2. Brief Description of Supplies/Services required and the intended use/Estimated Amount:

The Cincinnati VA Medical Center (VAMC) needs a contractor to provide troubleshooting & diagnostic services to address failed generators & associated paralleling switchgear at the Cincinnati VAMC. The key task is to fully test the emergency generator system to determine the cause of the recent failure. The fulfillment of the project will provide insight to what repairs/replacement will be required to restore fully emergency backup generator functionality at this facility.

The estimated cost for this procurement is \$20,350.00.

3. Unique characteristics that limit availability to only one source, with the reason no other supplies or services can be used:

The absence of backup generators and emergency power resulted in the closure of the operating rooms at the Cincinnati VA Medical Center. All surgeries scheduled for Thursday, 4/10, and Friday, 4/11, were cancelled. Patients were notified that surgeries were cancelled on short notice. Patients that had equipment that required emergency power were transferred to other Hospitals.

This situation highlights the critical need for the emergency power system to be restored promptly to ensure the facility can continue to provide essential medical
