

Performance Work Statement
Data and Analytics Research and Advisory Services

1. Introduction

Access to an IT/Data and Analytics Research and Advisory Subscription is required to inform key decisions in the establishment of a formal Data and Analytics program. The research and advice must be relevant to the requirements of the requiring activity in support of strategic planning, cost optimization, data and analytics leadership, analytics and business intelligence strategies, data management, and building and expanding a data and analytics program.

The subscription provider shall provide access to an online research platform/tools, subject matter expertise, support, webinars, and outreach on Data and Analytics governance, policy, leadership, architecture, and best practices. Subscription provider shall provide access to online platforms and compiled analytic data as well as access to decision support in reference to data and analytics programs via the following:

• **Online Platform**

Subscription provider shall provide online access to information on the latest trends about data and analytics strategies, leadership, management and technology. This access shall be provided to the users. The platform shall also include access to documents for implementation best practices for a variety of technology tools and solutions.

• **Webinars on Data and Analytics topics**

Subscription provider shall provide access to webinars directed toward data and analytics professionals, on topics including but not limited to effective implementations, and lessons learned on latest technologies and security technology trends such as cloud security and vulnerability management.

• **Peer Network**

Subscription provider shall provide access to its existing peer network of individual and organizational peers in both government and private sector.

• **Subject Matter Experts**

Subscription provider shall have Subject Matter Experts (SMEs) available to respond to questions that any participating user may have regarding data and analytics. In addition, the SMEs must be available for meetings with users on selected industry topics. Subscription provider shall arrange meetings with SMEs as requested

2. Scope

Minimum technically acceptable requirements: requires research and advisory services aligned to individual levels of the Data and Analytics Organization under a Team Leader. This procurement requires individual subscriptions targeted to different roles within a team, as specified in the following enclosures listed below:

Team Leader (Senior Executive Level) Executive
IT Executive (Senior Executive Level) Executive
Advisor Team Member
