DISCLAIMER

This RFI is issued solely for information and planning purposes only and does not constitute a solicitation. All information received in response to this RFI that is marked as proprietary will be handled accordingly. In accordance with FAR 15.201(e), responses to this notice are not offers and cannot be accepted by the Government to form a binding contract. Responders are solely responsible for all expenses associated with responding to this RFI.

A. OVERVIEW

The Department of Veteran Affairs is seeking information in regard to oral fluid testing for patients enrolled in a Substance Use Disorder (SUD) program via telehealth.

The services shall be in accordance with the tasks and deliverables as described in this Statement of Work (SOW). The respondent shall provide an oral fluid test that can be used at home without a prescription. The oral fluid test can be used by patients participating in telehealth-based contingency management – an evidence-based treatment for SUD that relies on rapid drug testing. The respondent shall also provide clinical and technical user training to ensure proper use of the test by patients.

If the manufacturer has an existing oral fluid test, they would need to expand upon their current approvals or create a new indication for this oral fluid test.

Final acceptance is completed once all deliverables have been received and turnover/go live has been completed.

B. TECHNICAL REQUIREMENTS

B.1 HARDWARE

- 1) FDA clearance for at home use
- 2) Prescription not required
- 3) Sample obtained by patient sampling fluid from the mouth
- 4) Results are read within (ideally: 5 minutes of collecting the sample; maximally: 15 minutes of collecting the sample)
- 5) Results read accurately despite color blindness
- 6) Results visible/readable over video call during a telehealth appointment
- 7) Expiration dating no less than 1 year after date of manufacture
- 8) Availability of positive and negative control fluids for quality control testing of each lot of tests.

B.1.1 All oral fluid test kits shall have the following characteristics:

- 1) FDA cleared / approved for over the counter/home use
- 2) Have available parts, consumables, and support for life expectancy of test

- 3) Include patient-friendly instructions for use document

B.2CLINICAL

B.2.1 The oral fluid test kits shall have the following characteristics:

- 1) Test panel to include at a minimum methamphetamine (ME), cocaine, amphetamine, and Tetrahydrocannabinol (THC).
- 2) Test cutoff concentrations at 50 ng/ml for ME, 20 ng/ml for cocaine, 50 ng/ml for amphetamine, and 40 ng/ml for THC.
- 3) Test principle is immunoassay. Antibody is bound with drug derivatives immobilized on the membrane. If antibody is not bound with drug, a line forms indicating that the sample is negative. If drug is in the saliva at a concentration greater than the cutoff, all antibody is bound with drug and a line does not form indicating that the sample is positive.

B.2.2 The oral fluid test kits may also (desired not essential) have the following characteristics:

- 1) Test panel to additionally include opioids (including but not limited to morphine), phencyclidine, sedatives (e.g., benzodiazepines, barbiturates), and other hallucinogens (including but not limited to LSD).

B.3INTEGRATION AND PROJECT MANAGEMENT

B.3.1 Integration and Project Management includes the following:

- 1) Pre-deployment, respondent shall provide instructions for use, matrix with requirements identified in sections B1 and B2 and how they are met by the candidate device, summary of precision, accuracy, and reliability of the self-administered candidate test.
- 2) Respondent shall provide a formal report at the conclusion of deployment to include the following:
 - a. Device name
 - b. UDI (if applicable)
 - c. DUNS number or SAM UEI
 - d. Name, address, and FDA registration and listing for the manufacturer
 - e. FDA export license (if applicable)

C. SERVICE REQUIREMENTS

D.1.1 Operator Manuals – The respondent shall provide the following documentation for the proposed systems:

- 1) Two (2) copies of operator instruction manuals (one (1) electronic and one (1) physical copy)

D.1.2 Minimum Warranty – The systems and accessories shall be covered under the manufacturer's warranty and shall include all parts and labor for one (1) year following acceptance by the facility.

D. OTHER INFORMATION/DOCUMENTATION REQUESTED

G.1.1 Drugs of Abuse Product Codes and Regulations

Drug	Product Code	Regulation
Methamphetamine	LAG	862.3610
Cannabinoid	LDH	862.3870
Cocaine	DIO	862.3250
Amphetamine	DKZ	862.3100
Opiate	PVH	862.3650
Phencyclidine (PCP)	LCM	Pre-amendment
Morphine	DNK	862.3640

G.1.2 Completed Manufacture Disclosure Statement for Medical Device Security (MDS2) form

G.1.3 Product brochures

G.1.4 Technical specification sheets
