

**LIMITED-SOURCES JUSTIFICATION LOGICAL FOLLOW ON FOR MULTIPLE-
AWARD SCHEDULE PROGRAM**

Upon the basis of the following justification, prepared in accordance with Federal Acquisition Regulation (FAR) 8.405-6(c), this justification is hereby provided for approval of the use of sources limited to fewer than those required as implemented by FAR 8.405-6(a)(1)(i)(C).

1. Identification of the agency and the contracting activity.

U.S. Department of Justice, Federal Bureau of Prisons (FBOP), Central Office, Administration Division, Acquisitions Branch, Technology Procurement Section.

2. Nature and/or description of the action being approved.

This requirement will be a Fixed unit price Requirements Task Order with Options for Cloud Computing and Cloud Related IT Professional Services that requires a statement of work. This requirement is being procured under General Services Administration (GSA) Federal Supply Schedule GS-35F-135BA.

3. Description of Supplies/Services required to meet the Agency's Needs:

The FBOP's Office of Information Systems has a requirement for maintaining bop.gov. The bop.gov server was previously located in the FBOP's datacenter. It has now been migrated to Amazon Web Services (AWS) GovCloud in the United States. GovCloud has been designed to allow US government agencies and contractors to move more sensitive workloads into the cloud by addressing their specific regulatory and compliance requirements. The FBOP requires a contract for Cloud Computing and Cloud Related IT Professional Services to continue the design and development of the FBOP's Enterprise Cloud Platform (ECP) and GovCloud.

[REDACTED]

[REDACTED] .

4. The authority and supporting rationale and, if applicable, a demonstration of the proposed contractor's unique qualifications to provide the required supply or service:

This Limited-Sources Justification rationale is supported through the implementation of FAR 8.405-6(a)(1)(i)(C) - In the interest of economy and efficiency, the new work is a logical follow-on to an original Federal Supply Schedule order.

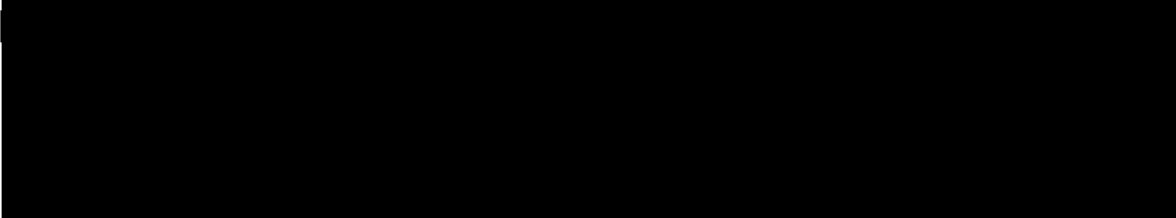

This requirement is critical in the migration and maintenance of the FBOP's design, development, and deployment of applications within the ECP as well as enhancing methodologies that support modernization efforts in current operations.

The FBOP competitively solicited these services previously and subsequently awarded order 15BNAS20FV9M10128 to Effectual, from their Federal Supply Schedule with an effective date of April 1, 2020. Under this award, Effectual built the foundation for future cloud modernization and migration efforts at FBOP by designing and building the FBOP Enterprise Cloud Platform (ECP).

Effectual is actively migrating applications into the FBOP ECP. In addition Effectual is also providing technical support in the ECP and modernization for mission critical applications such as Sentry/CICLOPS (IMB) and Sallyport, as well as Program Review Automated Information System Application (PRAIS), FBOP Acquisition Review System Application (BARS), Pre-Employment Survey Application (PES), Reduction in Sentence Application (RIS), Occupational Training Directory Application (OTD), Correspondence Tracking System Application (CTS), Volunteer and Contractor Information Application (VCI), Religious Media Library Application (RML). FBOP has identified over one hundred applications to migrate to the ECP, with applications already in production. Many applications slated to migrate into the ECP are mission critical supporting population management, security, and other public safety goals.

The continued performance of Effectual will ensure continuity of services and significant cost savings. At the current juncture of the FBOP's migration to the ECP, Effectual is the most logical vendor to finish migration of the current applications in production as well as continued development and migration of remaining applications.

The current vendor has a level of experience that allows them to perform in a more efficient and productive manner within the customized environment they developed. The FBOP, along with Effectual, is in process for tasks that if halted would result in lost data and progress. Additional savings will be realized by maintaining continuity of services, ensuring the prevention of subsequent rework of previous accomplishments.

5. Determination by the ordering activity contracting officer that the order represents the best value consistent with 8.404(d) :

The contracting officer determines that this order represents the best value, as Effectual has provided pricing discounts that are below the GSA Multiple-Award Schedule Rate average as well as their FSS list pricing. Additionally, Effectual has current staff in place with appropriate clearances and equipment to deliver essential noninterrupted services. Failure to provide immediate and continued support could seriously impact the FBOP's continuity of services.

Additionally, GSA has already determined the prices of supplies and fixed-price services, and rates for services offered at hourly rates, under schedule contracts to be fair and reasonable.

6. Description of the market research conducted among schedule holders and the results, or a statement of the reason market research was not conducted:

Market research was previously completed for the solicitation that resulted in award of the FBOP's task order 15BNAS20FV9M10128, which included the anticipated use of the base and all option years. Additional market research completed for this requirement indicates similar conditions exist now as during the previous award.

7. Any other facts supporting the justification:

None.

8. Actions, if any, the agency will take to remove or overcome any barriers that led to restricted consideration before any subsequent acquisition for supplies and services is made:

The FBOP is committed to the competitive acquisition of requirements. It is the FBOP's policy to seek full and open competition to meet the FBOP's requirements when such competition does not impede mission imperatives.

9. CONTRACTING OFFICER'S CERTIFICATION:

I certify that this justification is accurate and complete to the best of my knowledge and belief.
