

Statement of Work (SOW)
Title: Altair Enterprise Suite License
Date: May 2, 2025

I. Background:

The NIST Engineering Laboratory (EL) serves as a world-class resource for developing and promoting the use of science-based tools—measurements, data, models, protocols, and reference standards—to enhance the global competitiveness of U.S. industry through innovations in building materials and construction technology and the safety, security, and sustainability of the nation's buildings and physical infrastructure.

II. Purpose:

The purpose of this requirement is to obtain an Altair Enterprise Suite software license required for continuation of research projects in EL that are currently using the Altair HyperWorks and Monarch software packages. Further, various research projects in the Engineering Laboratory require the use of HyperWorks software for analysis of structural performance under multiple hazards, including failure investigations. HyperWorks Software is required for mesh generation, pre-processing, and post-processing of finite element models. Full compatibility with existing HyperWorks models, macros, and results files is required. In addition, Altair Monarch software is required for data extraction, cleansing, and manipulation, including format conversions in preparation for data analytics. Full compatibility with past and current NIST EL research protocols, including existing Monarch data models, is required.

III. Base Requirements:

The contractor shall provide a Firm-Fixed-Price quotation for the following software:

Contract Line	Quantity	Description	Period of Performance
0001	21 Units	Altair Enterprise Suite license units – including technical support and software updates during the license period.	10/01/2025 - 09/30/2026

IV. Delivery:

The license file shall be delivered by email by 10/01/2025 and shall ensure that software licenses and support are active for the full 12-month period of performance identified in the Requirements section. The Altair Enterprise Suite License shall include technical support and software upgrades, as applicable.

V. Inspection and Acceptance:

In addition to the inspection and acceptance terms articulated in 52.212-4, the Government reserves the right to perform such performance tests and evaluations as defined below to verify specified system performance. Such tests and evaluations, if performed, shall be conducted within the environment that the system is to be operated.

Upon receipt of the licenses and inception of technical support at the start of the required period of performance, the NIST's Subject Matter Expert (SME) will verify that the licenses are operational and technical support and software updates are activated for the entire required period of performance in accordance with required specifications. Following this verification, the products will be accepted after access is verified.

The place of acceptance shall be:

100 Bureau Drive
Building 224
Gaithersburg, MD 20899

VII. Payment Schedule:

The contractor shall be paid, in accordance with Net 30-day payment terms, upon receipt and acceptance of a proper invoice, in accordance with the following schedule:

1. 100 percent upon receipt and acceptance by NIST of verified licenses by the NIST Subject Matter Expert (SME) and the Designated Government Officer (DGO).
