

Limited Sources Justification and Approval (J&A)

Contracting Activity: AFRL/PZLET
Purchase Request / Local ID Number: 
Program / Project (and PE, if applicable): FY25 Abaqus/CAE Renewal
Program Type (PEO or Other Contracting): Other Contracting
Authority: Multiple Award Schedule Program ([FAR 8.405-6](#))
Estimated Contract Cost (including options): 
Is this a [Bridge Action](#)?

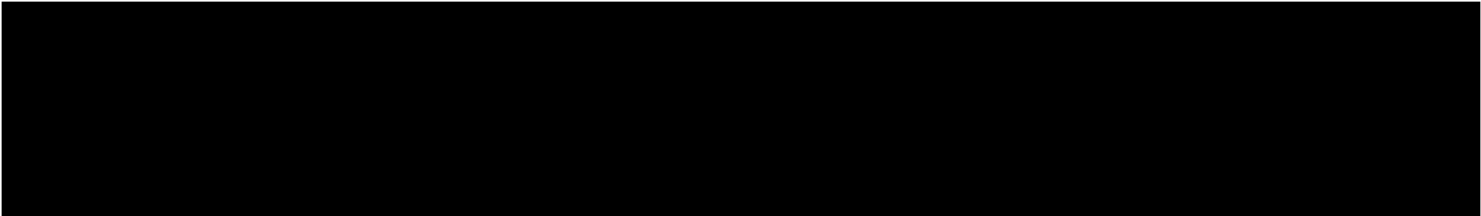

☐ Yes ☒ No

Description of Limitation:
AFRL/RXOC has a requirement for a brand name limitation to purchase ABAQUS software licenses and Analysis tokens.

COORDINATION ([DAFFARS 5306.304\(a\)](#))

APPROVAL ([DAFFARS 5306.304\(a\)](#))

Limited Sources Justification and Approval (J&A)

I. Contracting Activity.

II. Nature and/or description of the action being processed.

This is a renewal of SIMULIA software ABAQUS/CAE licenses and (41) Analysis Tokens for AFRL/RXOC. ABAQUS is essential to support the government's current modeling and simulation of materials and structures using finite elements as well as analysis capabilities for nonlinear, transient, and dynamic solids and structures.

Contract Type: FFP

Funding: [REDACTED]

Software License Activation Period: 01 May 2025 - 30 April 2026

Delivery: 7 days after receipt of order (ARO)

GWAC: GSA 2GIT BPA

III. Description of supplies/services required to meet agency needs.

The procurement of SIMULIA software (ABAQUS) licenses and maintenance is essential to support the government's current modeling and simulation of materials and structures using finite elements as well as analysis capabilities for nonlinear, transient, and dynamic solids and structures. The software must be able to organize data from AFRL machines and platforms into one location, keeping all data in sync.

See BOM for items sought.

IV. Identification of the justification/rationale for limiting sources and demonstration of the contractor's unique qualifications to provide the required supply/service.

In accordance with FAR 8.405-6(b)(1): The item is peculiar to one manufacturer. A brand name item, whether available on one or more schedule contracts, is an item peculiar to one manufacturer.

AFRL/RXOC asserts that procurement of any other brand would result in substantial duplication of cost to the Government that is not expected to be recovered through competition and unacceptable delays in fulfilling AFRL/RXOC's missions. Purchasing a potential replacement would incur a considerable additional expense, due to training and redevelopment of models and codes for a new software suite.

AFRL/RXOC believes that award to any other source would result in substantial duplication of costs to the government that cannot be recovered through competition and unacceptable delays in fulfilling AFRL/RXOC's missions. Replacement with an alternative source would cost [REDACTED] to replace the actual software licenses, [REDACTED] in training costs [REDACTED] and [REDACTED] for redevelopment of research codes and models [REDACTED] used daily in support of AFRL/RXOC. The redevelopment of the research codes would cause unacceptable delays to current research projects estimated at [REDACTED]. The inability to purchase this license renewal would limit our ability to create simulation models used for research projects.

Therefore, it is determined that ABAQUS, made by Dassault Systems, is the only known brand capable of meeting the government's requirements for this software license without the U.S. Air Force experiencing significant mission impacts and delays, as well as substantial duplication of costs that could not be recouped through competition.

Limited Sources Justification and Approval (J&A)

V. Determination by the ordering activity Contracting Officer that the order represents the best value consistent with FAR 8.404(d).

Fair and reasonable price determination will be made by the Contracting Officer and will be documented in FI 357. Prices will be compared with the government estimate based upon the results from the various tools, such as market research, historical information and the review of similar Federal Government contracts. This action will be accomplished by sole source award through the vendor's GSA 2GIT BPA, IAW DAFMAN 17-1203 2.5.1.7.2.

VI. Description of the market research conducted and the results, or explain why market research was not conducted.

Market research was conducted in March 2025 to determine potential resellers of ABAQUS software. DoD ESI was surveyed as a required source IAW DAFMAN 17-1203, but the software was unavailable through that vehicle. It was determined that ABAQUS uses a single reseller, [REDACTED] to provide the requested software via GSA. A notice of intent to award sole source was posted on the GPE, SAM.gov, and no responses were received. The authorized re-seller is below:

VII. Other facts supporting the justification.

None

VIII. Actions the agency may take to remove or overcome any barriers that led to the restricted consideration before any subsequent acquisition for the supplies or services.

To the best of the government's ability, the leading competing products available in the current market place have been evaluated prior to purchasing the solution. AFRL/RXOC will continue to monitor the market to determine if other products meet the government's needs. AFRL/RXOC will continue to conduct market research using catalogues, the internet, attend industry events, trade journal searches, market surveys and other resources to locate other solutions to meet the government's requirements.

IX. Certification by the Contracting Officer.

As evidenced by my signature above, I have determined this document to be both accurate and complete to the best of my knowledge and belief.

X. Certification by the technical/requirements personnel.

As evidenced by my (our) signature(s) above, I (we) certify that any supporting data contained herein, which is my (our) responsibility, is both accurate and complete.
