

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes ☒ No

Contracting Activity: United States Air Force (USAF), Air Force Material Command (AFMC), Air Force Life Cycle Management Center (AFLCMC), Program Executive Office (PEO) Command, Control, Communications & Battle Management (C3BM), Kessel Run (C3CK)

Project/Program Name: Cox Commercial Internet Services (Langley)

Purchase Request / Local ID Number: FA8730

Estimated Contract Cost (including Options): \$ [REDACTED]

Section B: Description of the Supplies/Services Required

The sole source contract will be to provide Commercial Internet Services (CIS) at the Ryan Center located at 22 Rickenbacker Road, Suite 10, Langley VA and 300 Exploration Way, Langley, VA. These specialized services are in support of Kessel Run's requirement to develop and deploy mission critical applications in support of the Air and Space Operations Centers (AOC) and DAF Battle Network.

Specifically, the Government requires a Commercial Internet Service Provider (CISP) to provide 1Gbps+ upload/download Internet service, with one (1) /30 IP Block, two (2) /28 IP Blocks, and one (1) Malblock, or equivalent, for fiber Internet located at the Ryan Center. The Government also requires the CIS to provide one (1) Gbps+ upload/download Internet services, with two (2) business Internet 1Gbps, two (2) static IPs, two (2) Cider Blocks, or equivalent, and two (2) business 3.1 modems, or equivalent, located at 300 Exploration Way. CIS must be delivered to the facilities via hardwired infrastructure.

The Government requires the necessary infrastructure to be installed and services available at time of contract award to avoid a gap in service and negative impact to the Government's ability to develop and deploy mission critical applications. The Government contemplates awarding a four (4) month base period to coincide with the current fiscal year and four (4) option periods of twelve (12) months in duration each.

Section C: Justification for Soliciting from a Single Source or Brand Name

Pursuant to Federal Acquisition Regulation (FAR) 13.106-1(b)(1)(i) Contracting officers may solicit from one source if the contracting officer determines that the circumstances of the contract action deem only one source reasonably available.

The incumbent, Cox Virginia Telecom, LLC (Cox) is the only CISP that provides the required infrastructure at the specified locations. AFLCMC/C3C is a tenet agency at Langley AFB and does not have authority over their existing commercial service authorization. Infrastructure can only be installed at this location after MAJCOM and DoD CIO approval. Cox has the required local commercial service authorization for this location on Langley AFB. Additionally, their specific infrastructure is approved for the Government's Authority to Operate and identified in our Counterintelligence Support Plan. Other CISP provide 5G service at the identified address, but this does not meet the minimum security requirements of our Authority to Operate.

Also of note, other CISPs at our location do not have the necessary upload/download speed required by the Government. CISPs identified in the area advertise speeds up to 400 Mbps at our location, while the Government requires 1 Gbps at a minimum.

A potential change in CISP would require approval by MAJCOM and review of the Government's ATO and Counterintelligence Support Plan. This process could take up to two years and would result in unacceptable delay of the development and deployment of applications to the AOCs in support of the DAF Battle Network. Award to another CISP would also require significant duplication of costs to install parallel infrastructure at our location. It is not anticipated that these additional costs would be recovered through competition due to the relatively small value of our requirement and significant CISP investment necessary to meet our minimum requirements.

Single Source Justification (Simplified Acquisition)

Section D: Efforts to Obtain Competition

The Government conducted market research utilizing Internet searches to identify if services were available at our specific address for CISP in the Langley AFB area. The Government also searched General Services Administration (GSA) contract vehicles which identified Internet services as part of their offerings, sam.gov and worked with the Wing Cybersecurity Chief to identify potential avenues to provide CISP to our tenet unit.

The research determined that the incumbent, Cox is the only CIS provider capable of providing the services required by the Government without any unacceptable delays or significant duplication of costs. No other CIS providers were found offering the required services at our location.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

The Government will continue to conduct market research on CISP in the Langley area to determine whether competition can occur in the future. AFLCMC/C3C will continue to work with Langley AFB and local commercial internet providers to identify new service providers that have approval to provide services at our location and work with our AO for potential consideration of new service providers in our ATO.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
