Industry Input Invitation for Construction to support the B-21 Program at Whiteman Air Force Base

The U.S. Army Corps of Engineers, Kansas City District would like to continue to collaborate with industry as we prepare two (2) final acquisition plans and solicitations for the B-21's RF Hangar and Weapons Release System Storage (WRSS). We will host a webinar for interested PRIME contractors for the projects on 14 May 2025, at 1:00 PM CST.

The purpose of this webinar is to provide a progress update and overview of the B-21 program. We understand the importance of input from the construction industry into the development of our acquisition plans and solicitations.

This webinar will consist of a power point presentation by the Government and a series of Industry directed questions. The estimated duration of this webinar is no longer than an hour. A written response to the questions will be requested by the Government. Responses are targeted for the end of May 2025.

Firms interested in participating shall RSVP by submitting company name, address, title, phone number, and the names of attendees that will be joining the webinar to david.f.miller@usace.army.mil no later than Monday 12 May 2025.
