

Statement of Work

Procurement of Electrostatic Discharge (ESD) Machine and GoDetect ESD, GoDetect High-Speed Camera System

1. Scope

The purpose of the requirement is to provide the Naval Surface Warfare Center Indian Head Division (NSWC IHD) Explosive Detection Equipment (EDE) Branch Sensitivity Laboratory with an Electrostatic Discharge (ESD) Machine and the GoDetect ESD, GoDetect-View High Speed Camera Detection Version 8 system.

2. Table of Equipment and Services

The table below outlines the equipment that will be prepared, and services expected to be rendered to successfully deploy and install the equipment into the EDE Sensitivity Laboratory.

Table 1. Materials and Services to be Rendered.

Item Number	Equipment	Service	QTY	Location
1	Electrostatic Discharge Machine	NA	1	Indian Head, MD (Explosive Detection Equipment Branch)
2	GoDetect ESD, GoDetect View High-Speed Camera Detection Version 8	NA	1	Indian Head, MD (Explosive Detection Equipment Branch)
3	Laptop	NA	1	Indian Head, MD (Explosive Detection Equipment Branch)
4	Camera Bracket Floor Mount for Friction Machine	NA	1	Indian Head, MD (Explosive Detection Equipment Branch)
5	Camera Bracket Floor Mount for Impact Machine	NA	1	Indian Head, MD (Explosive Detection Equipment Branch)
6	NA	Shipping	5	Indian Head, MD (Explosive Detection Equipment Branch)
7	NA	Installation	5	Indian Head, MD (Explosive Detection Equipment Branch)

3. Shipping and Installation of Systems

At the date and time designated by NSWC IHD, the Contractor shall ship all equipment to the installation location, in accordance with this SOW. Contractor installation of the equipment will occur at the installation site listed in Table 1. Shipping and installation include the delivery, packing, removing of equipment, set-up of each system, and disposal of material that the system was shipped in.

Prior to delivery, the Contractor shall review, in-person, the installation location prior to the delivery of the ESD machine and the GoDetect High-Speed Camera system.

The contractor shall install all necessary software for any applicable hardware prior to shipment of equipment.

4. Laptop Requirements

The Contractor shall provide a laptop that will meet minimum requirements listed in Table 2.

Table 2. Laptop Minimum Requirements

CPU	Memory	Hard Drive	Graphics Card	Other
Four (4) Core, 6M Cache, 2.7 GHz 45W	16 GB	500GB SSD	Min 4 GB RAM 1024 CUDA cores GPU	TPM 2.0

5. Training

The contractor shall provide one-time user training for the location listed in Section 2. The training shall include the following, at a minimum:

- a. Overview of system functionality;
- b. Overview of general maintenance/troubleshooting that can be completed by the operator;
- c. Overview of power up/power down;
- d. Basic understanding of ESD and GoDetect High-Speed Camera Detection System Technologies.

6. Security

All tasks associated with this SOW are unclassified. Contractor personnel must be able to pass the background checks required for access to Government facilities.

7. Technical Datasheets

The Contractor shall provide the government with technical data sheets and operator manuals on all equipment that will be delivered to NSWC IHD.

Appendix A: Acronyms and Definitions

Acronym	Definition
EDE	Explosive Detection Equipment
ESD	Electrostatic Discharge
NSWC IHD	Naval Surface Warfare Center Indian Head Division
