NATIONAL SECURITY SENSITIVE?

☐ YES ☒ NO

**BRAND NAME JUSTIFICATION
FOR USE OF OTHER THAN FULL AND OPEN COMPETITION
(\$10,000 to SAT (\$250K)**

1. The supply listed on is brand name and competition is precluded for reasons indicated below. There are no substitutes available for this material.

2. **Restricted to the following source.** Provide original manufacturer's (OEM) name:

Manufacturer: CaseCracker

Mfr. POC / Phone # / Email: Tonya Clement, tonya@casecracker.com

Mfr. Address: 1380 Forest Park Circle, Suite 202
Lafayette, CO 80026

3. **Statutory Authority Permitting Other Than Full and Open Competition.** The statutory authority permitting other than full and open competition is 41 U.S.C.3304(a)(1), as implemented by 6.302-1(c) Only one responsible source and no other supplies or services will satisfy agency requirements.

4. **Identification of the justification rationale.** The acquisition is being conducted under the procedures of Federal Acquisition Regulation FAR 13.106-1(b)(1)(i) – Soliciting from a single source. The justification rationale for restricting competition is:

The CaseCracker system brings Naval Criminal Investigative Service (NCIS) operations to the apex of forensic data collection, specifically within the realm of documenting witness statements. Installing and implementing this system enhances the ability of NCIS special agents and investigators to accurately and safely record essential information from witnesses. The CaseCracker system enables the interviewers to “flag” portions of the recordings in order to quickly hone in on the most important aspects of the statements. Rather than having only one server per room, CaseCracker utilizes one server that supports multiple interview rooms, which is imperative for the quick access and safeguarding of mission-critical information during investigations. During FY24, NCIS effectively installed the CaseCracker system at 54 NCIS Resident Agencies (NCISRAs). The ability to continue to use the CaseCracker system maximizes productivity and safety across NCIS and ensures compliance with NCIS security policy.

5. **Description of the item or service required, statement that the requested material or service represents the minimum requirements of the government, the estimated cost, and required delivery date or performance period.**

The proposed acquisition is to purchase:

	Product	Description	QTY	Unit Price	Total Price
1	CCO-2RM-EVP Bundle-5Yr	CaseCracker Onyx Lite Standard two room includes a server complete with 2TB of storage, (2) room controllers, (1) RC power	1		

		supplies, (2) wall or ceiling microphones, (4) IP cameras: covert PIR (1080p), wall plate (720p), dome (1080p), or PTZ (720p), (2) interview in progress kit, (2) flagging kits, and (1) 5-port ethernet switch. 5-years of software support and hardware warranty included.			
2	CCO-CMW	Control Monitoring Workstation	1		
3	Panic Alarms	Turn-key installation for Two (2) Panic Alarms	1		
4	Installation/Training	Installation	1		
5	Travel	ODC Travel	1		
6	Shipping	Shipping	1		

The required delivery date is 60 days ARO.

This CaseCracker system is to be shipped to and installed at:

NAVAL CRIMINAL INVESTIGATIVE SERVICE
U.S. NAVY - ATTN: NCIS BUILDING 155
JUFFAIR BAHRAIN 324

6. Specific characteristics of the material or service that limit the availability to this/these source(s) (unique features, function of the item, etc.). Describe in detail why only this/these suggested source(s) can furnish the requirements to the exclusion of other sources. Provide a description of the market research conducted among schedule holders.

In 2024, NCIS made verbal contact with Department of Defense (DoD) and U.S. Government (USG) law enforcement agencies regarding the prices and scope of the products and services vendors provided for new "Interview Management Systems (IMS)." Two brands for this requirement were found in their market research: StarWitness, and CaseCracker. Code 11 previously procured 75 StarWitness units for an interim solution while an enterprise solution was being worked; however, these units were never intended to be permanent items in the inventory for NCIS. Early in the assessment process, it was determined StarWitness did not meet the requirements for an enterprise NCIS Interview Management System. Each StarWitness camera, microphone, and server/recording is a stand-alone unit, rather than having one server to support multiple interview rooms, and would require numerous different sets of wires and several monitoring computers. The StarWitness equipment is not server based, and does not have remote viewing capability or the ability to send the interviews to a central server or cloud. **StarWitness will not install any of their devices overseas, and will not warranty their equipment overseas.** Additionally, while the Interview Management System is unclassified and is not national security sensitive in nature, the system is required to have the ability to be installed in classified spaces. **StarWitness does not utilize cleared contractors if needed for these classified spaces.**

The intent for the unclassified NCIS interview management system is that all unclassified recordings would be on the same system, and CaseCracker was deemed as the only brand that could carry out this mission-essential requirement. By utilizing CaseCracker, prosecutors will only see interviews from one system, speeding up legal processes and guaranteeing continuity of interview surveillance. Because CaseCracker can be installed overseas, NCIS agents can use CaseCracker worldwide to manage and record the interviews, assisting agents and investigators in the OCONUS realm. Additionally, CaseCracker is used by cleared contractors who have access to classified spaces. The CaseCracker system is the only IMS brand that gives NCIS field offices the mission-essential forensic

data collection equipment needed for special agents and investigators to properly collect and document witness statements.

It is critical to ensure that NCIS continues to use the CaseCracker system as it is familiar to agents across the agency and is essential for effectively carrying out investigations and crime scene documentation. Because NCIS currently utilizes the CaseCracker system and mobile units, agents are familiar with the functionality of the CaseCracker brand. The requirement to re-train all users to become experts with other IMS models or brands is time-consuming and is not financially feasible. The ability to continue to use the CaseCracker system maximizes productivity and safety across NCIS and ensures compliance with NCIS security policy.

7. Other information to support a sole source/brand name buy: N/A

TECHNICAL OR REQUIREMENTS CERTIFICATION:

I Certify That The Facts And Representations Under My Cognizance Which Are Included In This Justification, Which Form A Basis For This Justification, Are Complete And Accurate.
