

SPECIAL NOTICE DARPA-SN-25-65

Burn n' Go (BnG) Proposers Day

EVENT DATE: **May 8, 2025**

REGISTRATION DEADLINE: **May 5, 2025, 5:00 p.m. Eastern Time (ET)**

REGISTRATION WEBSITE: <https://events.sa-meetings.com/DARPABurnnGoPD/>

TECHNICAL POC: **Dr. John "Hunter" Martin, TTO Program Manager**

E-MAIL: DARPA-SN-25-65@darpa.mil

Proposers Day: DARPA will host a Proposers Day at the Controlled Unclassified Information (CUI) level in support of DARPA-PS-25-16 for the Burn n' Go (BnG) program on **Thursday, May 8, 2025**, at the Executive Conference Center located 4075 Wilson Blvd Suite 300, Arlington, VA, 22030 from 9:00 a.m. to 5:00 p.m. ET. Each company will be limited to 2 primary registered attendees until registration closes. Additional attendees for each company may register for the waitlist and will be notified if a seat becomes available. The purpose of this conference is to provide information on the BnG program; promote additional discussion on this topic; address questions from potential proposers; and provide a forum for potential proposers to present their capabilities for teaming opportunities.

PROGRAM OBJECTIVE AND DESCRIPTION: The objective of BnG is to develop a new solid rocket motor (SRM) design with tailorable, post-manufacturing thrust control that enables improved performance and manufacturing efficiency. While several materials science-based approaches have shown promise in this area, the program is open to considering any viable options that can achieve this goal regardless of their underlying technical approach. BnG will leverage materials science innovations that control the burn surface area post-production, streamline quality control timelines for ignition systems and propellant casting, and enables real-time health monitoring of the SRM. The ultimate objective is to develop a robust, reliable, and predictable technology that can be tailored to a specific thrust profile after manufacturing. This technology should endeavor to enable a single motor's use across multiple weapon systems while unlocking new capabilities and applications, enabling flexible weapons procurement and large-scale production/stockpiling.

REGISTRATION INFORMATION: Participants must register No Later Than (NLT) **May 5, 2025, 5:00 p.m. ET** at the following website: <https://events.sa-meetings.com/DARPABurnnGoPD/>

Directions to the facility and other materials are also available on the website. There is no registration fee for attending this conference.

The Proposers Day will be conducted at the CUI level and is open only to U.S. persons. All attendees accessing CUI agree to protect CUI in accordance with *DoD Instruction 5200.48 CONTROLLED UNCLASSIFIED INFORMATION (CUI)* and *National Institute of Standards and Technology (NIST) Special Publication 800-171 Protecting Controlled Unclassified Information in Nonfederal Systems and Organizations*. All attendees will be required to present government issued photo identification upon entry to the event. Additionally, all US Citizens are required to submit a US Citizenship Verification form in order to attend this conference. The completed citizenship form should be submitted to DARPA-SN-25-65@darpa.mil, no later than 5:00 p.m. ET on May 5, 2025. Documents are available for download at the registration website. Failure to complete and submit the form will result in the cancellation of your registration.

The Proposers Day does not constitute a formal solicitation for proposals or proposal abstracts. Attendance is voluntary and is not required to propose to any potential related Broad Agency Announcements or potential research solicitations on this topic. DARPA will not provide reimbursement for any costs incurred to participate in this Proposers Day.

Additionally, attendees who would like to present company overviews, discuss their technology expertise, and/or discuss teaming opportunities in scheduled presentations during the afternoon of **May 8, 2025**, may request to do so. Presentations may contain **2 slides** and are limited to **five (5) minutes each**. To request a Lightning Talk time slot, please indicate so by responding to the appropriate question on the registration site.

All material to be displayed at the conference must be approved in advance by both the organization that funded the research and the DARPA Program Manager. The DARPA Program Manager will screen the proposed material for CUI and approve in advance any presentations. It is the presenter's responsibility to ensure that all material they plan to present at the Proposers Day has been approved by the funding organization in advance. An electronic copy of all material to be presented must be provided to DARPA-SN-25-65@darpa.mil for review by **May 5, 2025**. There will be no exceptions to this requirement. Companies are free to present, but DARPA does not sponsor presented information.

DARPA hosts Proposers Days to promote teaming arrangements between researchers; provide potential performers with information on whether and how they might respond to the Government's research and development solicitations; and to increase efficiency in proposal preparation and evaluation. Therefore, Proposers Days are open only to registered potential proposers. The event is closed to the general public and media. Media inquiries should be directed to outreach@darpa.mil. For general administrative or technical inquiries, please email DARPA-SN-25-65@darpa.mil.
