

STATEMENT OF WORK (SOW)

FOR

**COMMUNICATION, NAVIGATION, AND IDENTIFICATION
(CNI) UPGRADE IN SUPPORT OF BLOCK 4**

EGLIN AIR FORCE BASE, FLORIDA

Prepared By: 46th Test Squadron/TGBC, Eglin AFB, FL
18 September 2024

1.0 Objective

The 46th Test Squadron (46TS/TGBC) has identified a need to upgrade the Communication, Navigation, and Identification (CNI) 3A and 3B racks located in Building 73 of the Datalinks Test Lab (DTL) at Eglin AFB, FL. The effort will require the contractor to replace the CATB (Catbird) equipment so the 46TS can move forward to Block 4. The replacement 3A and 3B racks will be used in a lab environment only so it is not necessary that the deliverable equipment be flight certified. Additionally, the replacement racks shall be populated with the modules necessary to perform MADL, Link-16, and VFM waveforms simultaneously

2.0 Basic Services

1. The contractor shall furnish components and assemble the 3A and 3B racks with replacement modules. See table 1.
2. The contractor shall integrate GFE CNI Processors into the 3A and 3B.
3. The contractor shall perform a functional acceptance test (in accordance with approved ATP) at the contractor facility to verify operation of 3A and 3B racks prior to delivery to include running MADL, L-16, and VMF waveforms simultaneously.
4. The contractor shall provide the Acceptance Test Procedure (ATP) to the 46TS/TGBC for review and approval 30 days prior to performing acceptance test. (Reference Appendix A: CDRL A001)
5. Upon Government acceptance of ATP, the contractor shall deliver the modules to the 46TS/TGBC at Eglin AFB, FL for installation in Building 73 of the Datalinks Test Lab (DTL)
6. The contractor shall assist 46TS personnel during installation of the modules and racks into the F-35 OPFAC located in Building 73 of the DTL.
7. The contractor shall support 46TS personnel in performing a functional check of the installed 3A and 3B racks upon completion of installation

3.0 Contractor Requirements

1. Contractor shall provide familiarization for DTL personnel upon completion of installation and checkout.
2. Contractor shall provide configuration documentation as part of the delivery. (Reference Appendix A CDRL A002)

4.0 Customer Furnished Materials

- 46th Shall provide 5 CNI processors as GFE for integration and testing.
- The 46TS has MIDS-JTRS terminals and terminal racks in place. Contractor will not be required to provide these items
- The 46TS intends to use existing cables. The contractor shall notify the 46TS if any existing cables have to be replaced.

5.0 Shipping Instructions

18 September, 2024

Contractor shall ship replacement 3A and 3B racks and modules to the following address:

46TS/TGBC

305 W. Choctawhatchee Ave., Bldg. 73T

(Behind Bldg. 85)

Eglin AFB, FL 32542

Attn: Marla Johnson 850-882-1455

F-35 OPFAC, POC: Jim Massey
