

Purchase Description
Procurement of Pneumatic Test
Pump Kit

The U.S. Army Test, Measurement and Diagnostic Equipment Activity (USATA) has a requirement to procure Thirty-Seven (37) Pneumatic Test Pump Kits which will be used for fast and accurate test results that generate pressure up to high psi levels. The equipment shall be delivered to USATA's Physical Measurement Division located at Building 5435, Fowler Road Redstone Arsenal. The Pneumatic Pumps supports USATA's mission as follow:

1.0 Requirements:

Pneumatic Test Pump Kit Qty: 37

- Pneumatic pressures need to adjust up to 21 MPa (3000 psi)
- Has to be an upright position unit for easy use

2.0 Delivery Requirements

Shipping Address: U.S. Army TMDE Activity, Attn: Simplicie Gbedie, Building 5435, Redstone Arsenal, AL 35898
