

Notice of Intent to Sole Source (HT9425-25-NOI-WAS-01)

The United States Army Medical Research Acquisition Activity (USAMRAA), on behalf of The United States Air Force (USAF) 59th Medical Wing Science and Technology (59 MDW/ST) Office is issuing this notice of intent to award a new contract on a sole source basis. This is not a request for proposals. This notice does not represent a commitment by the Government to pay for costs incurred from the preparation and/or submission of data in response to this notice.

The Government intends to award a sole source contract to the University of Arizona. This contract is for the Advancement of Military Medicine for a research and development requirement. The research study is titled “Novel Mobile Decision Support Platform to Enable Provider Translation of En Route Care Practice Guidelines for Large Volume Transports.” The purpose of this study is to evaluate the impact of an electronic clinical decision support tool adapted by en route care end users from the Joint Trauma System Clinical Practice Guideline (CPG) for Neurosurgery and Severe Head Injury on brain injury guideline adherence during simulated en route critical care air transport. The study will be a collaboration between the University of Arizona and the 59 MDW/ST Office to develop EZ-Phoenix, a hybrid web and mobile technology that enables CPGs for decision and procedure support to be converted without programming into mobile CPGs (mCPGs) and can execute as applications on iOS and Android phones and tablets. Development of the research study design was done by the University of Arizona and presented to the 59 MDW/ST Office to address the focus area to “identify and develop methods & materiel to move increased numbers of combat casualties both intra-theater and inter-theater.”

This contract will be issued on a sole source basis. The North American Industry Classification System (NAICS) code for this requirement is 541715 – Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology). Any sources that believe they are eligible and capable of providing this product must respond in writing. Responses must be supported with clear and convincing evidence articulating the ability to provide the items outlined above. A request for documentation will not be considered an affirmative response. Information received will be considered solely for the purposes of determining whether a competitive procurement is in the best interest of the Government. If no written responses are received by the date listed below, the contract will be awarded without further remark.

Responses are due no later than 12:00PM Eastern Time on 19 May 2025.

This notice is provided solely as information to the marketplace.
