

CONTROLLED UNCLASSIFIED INFORMATION

Justification and Approval (J&A) for Other Than Full and Open Competition

Was a J&A approved for the preceding acquisition where that acquisition required a J&A? ☒ Yes ☐ No

!! Attach the preceding J&A in the staff package for this J&A. The preceding J&A will be used as a reference document.

Is this a new or amended J&A Document? ☒ New ☐ Amended (Prior to Award Only!)

Is this a Bridge Action as defined at [DAFFARS 5302.101](#)? ☐ Yes ☒ No

Dollar Value of this Acquisition: ☐ ≤ \$750K ☒ > \$750K and ≤ \$15M ☐ > \$15M and ≤ \$100M ☐ > \$100M

Contracting Activity: AFSC/PZABC

Purchase Request (if available) / Local ID Number: FD2030-25-30286

Program / Project (and PE, if applicable): JetScan Repair & Sustainment

Program Type (PEO, Enterprise, of Operational): Other Contracting

Authority:

6.302-1 – 10 USC 3204(a)(1), Only One Responsible Source - No Other Supplies or Services Will Satisfy Agency Requirements

Estimated Contract Cost (including options): \$ 7,107,060

J&A Type: ☒ Class ☐ Individual

!! Provide estimated cost of all contracts.

COORDINATION ([DAFFARS 5306.304\(a\)](#))

Justification and Approval (J&A) for Other Than Full and Open Competition

I. Agency and Contracting Activity.

Department of the Air Force AFSC/PZABC
 3001 Staff Drive
 Tinker AFB OK 73145-3032
 Purchase Request (PR): FD2030-25-30286
 Requiring Activity: AFLCMC/LPSZC

II. Nature and/or description of the action being approved.

This Individual Justification and Approval (J&A), which is not a bridge contract, authorizes the use of other than full and open competition to obtain a follow-on, commercial Firm Fixed Price requirements type contract in support of requirements generated by both the United States Air Force (USAF) and Foreign Military Sales (FMS) customers. This contract is to provide 24 hour telephone support and when necessary, on-site repair services for the JetScan Scanning Electron Microscope Engine Health Monitoring System (EHMS) used to analyze magnetic chip detectors on the F110/100 and F118 engines. JetScan NSN 6650-01-486-7221PR from Rolls-Royce Corporation CAGE code 63005. A 1-year basic ordering period with two 1-year options is considered appropriate for this acquisition. This acquisition will not include the option to extend services clause, FAR 52.217-8, for up to an additional 6-months. The total estimated value of this contemplated award is \$7,107,060.00 with an estimated award date of 1 Mar 2025. This is a follow-up to previous Rolls-Royce Corporation contract FA811920D0006. Previous contract start date was 1 Jul 2020, and expired 31 Dec 2024. Estimated value of \$24,062,508.

ITEM NSN: 6650-01-486-7221PR

NOUN: JetScan, Scanning Electron Microscopy Energy Dispersive X-Ray Analysis (SEM/EDX)

APPLICATION: F110/F118 Engine Program

Type Appropriation: 3400, 3600, Foreign Military Financing (FMF)

Contract Summary

Estimated Dates

Basic I: 01 Mar 25 - 28 Feb 26	\$3,829,800.00
Option I: 01 Mar 26 - 28 Feb 27	
Option II: 01 Mar 27 - 29 Feb 28	
Total Contract: 01 Mar 25 - 29 Feb 28	\$7,107,060.00

III. Description of supplies/services required to meet agency needs.

Under the contemplated contract, Rolls-Royce Corporation will provide repair services for the Scanning Microscope for the Air Force and the following FMS country: Bahrain (RBAF). At this time, RBAF is the only FMS country that has committed to and expressed interest in retaining Rolls-Royce Corporation support for Repair and Sustainment of their JetScan SEM/EDX machines. All FMS requirements are funded by Foreign Military requesting repair and sustainment support

This contract contemplates the potential use of Foreign Military Financing (FMF) for a portion of the FMS requirements. However, pursuant to the Executive Order of January 20, 2025, entitled

Justification and Approval (J&A) for Other Than Full and Open Competition

"Reevaluating and Realigning United States Foreign Aid," all contract activities funded by FMF are currently subject to a temporary hold pending further review.

As this is a requirements contract, no funding obligation arises until the issuance of a specific order. No orders or requirements funded by FMF will be issued under this contract unless and until the restrictions imposed by the aforementioned Executive Order are modified or lifted.

The service this effort provides will ensure USAF personnel, FMS partner nations have the ability to obtain necessary technical support or repair to this unique piece of support equipment, as it provides microscopic scanning analysis to identify engine material wear debris. For this requirement, the Contractor shall be able to respond to emails and phone calls for the purposes of providing trouble shooting technical support; in the event trouble shooting via emails or phone calls fail to resolve customer issue. If needed, the customer will request to coordinate JetScan machines for repair by shipping to Original Equipment Manufacturer (OEM) or by Contractor Site Visit. The Contractor shall repair and return the JetScan unit to a fully operational status.

The intended procedure is to authorize a 1-year contract with 2 one-year options, in accordance with FAR part 12; utilizing USAF standard procedures for the solicitation and award. Rolls-Royce Corporation will provide a monthly Firm Fixed Price (FFP) per contracted JetScan machine. All repair & sustainment as described above will be covered in CLIN 0001 or CLIN 0004 as described below. CLIN structure does not include intellectual property (IP).

F110 & F118 engine users are upgrading and replacing their JetScan machine with Gastops Chip Check to accomplish their microscopic scanning analysis for engine material wear debris. JetScan is an obsolete equipment that will be retired and phased out by the last month of the Period of Performance (PoP). JetScan is only being utilized while applicable Field Units upgrade to Chip Check.

Previous contract value (\$24,062,508.00) was determined by forecasting and allocating funding for all fielded JetScans (74) that support both USAF & FMS. Previous contract length was one (1) baseline year, three (3) options years & one (1) 6-month extension. Program Office has confirmed that estimated quantity listed below are the requirements for 2025 and will decrease 50% each option year. The lowered price each year is accounting for a shortened repair & sustainment contract and less machines being utilized and retired each year.

This J&A covers all contract actions including options, task orders and delivery orders for all CLINs detailed in the CLIN table above. The maximum estimated quantities are listed in the below table.

CLIN	Est Qty	Unit Price Per Month	Estimated Annual Price	Fund Type	Period of Performance
0001			\$3,753,204.00	3400/3600	1 Mar 25 - 28 Feb 26
1001	24			3400/3600	1 Mar 26 - 28 Feb 27
2001	14			3400/3600	1 Mar 27 - 29 Feb 28

*Air Force Material Command (AFMC) provides 3600 Appropriated Funds. All other USAF Major Commands (MAJCOMS) provide 3400 Appropriated Funds.

CLIN	Est Qty	Unit Price Per Month	Estimated Annual Price	Fund Type	Period of Performance
0004			\$76,596.00	FMF	1 Mar 25 - 28 Feb 26
1004	1			FMF	1 Mar 26 -28 Feb 27
2004	1			FMF	1 Mar 27 -29 Feb 28

Justification and Approval (J&A) for Other Than Full and Open Competition

IV. Demonstration that the contractor's unique qualifications or the nature of the acquisition requires use of the authority cited above.

Under the contemplated follow-on contract Rolls-Royce Corporation, will provide highly specialized services for the JetScan EHMS. The JetScan EHMS are sophisticated diagnostic systems employed at the field level to mitigate the high safety risk associated with engine bearing failures. Rolls-Royce is currently providing this support under contract FA8119-20-D-0006 which was awarded on 1 Jul 20 as a sole-source acquisition. The current contract option expired on 30 Jun 24 but an option to extend services was granted for a start date of 1 Jul 24. The contract expired on 31 December 2024.

All system software and hardware configuration of the JetScan units are proprietary to the Original Equipment Manufacturer (OEM), Rolls-Royce Corporation. All data required to service or repair this equipment is proprietary to the OEM. Rolls-Royce Corporation utilizes highly specialized personnel and specialized test equipment/tooling for the diagnostics, repair, and maintenance of the JetScan system.

AFLCMC/LPSZC believes there is no other available award to any other source. Any delay in contract award would result in unacceptable delays in fulfilling the Air Force's requirement. Failure to fund this service/repair requirement will result in unserviceable aerospace equipment, limiting or eliminating the capability to quickly and efficiently detect the health of the engine and potential hazards could result in engine failure. These inspections are mandated by technical guidance across multiple engines and could potentially ground aircraft if not adhered to. The effect would have a significant impact on aircraft availability and create a safety of flight if strict engineering directives are not followed and accomplished at the precise inspection interval.

Repair and troubleshooting for the subject JetScan units requires not only knowledge of the design & operation of the specific equipment but also of the proprietary software that operates and supports the system automation, diagnostics, and metal debris analysis functions. The Government does not have the technical expertise or technical data to troubleshoot/repair these critical machines due to proprietary hardware and software requirements. Rolls-Royce Corporation is the OEM and is the only firm capable of providing Repair and Sustainment of JetScan machines described in section III above without the U.S. Air Force experiencing unacceptable delays in fulfilling its requirements. There is no option or available vendor that can provide reverse engineering.

Rolls-Royce Corporation officially notified USG via correspondence on 28 Oct 2024 confirming that they are the sole proprietor and owner of JetScan machines and all associated data. USG has officially requested and inquired with Rolls-Royce Corporation concerning the sale or transfer of JetScan data. Rolls-Royce Corporation provided an official response dated 3 Mar 2025 that they will not or intend in the future to sell or grant data rights to USG. For this reason, service/repair will be procured using other than full and open competition.

V. Description of efforts made to ensure that offers are solicited from as many potential sources as practicable, including whether a notice was or will be publicized as required by subpart 5.2 and, if not, which exception under FAR 5.202 applies.

A Sources Sought Synopsis was published in Federal Business Opportunities website on 15 May 24, for 30 days under number NSN 6650-01-486-7221 for the purpose of identifying sources capable of satisfying the Government's requirement, no potential sources responded to the synopsis.

This proposed contract action will be synopsized in Sam.gov as a notice of proposed contract action IAW FAR 5.201. Consideration of capability shall be given to any identified, potential sources prior to award. The projected

Justification and Approval (J&A) for Other Than Full and Open Competition

solicitation for this effort is 18 February 2025.

VI. Determination by the Contracting Officer that the anticipated cost to the Government will be fair and reasonable.

The Contracting Officer (CO) will ensure the items described herein are negotiated at a fair and reasonable price to the Government in accordance with FAR Part 12 procedures. The CO may request other than certified cost and pricing data to ensure prices are negotiated at a fair and reasonable price to the government and contractor. The CO may request a technical evaluation from the Defense Contract Management Agency (DCMA) and a field audit from the Defense Contract Audit Agency (DCAA) for the purpose of determining fair and reasonableness.

VII. Description of the market research conducted and the results, or a statement of the reasons market research was not conducted.

Market research in accordance with FAR 10.001 & 10.002(b)(2), was conducted and the MRR was signed by the multi-functional team consisting of the Logistics Management Specialist, Engineer, Production Management Specialist, Program Manager and Procuring Contracting Officer. The conducted research consisted of Internet searches using key words "JetScan" "SEM/EDX", reviews of government data bases, reviews of results for similar market research requirements, a posting on Sam.gov, a Sources Sought Synopsis posting, and a draft Statement of Work. Market Research is current, Accurate and has been accomplished within 18-months.

The market research revealed there is only one commercial source that can meet this requirement. Rolls-Royce Corporation is the only company that can meet the 24 hour telephone support requirement and is also capable of performing on-site repairs. Rolls-Royce Corporation possesses data and software that are proprietary to the JetScan machine. Market research in accordance with FAR 10.002(b)(2), was conducted by the multi-functional team consisting of the Logistics Management Specialist, Engineer, Production Management Specialist, and Procuring Contracting Officer. The conducted research consisted of Internet searches, reviews of government data bases, reviews of results for similar market research requirements, a posting on Sam.gov, a Sources Sought Synopsis posting, and a draft Statement of Work.

In Conclusion, The market research revealed there is only one commercial source can meet this requirement. Rolls-Royce Corporation is the only company that can meet the 24 hour telephone support requirement and is also capable of performing on-site repairs. Rolls-Royce Corporation possesses data and software that are proprietary to the JetScan machine.

VIII. Any other facts supporting the use of Other Than Full and Open Competition.

No further information

IX. List of any sources that expressed, in writing, an interest in the acquisition.

Rolls-Royce Corporation, 450 S. Meridian Street, Indianapolis IN 46225

X. A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisitions for the supplies or services required.

As a result of continued refusal by the Sole Source contractor to provide or license data as well as the duplication of cost and unacceptable delay of developing additional sources, there are no known additional actions which can be taken to remove barriers to competition.

Justification and Approval (J&A) *for Other Than Full and Open Competition*

As Stated in Block IV, Rolls-Royce Corporation is the sole owner and proprietor of JetScan Machines and all applicable data. They will not and do not intend to sell JetScan data to USG or any Commercial Entity.

Per PGI 206.304(a)(S-70) -As indicated by signature on the Coordination and Approval Document, the previous J&A has been reviewed and the Approval Authority determines any stated actions to remove barriers to competition have been accomplished.

XI. Certification by the Contracting Officer.

As evidenced by my signature above, I certify this justification is accurate and complete to the best of my knowledge and belief.

XII. Certification by the technical/requirements personnel.

As evidenced by my signature above, I certify any supporting data contained herein, which is my responsibility, is both accurate and complete.
