

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: 355 CONS/PKP

Project/Program Name: [REDACTED] Video Wall Update & Repair

Purchase Request / Local ID Number: [REDACTED]

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

The Government is requesting the services of OneVision Solutions (OVS) (also known as DirectPacket, Inc. (aka DP, Inc.)) to evaluate, update, and correct video wall display for all Deployment Control Center (DCC) stations. Certified installation technicians are required to perform changes so the content of those devices will present on the video wall directly in front of them.

Section C: Justification for Soliciting from a Single Source or Brand Name

The LRS DCC video wall was purchased by DLA Troop Support in August of 2020 to Quantico Tactical, order number 14586, using OVS technicians, parts and software. All internal government office requests to update and repair wall have been exhausted.

This sole source justification is based on unique capabilities and specialized knowledge possessed solely by OVS, which are essential to ensure the continued operation and integrity of the system. Awarding this requirement to any other vendor would introduce substantial risk to the Government, resulting in potential performance degradation, extended downtime, and significantly increased costs.

OVS designed, installed, and programmed the current sophisticated audio-visual system, including the video wall, to meet the customer's specific operational requirements. This involved intricate programming and integration of various manufacturer components, creating a complex and highly customized solution. The proposed updates, sequencing modifications, and potential repairs require intimate knowledge of this bespoke programming and the interplay between the various components. This specialized knowledge resides exclusively with OVS.

Critically, the planned modifications necessitate programming changes to the audio-visual equipment. These changes are directly tied to the original system design and programming implemented by OVS. Attempting to modify the programming without this inherent understanding carries significant risk of incompatibility issues, system instability, and even irreversible damage to the equipment. OVS possesses the manufacturer certifications across all components of the video wall system, covering design, installation, programming, and sustainment. This comprehensive certification underscores their unique qualifications to perform this work without jeopardizing the system's integrity.

Furthermore, engaging a different vendor would necessitate a substantial period of familiarization with the system's intricacies. This would inevitably lead to prolonged downtime, impacting mission-critical operations that rely on the video wall's functionality. OVS's (aka (DP, Inc.)) existing knowledge base allows them to immediately address the required updates and repairs, minimizing disruption and ensuring continued operational capability.

Section D: Efforts to Obtain Competition

A Sources Sought noticed was posted on SAM.Gov for three days to allow the opportunity for vendors in the marketplace to respond with their company's capabilities of providing requested service. Feedback received from Industry stated it is best to select initial installer of video wall as overall project was designed as a custom build. This is the most time and cost effective way for the Government to utilize tax payer dollars for the requested service.

Single Source Justification (Simplified Acquisition)

Section E: Steps to Preclude Future Single Source or Brand Name Awards

The Government will continue to perform market research for related services received to verify capabilities of the open marketplace.

Section F: Contracting Officer's Determination

I have determined, in accordance with FAR 13.106-1(b)(1), that the circumstances of this contract action deem only a single source is reasonably available.
