

Advancing Today's Training Defeating Tomorrow's Threats

STE-SW and NGC Acceleration
Industry Day

03 APR 2025

UNCLASSIFIED

Advancing Today's Training
Defeating Tomorrow's Threats

Industry Day Agenda

- Industry Partner Arrival and Sign In (0800-0855)
- Administrative Announcements (0900 Start)
- Opening Remarks
- STE Requirement Overview
- NGC Evolution

----- 10-Minute Break -----

- STE Overview
- Terrain
- Statement of Need & Contracting Timeline

----- 10-Minute Break -----

- Panel Questions from Industry Partners
- 1200-Close out / Egress

Mr. Kristopher Brewer

Deputy Product Director

Next Generation Constructive

Administrative Announcements

- **Welcome!**
- **Rules of Engagement**
 - PAO/Recording Video/No Badges
 - Remove badges & keep sidebars to a minimum
 - Hold questions until end of meeting; QR code for questions
- **Fire Protocol / Emergency Exits**
- **2x 10-Minute Breaks**
- **Bathroom Locations**
- **1200 (Noon) Cutoff**

QR Code for Questions

Slides will be posted on SAM.GOV after Industry Day

Opening Remarks

BG Christine Beeler

PEO

STR I

Program Executive Officer

Simulation, Training and Instrumentation

Opening Remarks

BG Jeremy Wilson

**Deputy Commanding General
Combined Arms Center – Training**

Opening Remarks

COL Jason West

**Director, Synthetic Training Environment
Cross Functional Team**

Opening Remarks

Dr. Alex Miller

**Chief Technology Officer
Office of the Chief of Staff of the Army**

Mr. John Gillette

Project Manager Synthetic Environment

Next Generation Constructive Evolution

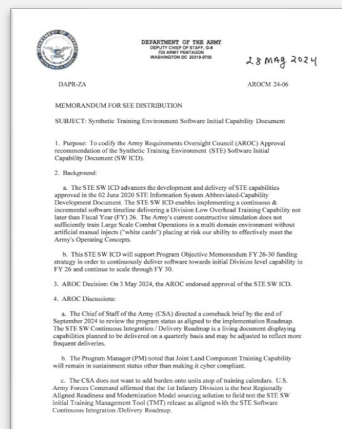

**NGC DIV Capability FY26
(4 yr acceleration)
May 2024**

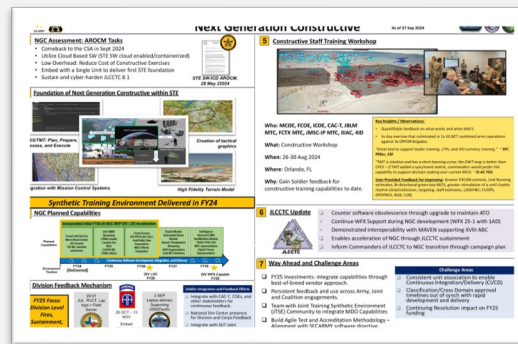

**NGC CORPS Capability
(1 yr acceleration)
Oct 2024**

**NGC
Cloud Migration
Jan 2025**

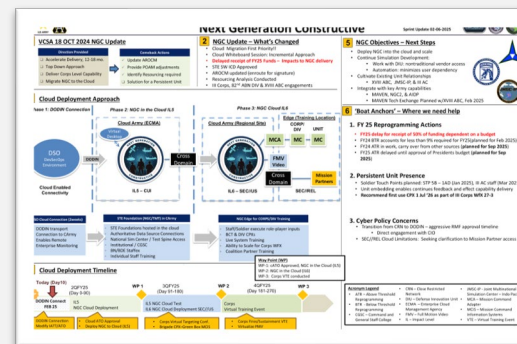

**Warfighter 27-1
NGC MVP First Use
Feb 2025**

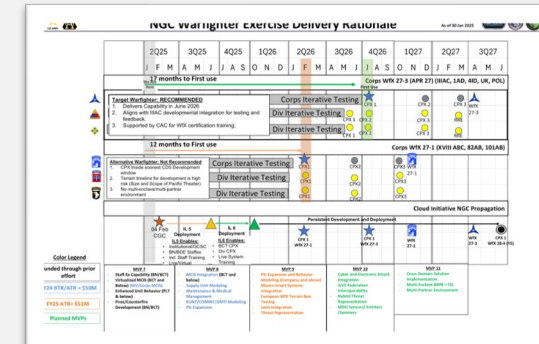

STE SW-ICD AROCM

VCSA Update on NGC

VCSA Update on Cloud Migration Strategy

VCSA Update Recommended WFX 27-1 First Use

NGC Cloud Path Forward

NGC Warfighting Functions

Corps commanders will be able to conduct Command Post Exercises (CPX) and Warfighter Exercises (WFX) with sufficient fidelity, accuracy, and Command and Control (C2) stimulation meeting training objectives, while minimizing overhead.

Chief of Staff of the Army's (CSA) acceleration effort will provide an NGC Corps low overhead capability. Areas of planned enhancements are comprised of Synthetic Training Environment scalability(cloud), Unmanned Air Systems intelligence model integration, fires/counterfires, and cyber effects.

Movement and MVR

- Ground move-shoot-communicate for infantry, mech, armor
- Minefield, obstacles, bridges, wet gap crossing and select engineering functions
- Fixed/rotary wing representation
- OPFOR & Civilian representation
- Energy Weapons

Fires

- Consumption, tubes Counter-fire radars
- Fire effects/direction models
- Fires graphics (NFA, etc.)
- Target nomination/scheduling
- Battle Damage Assessment (BDA) reporting/assessment
- Cyber and Electronic Attacks
- Hypersonic
- Nonlethal and information warfare
- Joint Targeting

Intel & Electronic Warfare

- Representation of signal & emissions
- Unmanned Aerial Vehicle(UAV)/Imagery Intelligence (IMINT) streaming
- Intel graphics/overlays
- Potential BLUE/RED threat intel reporting
- Electronic Warfare (EW) modeling, sensing/Direct Finding (DF)
- Space Sensing (Sensors, Models, Intel, GPS)
- Weather

Sustainment

- Logistics
- Contested Logistics
- Consumption
- Classes 1-9
- In Transit Visibility
- Maintenance
- Medical
- Personnel/RSOI

C2 and Exercise Control

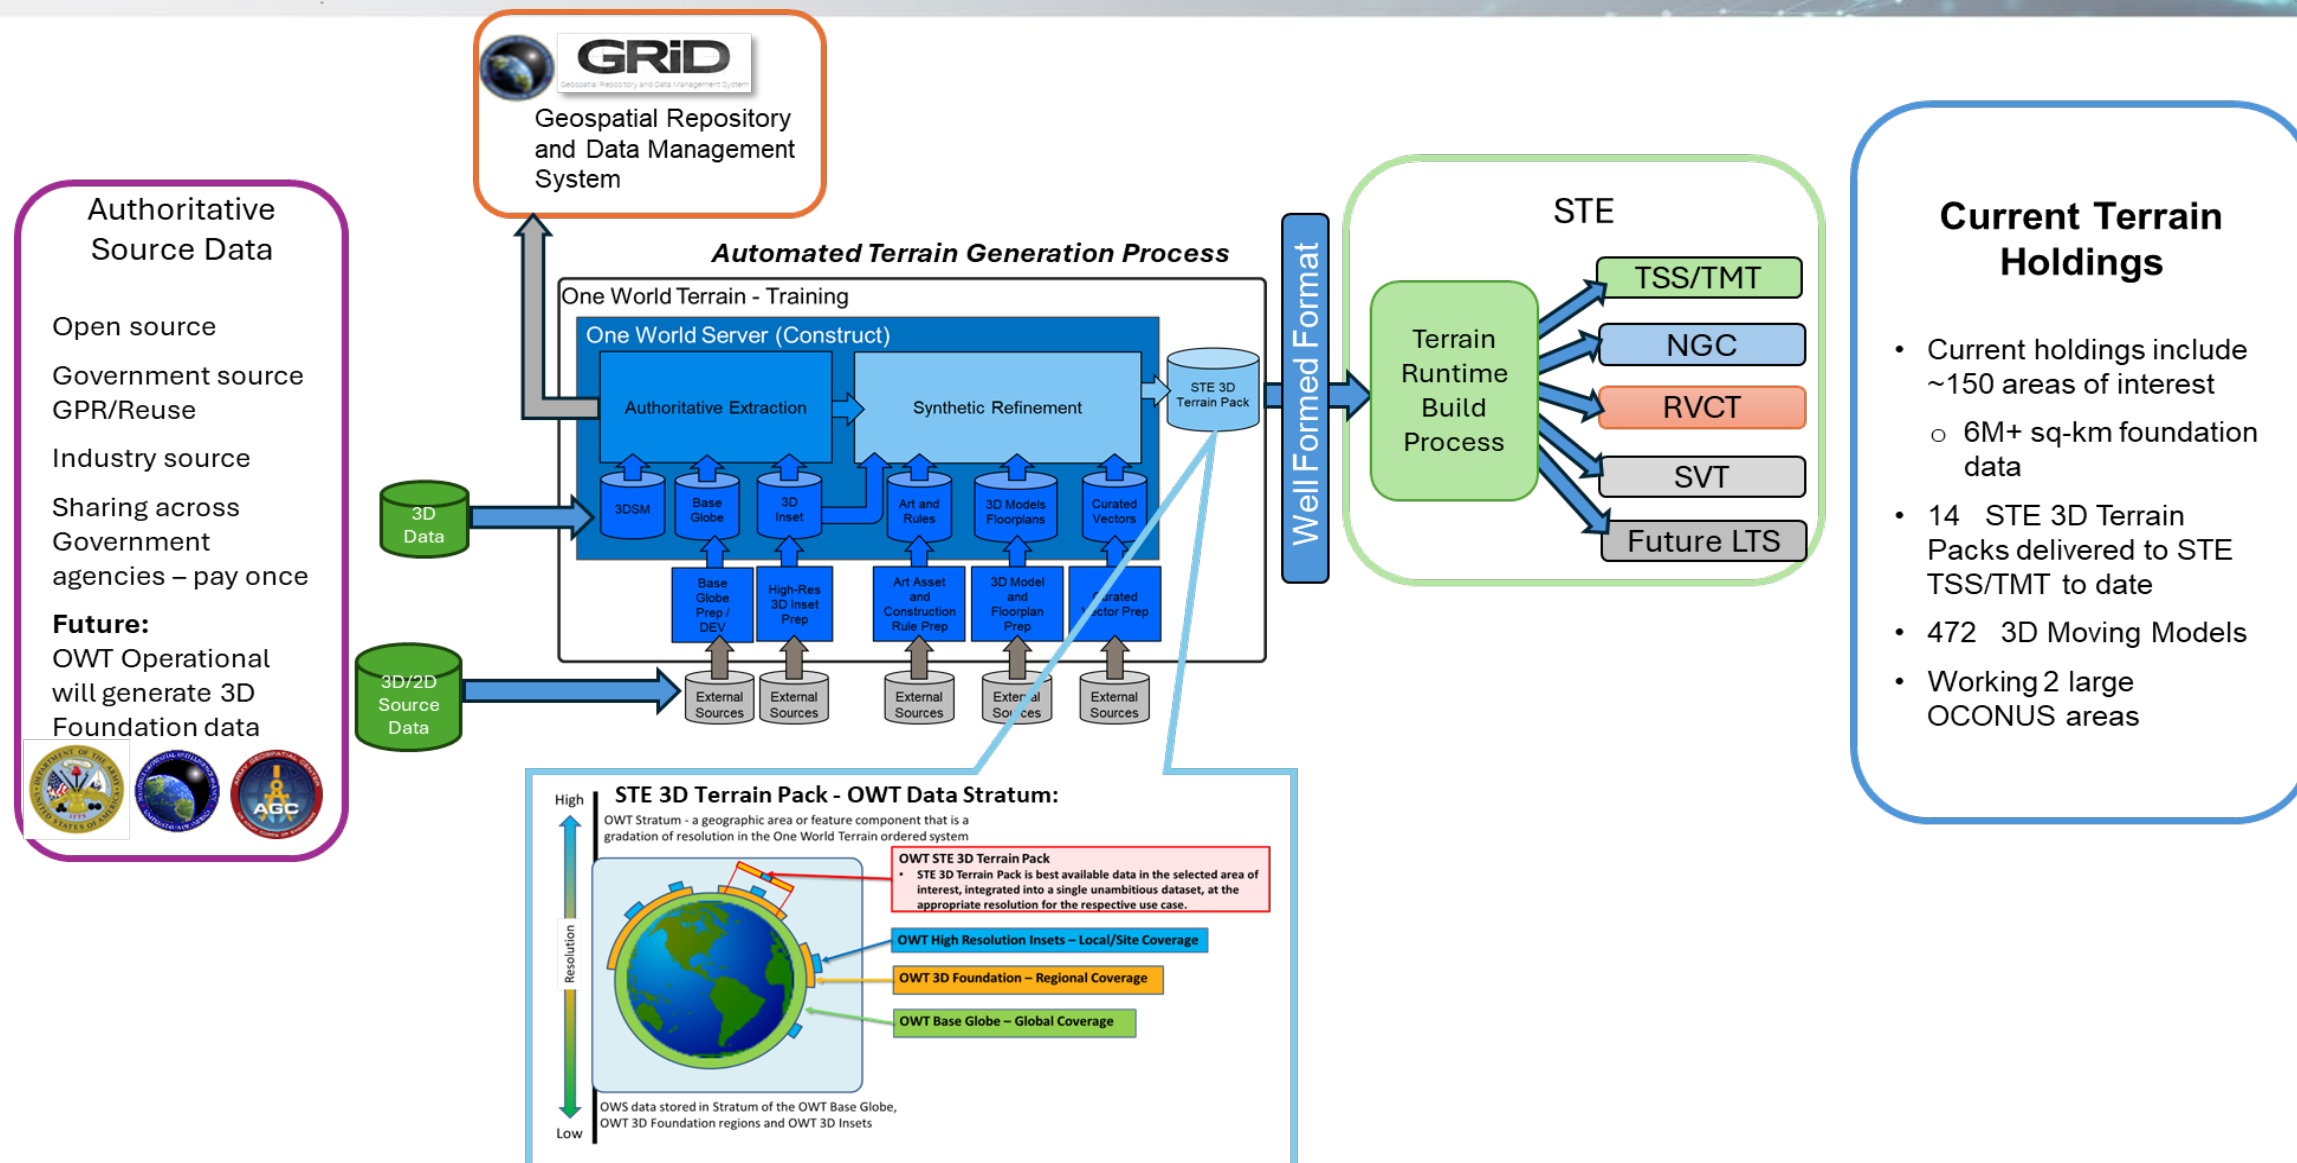

- Digital and Voice Communications
- Bi-Directional MCIS
- EW Spectrum Modeling
- Master Scenario Events List (MSEL) Injects
- Scenario Development
- Robotics and artificial intelligence.
- Supporting cloud migration from IL5 to IL6

NGC is a large-scale synthetic training capability provided in an operational simulated environment enabling mission rehearsal and collective training at echelons Brigade through ASCC. NGC will iteratively develop, test, and deliver prototype capability through agile software development

Terrain Process and Holdings

MAJ Joseph 'Cody' Lucas

**Statement of Need &
Contracting Timeline**

Training and Readiness Accelerator II

trexii.org

Request for Solution (RFS) 25-04 Next Generation Constructive

- Solicitation Opened – 17 March 2025
- Technical Questions Due – 9 April 2025 at 12:00PM ET
- Solicitation Closes – **16 April at 12:00 PM ET**
- Submissions will only be accepted through BAA Information Delivery System (BIDS)
- Must be a TReX II Consortium member to make a submission
- Contact us at trexii@ati.org

Statement of Need (SON)

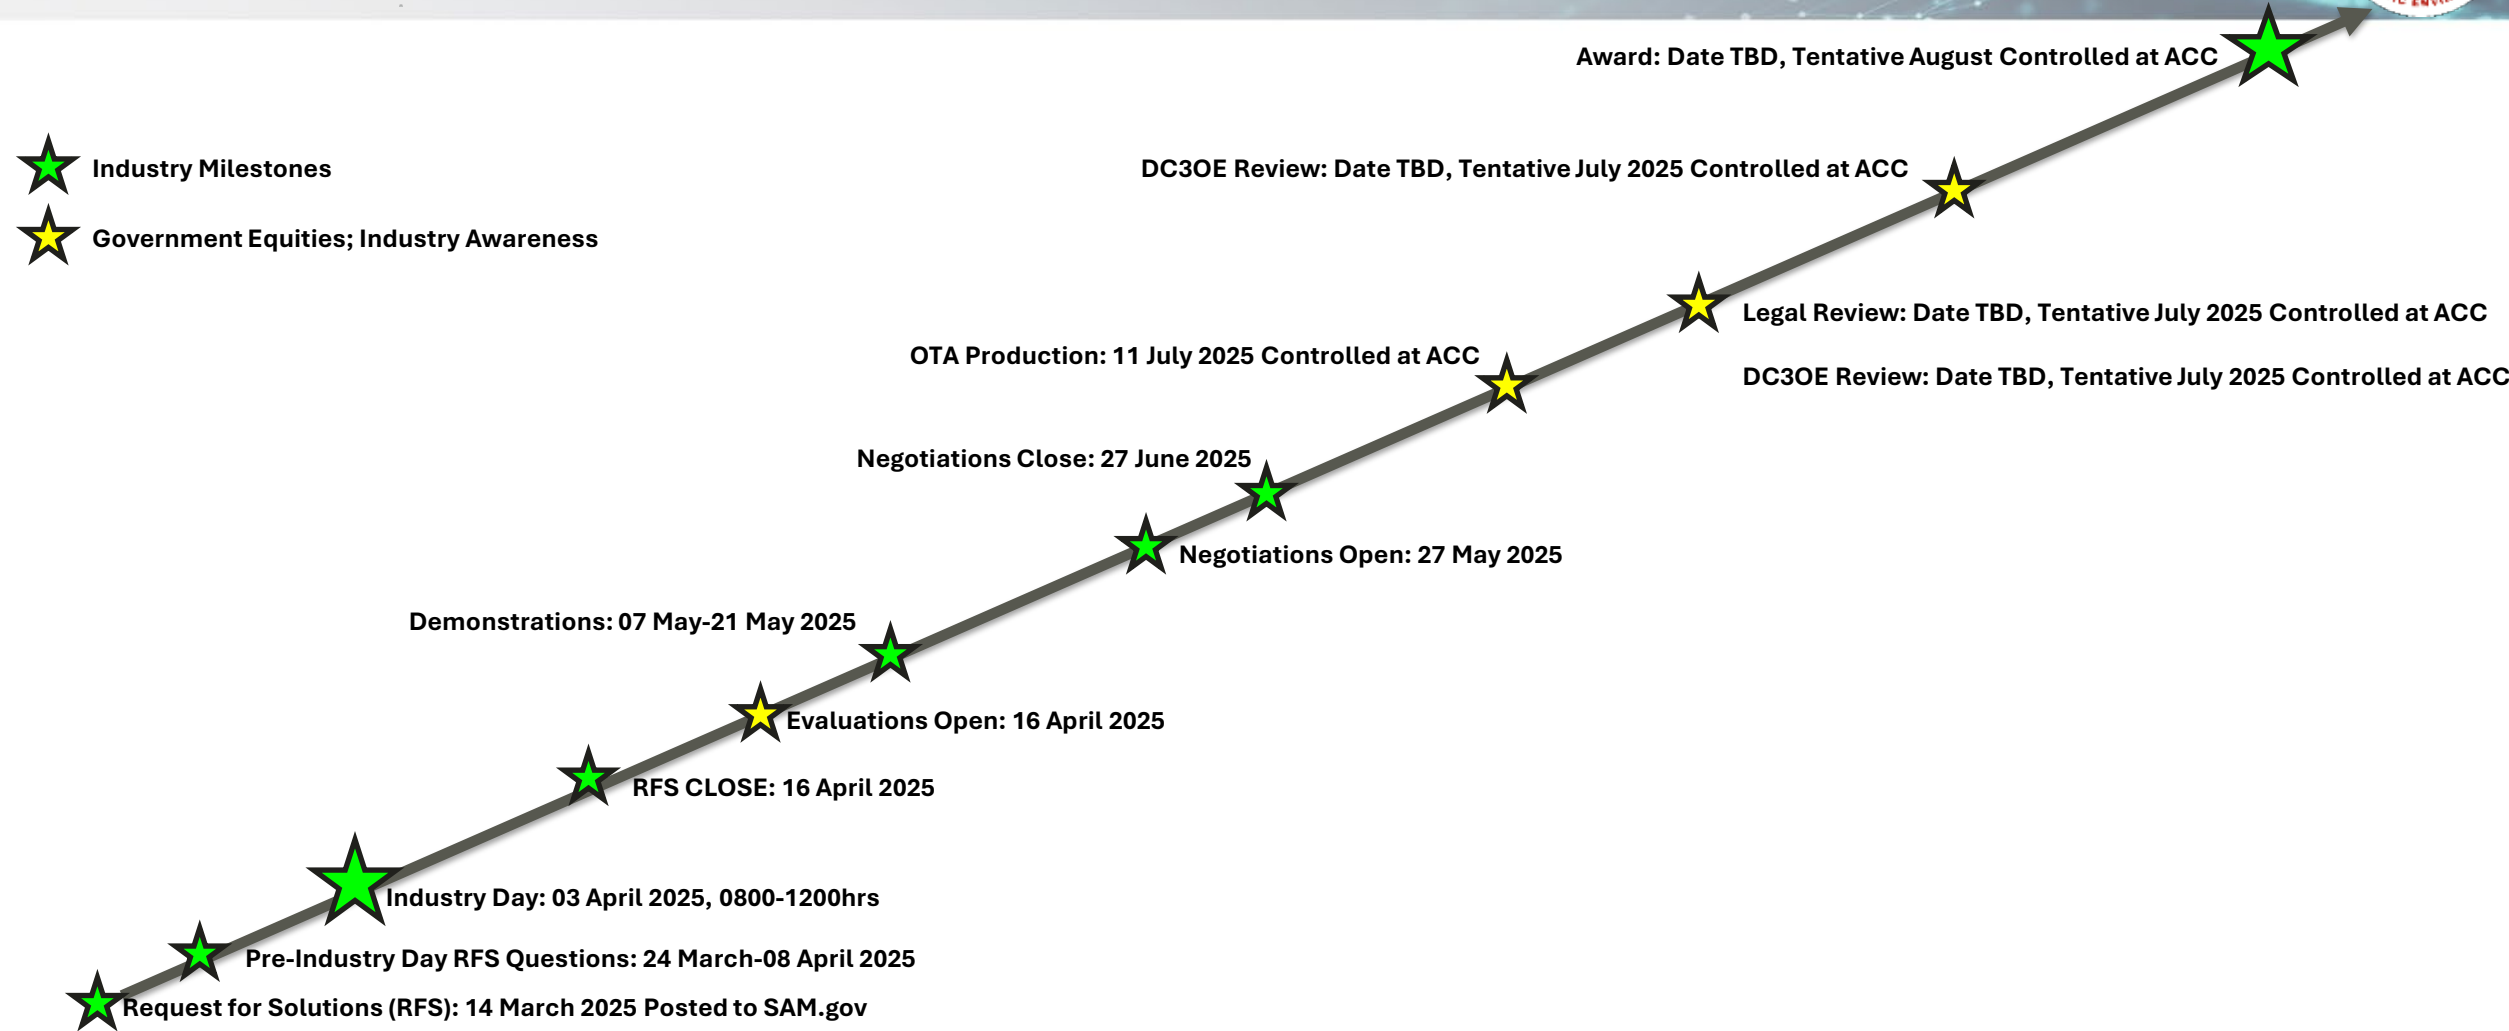

- The SON topics are contained within four sections (A/B/C/D)
- Each 10-page response should be associated with a specific section
 - Example, no more than 10-page response to Section A pertaining Movement & Fires (3.7) and Intel (3.9)

Section	Description	SoN reference
A 10 Pages total	Movement, Fires	3.7
	Sustain	3.8
	Intel	3.9
	Cyber	3.10
	Space	3.11
	Info Ops	3.12
B 10 Pages total	STE Core	3.2
	STE SW Test	3.3
	STE Cyber	3.4
C 10 Pages total	STE Virtual Collection	3.5
D 10 pages total	Geospatial / Terrain and 3D modeling	3.13
