENDUM 1

Upon the basis of the following justification, I hereby approve the issuance of the contractual action described below using an exception to fair opportunity, pursuant to the authority cited herein.

1. IDENTIFICATION OF THE REQUIRING AGENCY AND CONTRACTING ACTIVITY:

Requiring Activity:

Defense Logistics Agency (DLA)
Enterprise ICAM Program Management Office (J62FG)

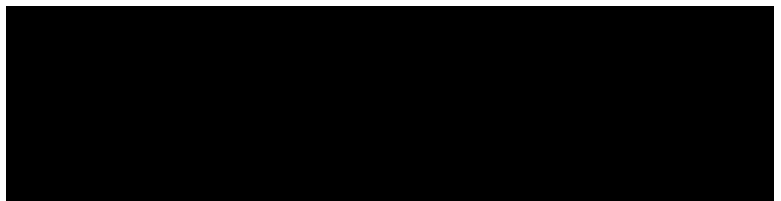

Contracting Activity:

DLA Contracting Service Office-Philadelphia (DCSO-P) 700 Robbins Avenue
Philadelphia, PA 19111-5092

2. NATURE AND DESCRIPTION OF THE ACTION BEING APPROVED:

Pursuant to FAR 16.505(b)(2)(i)(C), the action being approved is an exception to the fair opportunity process. This justification authorizes the use of other than full and open competition to award a follow-on task order modification for additional services to be performed under the existing Task Order for the Defense Logistics Agency (DLA) J62FG Identity, Credential and

Access Management (ICAM) Greenfield Support. Specifically, the additional services will add two new Agile Project Managers.

The Task Order was competitively awarded under the J6 Enterprise Technology Services (JETS) contract vehicle on September 17, 2023. Award was made to [REDACTED] (Contract SP4709-17-D-0002, Task Order SP4709-23-F-0083). [REDACTED] is currently providing Technical and Analytical support. Specifically, [REDACTED] is providing a centralized identity platform with a governance framework that provides direction and guides delivery of automated enterprise identity management services that support rapid access to mission and business information, while forming the foundation for a DLA Zero Trust architecture. Key to implementation of this automated system is the integration of current systems that will require elements of the Waterfall methodology and Software Integration that will require Agile methodology. This Agile project support will be key to a seamless transition to agile methodologies via training and development across all levels of J62FG staff, supporting teams and leadership, establishing a solid foundation for agile processes, providing tailored training programs leveraging Scaled Agile Framework (SAFe) related tools (such as Jira/ServiceNow) and processes. If both Optional periods are exercised, support will expire on Sep 28, 2026.

3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET THE AGENCY'S NEEDS (INCLUDING AN ESTIMATED DOLLAR AMOUNT):

DLA has a requirement for additional services to support the J62FG ICAM, a component of DLA Information Technology (IT) Modernization effort. The follow-on task order modification is seeking to add two Agile Project Managers to provide further Agile project support to develop and provide Agile training to the J62 Enterprise. Under the existing task order, the contractor supports the J62FG ICAM Program Office. The contractor currently supports the full range of portfolio responsibilities and provides technical support for all task areas, including:

- Task 1 – Task Order Project Management Support
- Task 2 – System Implementation Support
- Task 3 – ICAM Program support Services
- Task 4 – Enterprise Web and Security Strategy
- Task 5 – Cybersecurity
- Task 7 – Environment and Application Support
- Task 8 – Information Security Audit Readiness
- Task 9 – Technical Support Service
- Task 10 – Configuration Management
- Task 11– Managed Cloud Services
- Task 13– Business Data Access Support
- Task 14– Architecture Support
- Task 15– Application Onboarding
- Task 16 – Middleware Administration

The Task Order was awarded on Sep 17, 2023. The Task Order contains a 12-month Base Period and two (2) 12-month Option Periods valued at [REDACTED]. The Period of Performance for

the Base Period is September 29, 2023, through September 28, 2024. The Period of Performance for this modification will be June 15, 2024, through September 28, 2024.

[REDACTED]

The [REDACTED] value, [REDACTED]

Under this existing task order, the DLA J62FG ICAM Program Management Office manages applications and services that provide a supporting function to the DLA's larger modernization program. As part of this modernization, ICAM provides many enhancements allowing AMPS to meet Federal Information System Controls Audit Manual (FISCAM)/ICAM/Zero Trust requirements.

This new modification will add Task 19 to facilitate setting up a solid foundation for the initial tasks related to onboarding and managing the foundational build of the environments as early as possible, the Agile Project Management services will support tracking timelines and workloads and will support the ability to quickly adjust both. The Agile project managers will lead the effort to craft a Functional Design Document, integrate Work Breakdown Structure activities, and provide Enterprise Agile training this supports the DLA J6 Information Operations strategic goals. Agile project support will complement the current effort being performed by the contractor. Specifically, the contractor shall mentor teams, ensure effective implementation of SAFe practices, manage any roadblocks that arise in J62FG implementation processes, and work with the operational teams to steer the projects toward successful outcomes. A work breakdown structure (WBS) solution will be developed as well as a new process to onboard over 400 applications using DLA's Agile tools.

This effort is anticipated to be a non-enduring surge effort to support ICAM onboarding and was not anticipated at the time of award. The Agile Project Manager support more readily aligns with this additional task order as the ICAM project has matured and training is the next logical follow-on step in development of ICAM. Currently, [REDACTED] provides Agile coaching as the Program Management Office anticipated only rudimentary instructions would be necessary. However, after further analysis of Enterprise understanding of Agile, it was determined that formal training is necessary. Agile Project Support is mapped to several of the above tasks and will provide support in leading large ICAM development teams with agile methodology.

ADDENDUM 1:

DLA Information Operations J62FG Enterprise Identity Credential, and Access Management (ICAM) Program Management Office (PMO) has a requirement to obtain expanded Okta professional services in support of application onboarding of ICOFR and non ICOFR applications, ICAM system development and enhancement of the DLA ICAM system. This change is required to satisfy new ICAM Greenfield tasks and expertise beyond the expertise and level of effort as outlined in the current ICAM Greenfield PWS.

This modification requires further expansion of Task 2-System Implementation Support Modernized Okta, competitively awarded under this task order, and will be introduced in a new task 20. These specialized tasks were unknown until after the original task order was written and awarded. Now Okta professional services are needed to expand as the current level of effort is not satisfying the surge of additional capability to enhance our .mil environment. The Task Order thoroughly addressed all components to successfully accomplish the mission objectives as were known when it was authored, but since the new DLA Strategic Policy has been published and at the direction of the DLA J6 CIO, multiple applications must be onboarded concurrently than in succession. This strains a system that is already working at full capacity.

Okta serves as our core authentication and authorization platform for DLA ICAM. All ICAM onboarded applications are processed through the Okta platform. With the increased velocity of application onboarding as directed by the DLA J6 CIO, the DLA ICAM PMO is proactively procuring Okta Workflows, a new software is being introduced to our portfolio in May 2025. Okta Workflows will revolutionize and automate many of our manual procedures by allowing us to connect multiple systems and signals into cleaner data, better oversight, more secure system actions, and more automation. It will streamline onboarding of approximately 50 applications including near term onboarding DLA ICAM applications such as Eagle, Demos, DIW, DPATS and SAP Daily. Okta professional services will be the conduit to integrate Okta workflows into the DLA Information Operations ICAM network. Key tasks to the successful integration of onboarding both ICOFR and Non-ICOFR applications through the end of this ICAM Greenfield contract are the ability of Okta professional capability to:

- Design, build, and maintain Okta integrations with various on-premises and cloud-based applications, including SSO, provisioning, and lifecycle management.
- Develop and implement complex authentication and authorization policies within Okta, leveraging MFA, contextual access control, and risk-based authentication.
- Manage Okta tenants, including user and group management, application onboarding, and custom attribute development.
- Proactively monitor the health and performance of the Okta environment, troubleshoot issues, and implement performance optimizations.

An exception to the fair opportunity process is justified in accordance with FAR 16.505(b)(2)(i)(C), as the task order modification to add Agile Project Managers must be issued on a sole-source basis in the interest of economy and efficiency because it is a logical follow-on to an order already issued under the contract. Additionally, all awardees were given a fair opportunity to be considered for the original task order and contract.

A sole-source award of this task order modification is in the interest of economy and efficiency. The new Agile Project Managers will provide additional support to the existing support provided by [REDACTED] which is integral to all acquisition processes and requirements for the ICAM PMO. The ICAM PMO support to the Enterprise Financial Management portfolio is unique in that it maintains mostly government developed software for DLA's complex business processes with no commercial equivalent. Failure to modify the task order to support the additional requirements will delay J62F's specific IT modernization requirements and add risk to the overarching IT modernization effort. Awarding the additional support to another vendor, would result in an increased learning curve and cost risks. Thus, awarding the additional support to [REDACTED] on a sole-source basis is both efficient and economical.

██████ has also been instrumental in supporting DLA as ServiceNow is integrated into DLA's processes. ServiceNow (SNow) is the DLA Enterprise tool that will be used to automate processes, redesign workflows, and coordinate the agile efforts supporting the ICAM initiatives. This Agile

project support will facilitate state of the art agile tracking in the form of dashboards to showcase to ICAM leadership progress. [REDACTED] knowledge of AMPS, ICAM, and ServiceNow makes this order a logical follow-on to the current support being provided by [REDACTED] to the program office managing AMPS and ICAM.

The original ICAM task order was awarded on a competitive basis, in which [REDACTED] was determined as the best value offeror for this acquisition.

For the reasons stated herein, the additional Agile Support work is a logical follow-on to the modernization efforts [REDACTED] is providing DLA J62FG Information Operations and must be awarded to [REDACTED] on a sole-source basis in the interest of economy and efficiency. The award is in the best interest of the government because [REDACTED] are the only source capable of providing the additional required services for the PMO's technical and analytical support. Agile Project Manager support will provide the conduit to modernizing the totality of the J6 Enterprise. Additionally, all awardees were given a fair opportunity to be considered for the original order.

ADDENDUM 1:

In accordance with FAR 16.505(b)(2)(i)(C), as the task order modification to obtain expanded Okta professional services in support of application onboarding of ICOFR and non ICOFR applications, ICAM system development and enhancement of the DLA ICAM system must be issued on a sole-source basis in the interest of economy and efficiency because it is a logical follow-on to an order already issued under the contract. Additionally, all awardees were given a fair opportunity to be considered for the original task order and contract.

Okta professional services and expertise of integrating all ICOFR and Non-ICOFR applications to support the DLA ICAM capability, thereby supporting the DLA J6 Enterprise and Warfighters is available only from [REDACTED]. [REDACTED] possesses unique and special expertise as they have expertly resourced our program with highly ICAM certified and seasoned talent. Additionally, this would be more economical due to [REDACTED] offering familiarity of the IT systems and platforms that are currently in use and capabilities necessary to continue that work and/or expand the Okta services) and bringing another contractor in would increase the time to complete the tasks due to additional time to procure administrative credentials, time for background investigations, and additional contract competition time.

Since [REDACTED] is currently providing their expertise by already performing supporting tasks related to Okta Support requirements for DLA, [REDACTED] is already familiar with systems, familiar with DLA ICAM requirements, and has access to the system. These requirements will expand due to additional DLA requirements. The introduction of another prime contractor in this environment would create an ineffective work environment resulting in not only an increased risk of mission failure but also a program management burden on DLA J26FG ICAM personnel.

5. DETERMINATION BY THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE:

As the Contracting Officer, I hereby determine that the anticipated cost to the Government will be fair and reasonable. The Contractor's proposal will be analyzed in accordance with FAR 15.404-1 procedures. It is anticipated that the Government will use various price analysis techniques including, but not limited to: (1) Comparison with competitive price lists in accordance with FAR 15.404-1(b)(2)(iv); (2) Comparison of proposed prices obtained through market research for the same or similar items in order to obtain a fair and reasonable price in accordance with FAR 15.404-1(b)(2)(vi); and (3) Comparison of proposed prices with independent Government cost estimates in accordance with FAR 15.404-1(b)(2)(v).

6. ANY OTHER FACTS SUPPORTING THE JUSTIFICATION:

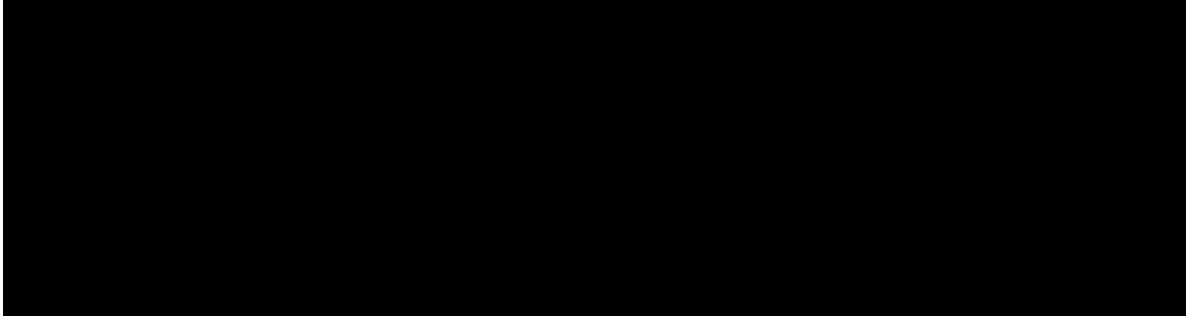

N/A

7. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS THAT LED TO THE EXCEPTION TO FAIR OPPORTUNITY BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES IS MADE:

DLA continues to exercise competition as often as possible and is required to conduct ongoing reviews to keep abreast of new technology and corresponding services, both in industry and in the Government. DLA uses a variety of vendors, manufacturers, and contracts/orders to fulfill its requirements and will continue its practice of surveying the market to ensure full and open competition to the maximum extent practicable.

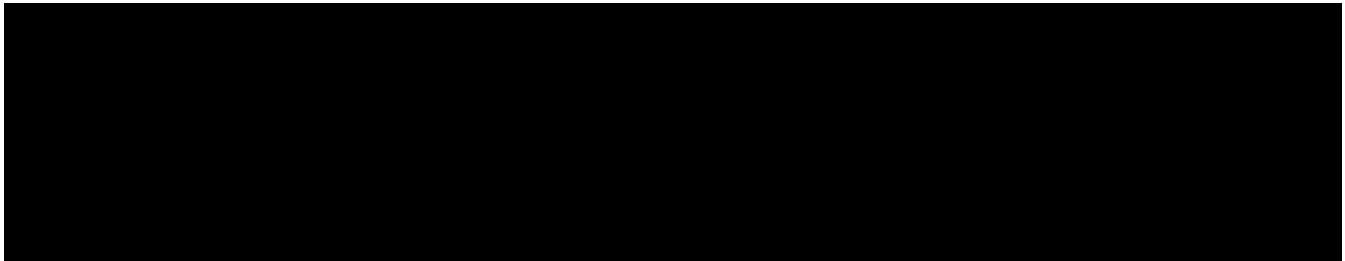

8. CERTIFICATIONS:

Technical Certification: I hereby certify that the supporting data provided for which I am responsible, and which form a basis for this justification are complete and accurate.

CONTRACTING OFFICER CERTIFICATION:

I certify that this justification is accurate and complete to the best of my knowledge and belief.

PROCURING ACTIVITY COMPETITION ADVOCATE CERTIFICATION:

In accordance with FAR 16.505(b)(2)(ii)(B)(10), I have determined that FAR 16.505(b)(2)(i)(C) applies and I approve this justification.
