Jacob Fitzpatrick Jacob.A.Fitzpatrick@uscis.dhs.gov		Dean Seggay Dean.M.Seggay@uscis.dhs.gov		Marianne.Green Marianne.Green@uscis.dhs.gov

Description: Designated Civil Surgeons perform immigration medical exams. USCIS requires verification of medical license status, board certification status, and reporting of any derogatory or adverse actions impacting the standing of the designated Civil Surgeons (M.D.s and D.O.s). USCIS requires the verification of medical licenses four (4) times per year as well as monthly for expiring licenses. The licensing information must be obtained from the primary licensing verification source. The primary licensing verification source is defined as the state authority which governs and controls the licensing of M.D.s and D.O.s to practice medicine in the respective state. State authority may be located in the US, Puerto Rico, Guam, US Virgin Islands, and the Commonwealth of the Northern Mariana Islands. USCIS requires continuous monitoring and reporting of derogatory information/adverse actions and standing of the designated Civil Surgeons twelve (12) times per year" (see APFS for full description).

Description: USCIS has a requirement for Workforce Analysis and Resource Modeling. The Contractor shall provide Office of Performance & Quality (OPQ) with services to modernize their workforce staffing models, the Staffing Allocation Models (SAMs) and Model for Operational Planning (MOP) by developing, refining, enhancing and automating the models as well as the performance data and workload forecasts utilized in the models. Currently, OPQ develops more than 30 SAMs and 200 workload forecasts across the program offices and directorates of USCIS, with the potential to increase in the future. As an independent party, the SAM, MOP, and workload forecast developers will collaborate with the stakeholders to gain a thorough understanding of each operation to successfully forecast and model the workload and resource requirements to accomplish the future workload.

USCIS requires contractor support to operate the Tier 1 level of a multi-tier Contact Center Operation. Services include support to inbound and outbound calls, chats and webform/email inquiries using a model that employs a mix of IVR/IVA, web and voice channels for customers to obtain assistance on citizenship and immigration related information. The Contractor will provide sufficient bilingual operational staff to support the Contact Center Tier 1 interactions and collaborate with the USCIS and other supporting Contractors involved in improving Contact Center operations. Market research is ongoing, and an acquisition strategy is still to be determined.

Description: USCIS Office of Policy and Strategy (OPS) requires regulatory support services to develop quality regulations by providing responsive, professional support in public comment analysis and categorization, and analytical research and evaluation. Types of services include regulatory evaluation, administrative support, data management and tracking (e.g., ability to monitor, review, synthesize, categorize, track, and report on comments received from external stakeholders via the Federal Document Management System) as well as technical and report writing. Must have extensive experience providing regulatory support services for all phases of the federal regulations and rulemaking process, and possess a knowledge and understanding of immigration law, regulations, and policy. Must have extensive experience categorizing, synthesizing, and summarizing high volumes of public comments for federal rulemaking agencies in accordance with the Administrative Procedures Act. Govt is reviewing RFI responses – an acquisition strategy has not yet been determined.

Introduction	Technology Division provides support to USCIS Office of Information Technology (OIT), purchasing commodities and services to meet the mission.
Customers	In addition to the Chief Information Officer, OIT is divided into six (6) primary divisions. The divisions are Applied Technology Division, Resource Management Division, Enterprise Infrastructure Division, Systems Delivery Division, Transformation Delivery Division, Information Security Division, and Identity, Records, and National Security Delivery Division.
Type of Acquisitions	Tech has shifted from the Department-wide Strategic Sourcing contract such as EAGLE II and it is now mandated to utilize EAGLE Next Generation Suite of Strategic Sourcing Best in Class Contracts. FirstSource II is used to procure software and hardware to include software assurance and hardware maintenance via FAR Subpart 16.505(b) Fair Opportunity.
Contracting Officer Team	Chris Hatin, Andrew Fonda, Patrick Gadwah, Lora Gross, Matthew Hamilton, Nicholas Hart, Celina Hemingway, Amir Hrnjic, Monty Kurtz, Jonathan Latson, Brenda Palmer, Raushanah Pendleton, Sara Putnam, Sylwia Salkic, Patricia Simon, Gregory Schroeder, Dianne Valiando, Krista Weiland, Aaron Vollbracht, Amanda Doherty, Brittany Willette.

George (Alex) Baden George.A.Baden@uscis.dhs.gov		Monty Kurtz Monty.N.Kurtz@uscis.dhs.gov		Jenny Harling Jennifer.L.Harling@uscis.dhs.gov

Description: USCIS requires contractor support for the Data and Business Intelligence Support Services (DBIS III), for professional IT services to support design, architecture, configuration, development, and maintenance of a centralized enterprise data warehouse and standard reporting interfaces through Enterprise Citizenship and Immigration Services Centralized Operational Repository (eCISCOR), SAS, and SMART implementations, i.e., USCIS Data Warehouse/Business Intelligence (DW/BI) solution. This task order will be the primary vehicle to obtain professional IT architectural, systems development, and systems support services to continue the transformation of data from the USCIS transactional systems into a state-of-the-art enterprise data warehouse and associated operational and Business Intelligence (BI) reporting capabilities. The development scope of the program involves transforming agency-wide analytical capabilities and enhancing the agency's ability to use its large data pool for decision-making and operational improvement; any USCIS, DHS, or external federal agency system can become a source of data for DBIS, if dictated by the mission. This supports the Standard Tool CPIC program. **An RFI was issued via SAM.gov. RFI issued 10/29 and closed 11/7. We are currently in the acquisition planning phase.**

Megan Kane Megan.R.Kane@uscis.dhs.gov		Gary Whitney Gary.D.Whitney@uscis.dhs.gov		Sylwia Salkic Sylwia.Salkic@uscis.dhs.gov

Description: USCIS has a requirement for Continuous Monitoring & Agile Security Services (CMASS). USCIS seeks to establish a more sustainable and effective continuous monitoring program, leveraging data from security and governance tools to enhance our ability to identify and mitigate cybersecurity risks, evaluate emerging technologies, streamline security-related tasks. Additionally, we seek to transform the Ongoing Authorization (OA) program to incorporate new capabilities and risk models for Machine Learning (ML) and Artificial Intelligence (AI) and implement appropriate governance measures. The CMASS resources will continue to support security authorization and continuous monitoring activities, the Vulnerability Management & Configuration Management Programs, role-based cybersecurity training, and system stakeholder outreach to ensure USCIS meets security and DHS Information System Performance Plan (ISPP) requirements.

Christopher Green Christopher.D.green@uscis.dhs.gov		Gary Whitney Gary.D.Whitney@uscis.dhs.gov		Sylwia Salkic Sylwia.Salkic@uscis.dhs.gov

Description: USCIS has a requirement for Information Assurance Security Services(IASS). As USCIS integrates artificial intelligence (AI) / machine learning (ML) and other emerging technologies into our operations, it is imperative to elevate our cyber vigilance. This means ensuring systems are not only resilient to adversarial attacks but also uphold ethical standards that reflect organizational values and societal expectations. The Information Security Division (ISD) seeks a next generation of ISSOs to lead the charge. The IASS resources will continue to perform the day-to-day implementation and validation of IT Security requirements, including ensuring the protection of our systems, data, and environment from malicious users, and to support continuous monitoring activities. These specialized ISSOs are critical to maintaining the security of our systems, assets, and data to avoid or minimize the impact of events.

Description: USCIS has a requirement for continued support for its Outcome-Based Delivery and DevOps Services (ODOS). ODOS IV is the primary contract of Transformation Delivery Division (TDD) to obtain DevSecOps and Infrastructure support for the continued development, delivery and support of USCIS Electronic Immigration System (ELIS) and Global enterprise case management systems. ODOS IV will comprise two Task Areas: DevSecOps and User Experience Design (UXD)/Interaction Design (IxD) Services, and Infrastructure and Integration Services. DevSecOps and UXD/IxD is the primary requirement to provide support for the continued development, delivery and support of USCIS Electronic Immigration System (ELIS) and Global enterprise case management systems. DevSecOps and UXD/IxD will incorporate all the technical, business integration, UXD/IxD, adaptive maintenance to deliver features at the current cadence, carried out on-time and without disruption. The secondary requirement, Infrastructure and Integration Services, provides support to ensure continuous software quality, reducing release time, improving monitoring/logging/alerting for running

Robert Williams Robert.G.Williams@uscis.dhs.gov		Aaron Vollbracht Aaron.F.Vollbracht@uscis.dhs.gov		Brittany Willette Brittany.B.Willette@uscis.dhs.gov

Description: USCIS has a requirement for technical operations support services (TOSS) at the Technical Operation Center (TOC) located at the USCIS Enterprise Operations Center (EOC), Stennis Space Center, Mississippi. The TOC supports the USCIS Enterprise Infrastructure on a 24/7/365 basis and is the central monitoring, coordinating, remediating, and reporting authority for critical incidents, maintenance, and outages for the USCIS Enterprise Architecture. The TOC provides technical support to the Software-Defined Wide Area Network (SDWAN) and coordinates with DHS partners for network services. The TOC supports this objective by providing support for USCIS critical applications and infrastructure by monitoring, alerting, reporting, and restoring mission essential systems and services. The TOC works collaboratively with the Security Operations Center (SOC), Enterprise Service Desk (ESD), Critical Incident Response Team (CIRT), and across USCIS OIT divisions to include ITPM system owners and stakeholders to proactively manage, monitor, report, and restore IT services.

Enterprise Automation and Unified Task Orchestration (eAUTO)

Pam Harper Pamela.K.Harper@uscis.dhs.gov		Aaron Vollbracht Aaron.F.Vollbracht@uscis.dhs.gov		Amanda Doherty Amanda.E.Doherty@uscis.dhs.gov

Description: eAUTO provides comprehensive end-to-end IT enterprise operations support services. This encompasses enterprise infrastructure, which contributes to IT services and applications development, deployment, operations and sustainment, and the overall success of USCIS business functions and operations. The support services will include infrastructure, cloud, unified communications, and platform operations and sustainment. Also included are change & configuration management and project management services. USCIS is moving away from traditional, manually driven actions, key aspects and prioritization of the service are hyper-automation and orchestration, which are the next steps in moving us to AIOps (Artificial Intelligence for IT Operations).
