DESCRIPTION

Statement of Work

Project Name: Implementation of AICE Software Platform for CT Scanner

Project Overview:

This statement of work outlines the requirements and deliverables for the implementation of the AICE software platform in conjunction with an existing Canon CT scanner. The AICE platform leverages artificial intelligence to enhance image reconstruction capabilities.

Objectives:

Enhance Image Reconstruction: Implement the AICE software platform to leverage artificial intelligence algorithms and improve the quality and accuracy of image reconstruction from the Canon CT scanner.

Optimize Diagnostic Capabilities: Enable radiologists and healthcare providers to make more accurate and informed diagnoses by utilizing the advanced image reconstruction capabilities provided by the AICE platform.

Reduce Radiation Dose: Utilize the AICE software platform to optimize image quality and reduce radiation dose exposure during CT scans, prioritizing patient safety and minimizing potential risks.

Streamline Workflow: Integrate the AICE platform seamlessly with the existing Canon CT scanner workflow to ensure efficient and user-friendly operation for radiologists and technologists.

Maintain Data Security and Compliance: Ensure that the implementation of the AICE software platform complies with all relevant data security and privacy regulations, safeguarding patient information.

Scope of Work:

Assess the compatibility and integration requirements between the AICE software platform and the existing Canon CT scanner.

Collaborate with Canon and the AICE software provider to establish the necessary technical infrastructure and connectivity for seamless integration.

Install and configure the AICE software platform on the designated workstation(s) connected to the Canon CT scanner.

Special Notice

Conduct comprehensive testing and quality assurance to ensure proper functionality and integration between the CT scanner and the AICE software platform.

Develop training materials and conduct training sessions for radiologists, technologists, and relevant staff members on utilizing the AICE platform for improved image reconstruction.

Implement appropriate security measures to safeguard patient data and ensure compliance with relevant data protection regulations.

Provide ongoing technical support, maintenance, and updates for the AICE software platform.

Deliverables:

Assessment report outlining the compatibility and integration requirements between the AICE software platform and the existing Canon CT scanner.

Installed and properly configured AICE software platform on designated workstation(s).

Training materials and conducted training sessions for radiologists, technologists, and staff members on utilizing the AICE platform for image reconstruction.

Implemented security measures to protect patient data and ensure compliance with data protection regulations.

Ongoing technical support, maintenance, and updates for the AICE software platform.

By implementing the AICE software platform, this statement of work aims to enhance the image reconstruction capabilities of the existing Canon CT scanner using artificial intelligence, enabling improved diagnostic capabilities, streamlined workflow, and a reduction in radiation dose exposure for the safety and well-being of patients.

ORIGINAL EQUIPMENT MANUFACTURER (OEM) SOLE SOURCE LETTER

CANON MEDICAL SYSTEMS USA, INC.

Made For life

|

November 17, 2023

Kayla Dawson
Deputy Chief, Biomedical Engineering
VA Maryland Health System
Baltimore, MD

Re: Canon Medical Systems, USA – Service Provider Letter

Dear Name Kayla Dawson,

Per your inquiry, please be advised that Canon Medical Systems USA (CMSU), who represents the Original Equipment Manufacturer (OEM), Canon Medical Systems Corporation (CMSC), provides service delivery on Canon diagnostic imaging equipment exclusively.

Canon trains its Customer Engineers (CEs) per manufacturer standards and upon successful completion of system training receives certification accordingly. Canon's CEs are also provided proprietary documentation and diagnostic tools that support them in troubleshooting Canon systems, allowing for expedited repair times.

Canon CEs also have a network of support engineers and specialists that range from local to Region to the USA, CMSU Headquarters and CMSC Headquarters, where those systems are designed and manufactured. All CEs and Specialists can be networked through a proprietary remote connectivity tool, InnerVision Plus, which allows for enhanced troubleshooting, error log review and image review. Additionally, InnerVision Plus provides a high-level of proprietary Cybersecurity tools that protects the system from malware and viruses.

CMSU also has a network of more than forty (40) Forward Parts Depots, across the USA, that house system replacement parts inventory. Replacement parts can be ordered and delivered expeditiously to minimize system downtime.

Please contact me if you have any questions regarding CMSU service delivery.

Sincerely,

Larry Thompson
Area Service Manager
