

SPECIAL NOTICE DARPA-SN-25-68

LASSO Proposers Day

EVENT DATE: 13 May 2025

REGISTRATION DEADLINE: 7 May 2025 at 12:00 PM Eastern Time (ET)

REGISTRATION WEBSITE: <https://events.sa-meetings.com/LASSOProposersDay/>

TECHNICAL POC: Steven Chambers, STO Program Manager

E-MAIL: DARPA-PS-25-07@darpa.mil

PROPOSERS DAY:

The Defense Advanced Research Projects Agency (DARPA) Strategic Technology Office will host a Proposers Day in support of DARPA-PS-25-07, the Lunar Assay via Small Satellite Orbiter (LASSO) program, on May 13th, 2025, at the Executive Conference Center Chesapeake I & II, 4075 Wilson Blvd, Suite 300, Arlington, VA from 8:00 AM to 1:00 PM ET. For those who cannot attend in person, a webinar will provide a live stream of the events at the conference center.

The purpose of this Proposers Day is to provide information on the LASSO program, promote additional discussion on this topic, address questions from potential proposers, and provide a forum for teaming opportunities. The Proposers Day will include overview presentations by DARPA personnel, other government partners and a Question & Answer (Q&A) session following the presentations. Unclassified questions and answers will be posted to SAM.gov at the conclusion of the event. The Proposers Day will be held at the Controlled Unclassified Information (CUI) level.

PROGRAM OBJECTIVE AND DESCRIPTION:

The LASSO program aims to develop technologies to support significantly increasing the United States' ability to conduct operations in support of space situational awareness by developing both autonomous satellite navigation in stressing orbital conditions and increasing satellite maneuverability through continuous dynamic repositioning based on changing conditions, with the added benefit of creating a proven reserve model for resources relevant to in-situ resource utilization on Earth's Moon.

LASSO supposes that high resolution measurements of resources across the entire lunar surface is the most compelling commercial application to drive optimized performance in propulsion system and guidance navigation and control (GNC) design. The program seeks performers to design, test, build, and deliver a spacecraft capable of determining all areas on the Moon that contain greater than 5% water concentration with a resolution of no larger than four square kilometers. LASSO is focused on developing technologies for use in lunar orbit and does not intend to use any equipment on the lunar surface.

REGISTRATION INFORMATION:

DARPA hosts Proposers Days to promote teaming arrangements between potential performers; provide information on whether and how they might respond to the government's research and development solicitations; and to increase efficiency in proposal preparation and evaluation. Therefore, Proposers Days are open only to registered potential proposers.

Those wishing to attend the Proposers Day, whether in person or via webinar, must register and submit required forms (detailed below) no later than May 5, 2025, at 12:00 PM ET, at the following website: <https://events.sa-meetings.com/LASSOProposersDay/>

Directions to the facility and other materials are also available on the website. **All** participants must register through the registration website listed above. The webinar link and further directions on webinar access will be provided to attendees once registration closes. There is no registration fee for attending this conference.

The Proposers Day will be conducted at the CUI level and is open only to U.S. persons. All attendees accessing CUI agree to protect CUI in accordance with DoD Instruction 5200.48 CONTROLLED UNCLASSIFIED INFORMATION (CUI) and NIST Special Publication 800-171 Protecting

Controlled Unclassified Information in Nonfederal Systems and Organizations. All attendees will be required to present government issued photo identification upon entry to the event.

All U.S. Citizens are required to complete and submit a U.S. citizenship verification form in order to attend this conference, available for download at the registration website.

Non-U.S. citizens, including U.S. Permanent Residents, are required to complete and submit a DARPA Form 60 “Foreign National Visit Request”, available for download at the registration website.

All foreign government personnel must additionally submit an Official Visit Request completed by their respective Embassy based in Washington, DC.

All forms must be submitted no later than 12:00 PM (ET) on May 5, 2025. Form 60 submission instructions are provided on the registration website and in the registration confirmation email. Contact your Embassy staff for assistance in submitting the Official Visit Request. Upon entry to a physical meeting, all attendees will be required to present valid, government-issued photo identification.

Due to space limitations of the conference facility, attendance will be limited to the first 136 registrants, and no more than 2 representatives per organization.

ONE-ON-ONE MEETINGS

Additionally, attendees who would like to meet individually with Steven Chambers, present company overviews, discuss their technology expertise, and/or discuss teaming opportunities in scheduled presentations at the meeting may request to do so. Presentations may contain **1 or 2 viewgraphs** and are **limited to 15 minutes each (including logistical issues)**. Proposers desiring to reserve a time to present following the Proposers Day main session should register via the Proposers Day website as soon as possible, but no later than the registration cutoff date for the Proposers Day.

A constrained number of virtual individual meetings will also be available on the following day, May 14, 2025, with the same limitations and registration requirements as indicated above.

Potential proposers may choose to distribute their contact information to all other LASSO Proposers Day attendees. The registration website will ask registrants to indicate whether they approve distribution of their contact information.

If you have any questions, please email the Special Notice Mailbox at DARPA-PS-25-07@darpa.mil

DISCLAIMERS AND IMPORTANT NOTES: The Proposers Day does not constitute a formal solicitation for proposals or proposal abstracts. Attendance is voluntary and is not a prerequisite for responding to any potential future solicitations. DARPA will not provide reimbursement for any costs incurred to participate in this Proposers Day. It is the presenter’s responsibility to ensure that all material presented at Proposers Day has been approved by the funding organization in advance. Companies are free to present, but DARPA does not sponsor the information nor is responsible for the content.
