Special Notice

Special Notice

DESCRIPTION

Special Notice

The Department of Veterans Affairs Great Lakes Acquisition Center (GLAC) in Milwaukee, WI intends to negotiate a sole source contract with Quest Diagnostics to provide Reference Laboratory Testing Services for the James A. Lovell Federal Health Care Center (FHCC).

This contract will be for a six-month base period, with no options to extend services. The period of performance for these services is 1 April 2025 through 30 September 2025. This procurement is being conducted in accordance with FAR 13.106-1(b)(2). The contract will be firm fixed price Indefinite Delivery Indefinite Quantity and the NAICS code is 621511. The purpose of this sole source contract is to provide stability and continuity of reference laboratory testing services while a solicitation for a competitive long-term contract prepared and issued. Quest Diagnostics is the only vendor whose catalog of pricing is currently entered into the system at FHCC. To input a different vendor's catalog into the systems would require substantial time and extensive additional costs. Additionally, a new vendor would be required to have a Business to Business (B2B) connection that would likely take several months to put in place. This sole source contract would provide sufficient time to competitively solicit for a long-term contract for these services.

This Notice of Intent is not a request for competitive proposals. No solicitation documents are available and telephone requests will not be honored. However, if a firm believes it can meet the requirements it must furnish information about its products, services and capabilities as well as references from other customers who are using these products and services to provide reference laboratory testing services, to the contract specialist NLT 10:00AM Central, 7 March 2025. Supporting evidence must be submitted in sufficient detail to demonstrate their pricing catalog is currently entered into the CERNER system at the FHCC facility listed in the attached draft Performance Work Statement, they possess the required B2B connection, and they provide all the services listed in the attached Performance Work Statement, including performing all of the 120 tests required. Information must be sent to Donald St. Onge via email at Donald.st.onge@va.gov. Responses received will be evaluated; however a determination by the Government to not compete the proposed procurement based upon responses to this notice is solely within the discretion of the Government. If no responses are received, the GLAC will proceed with the sole source negotiation with Quest Diagnostics.

B.3 PERFORMANCE WORK STATEMENT

Contractor shall provide all labor, supplies, equipment, maintenance, information technology, and supervision necessary to provide Reference Laboratory Testing Services to FHCC as described herein. Reference Laboratory Services include but are not limited to: specimen preparation and storage, transportation of clinical laboratory specimens, anatomic pathology specimens/paraffin blocks/glass slides, and microbiology cultures to the testing laboratories; performance of analytical testing as defined by the Contractor's reference test manual; the reporting of analytical test results within the required timeframes defined by the FHCC; specimen processors, and consultative services as required.

I. Specimen Preparation and Storage

Special Notice

- A. Contractor shall supply each Government facility with its commercial laboratory reference test manual (either hard copy or electronic) to ensure that the collection and storage of specimens are in accordance with Contractor's requirements. The FHCC will provide laboratory specimens properly prepared, identified and labeled for testing.
- B. Contractor shall provide at no additional charge an adequate supply of specimen collection materials necessary to collect and preserve specimens that are destined to the testing laboratories. These materials include those items that are dictated by and in compliance with the collection requirements of the commercial reference laboratory such as dry ice, stabilizing tablets, ice packets, etc. Contractor will be responsible for storing specimens in such a manner to ensure no loss of specimen or the integrity of the specimen during transport.
- C. Contractor may also be requested to assist with technical slide preparation for surgical pathology specimens (i.e., tissue processing, embedding, sectioning, H/E staining, special stains, and IHCs) along with other special studies (i.e. ER/PR/HER2/FISH) requiring contractor's pathologists' interpretations.
- D. The Contractor shall store the specimens a minimum of three days after the test result is reported in the event that subsequent action is necessitated (i.e. problem solving and/or repeat testing).
- E. If a medico legal specimen is submitted, the contractor shall provide its own special forms and special handling procedures to maintain a valid "chain-of-custody possession" and develop the formal documentation necessary for that purpose. Contractor's testing personnel who performed the analysis may be required to provide court testimony. Contractor testimony shall be provided as required at no additional expense to the Government.

II. Transportation Services

- A. Contractor shall provide reference laboratory testing courier services of primarily biomedical materials including patient specimens and microbiology cultures originating from the FHCC and destined to the contracted commercial reference laboratories. These items are classified as Hazard Materials Class 6, Division 6.2 and are defined in 49 CFR Part 173.134 as those materials that contain or could contain etiologic agents. Transportation shall be done in such a manner that the safety and integrity of the biomedical materials are maintained.
- B. Routine transportation services shall occur twice per day 7 days per week (Monday-Sunday) as well as federal holidays, including last minute declared holidays, from the following Government facility:

J.A. Lovell FHCC Main Campus Laboratory
Building 133CA
3001 Green Bay Rd.
North Chicago, IL 60064

Routine transportation services shall occur once per day Monday-Friday from the following Government facilities:

Red Rover Clinic Laboratory
Building 1523
1020 11th Ave
Great Lakes, IL 60088

Special Notice

Fisher Clinic Laboratory
Building 237
2410 Sampson St.
Great Lakes, IL 60088

Specimen pick-up times will be mutually agreed upon between the FHCC and the contractor after contract award.

- C. The contracted commercial reference laboratory shall be responsible for complying with the most current version of the accreditation standards as it relates to the transport of specimens to ensure that all transport personnel are properly trained and that their competency is regularly assessed in the appropriate safety, packaging, and environmental control procedures suitable to specimen type and distances transported. This also includes issues such as adherences to regulations for transport of biohazards, use of rigid containers where appropriate, temperature control, notification procedures in case of accident or spills, etc. During the term of this contract, this contractor program may need to be updated or revised to comply with regulatory requirements. This documentation should be made available to the FHCC upon their request.
- D. Contractor shall provide, at no additional cost, all necessary supplies for biomedical materials necessary to distribute, transport, and deliver specimens from the FHCC to the testing laboratories. These supplies shall include, but not limited to:
 - 1) Shipping and packaging containers and/or bags. Packing material must be capable of maintaining temperature requirements for specimens until they reach the testing laboratories.
 - 2) Required labels/stickers and packaging materials for shipping specimens via courier for testing, which are infectious or etiologic agents, in accordance with appropriate requirements of 42 CFR Part 72, 49 CFR Parts 171 and 173, and the Dangerous Goods Regulations of the International Air Transport Association (IATA) consistent with current regulatory updates.
 - 3) Preprinted test request forms with the appropriate Shipping Section details and account information.
 - 4) Test request forms for specialized testing (i.e. Cytogenetics, FISH, Immunohistochemistry Stains, Special Stains, Molecular testing, etc.).
- E. Upon each pick-up or delivery of testing specimens by the contractor, a transfer list shall be provided detailing specimen identification, source and destination information. In addition, it shall be the responsibility of the contractor to ensure that its or any subcontracted transport personnel shall comply with all policies and procedures for tracking specimens. Site-specific handling procedures will be mutually agreed upon between the FHCC and the contractor and will include, but is not limited to, documentation of dispatch and receipt of specimens, condition of specimens upon receipt, etc.
- F. **Emergency transportation services** shall be equal in quality to the routine transportation services provided, and be available 24 hours per day, seven days per week including federal holidays. The estimated number of emergency transportation services per year is one. Specimen pick-up response times for emergency transportation service requests shall be within 4 hours.

Special Notice

- G. Addressing courier service issues and problems.** A direct contact individual(s) shall be designated for immediate response to courier service issues. This contact individual(s) shall be available for emergency response within the timeframes covered in the agreed upon courier route plan and throughout extended time periods when the courier is not able to meet the agreed upon delivery times. The contact information, i.e. name(s) and telephone number(s), for these services shall be available after award.

III. Specimen Testing

- A. The contractor and/or subcontractor shall provide the full range of clinical and anatomic pathology diagnostic testing capabilities to execute all required tests as annotated in Attachment A (approximately 1692 tests). Contractor shall make available the test information below and notify the FHCC when any modifications to this information occur during the contract period.
- 1) Requisition form requirements
 - 2) Alphabetized test name list
 - 3) Contractor Test order code
 - 4) Specimen collection and preservation requirements
 - 5) Test method employed (indicate if testing performed in duplicate) and interpretations
 - 6) Test reference intervals adjusted for age, sex or race, when required
 - 7) Test specific sensitivity, specificity and interferences, when required
 - 8) Result code
 - 9) Test critical values, if any
 - 10) Policy for critical value notification
 - 11) CPT coding for test
 - 12) Contractor test turnaround times (minimum and maximum times indicated); where the turnaround time is defined as the time between receipt of specimen by the Contractor and receipt of results by the FHCC.
 - 13) Schedule of test performance (specific days of week/frequency indicated)
 - 14) Location of test performance by test name (i.e. name of primary laboratory, name of separate branch/division of primary lab, name and address of secondary (sub-contracted) laboratory must be cited)
- B. Contractor shall provide accurate, timely, and appropriate testing of patient specimens as requested by the FHCC. For most tests, the required test result turnaround time (TAT), is within 24 hours following specimen pick-up either by hard copy or electronic report transmission. It is recognized that certain test procedures will require a longer turnaround time than the 24 hours. Under these circumstances, test results shall be delivered no later than 1 hour after the verification of the test result.
- C. The FHCC has identified several tests that require strict compliance to different, faster TAT timeframes when sent from the FHCC Red Rover Laboratory. These tests and applicable TATs are identified below.

Test Name	Required Turnaround Time
Hepatitis A Ab Total	Next business day from collection date by 1330
Hepatitis B Surface Ab QN	Next business day from collection date by 1330
Measles (Rubeola) IGG	Next business day from collection date by

Special Notice

	1330
Rubella IGG	Next business day from collection date by 1330
Varicella IGG	Next business day from collection date by 1330
Mumps IGG	Next business day from collection date by 1330
Sickle Cell Screen	Next business day from collection date by 1200
Hemoglobin & Hematocrit	Next business day from collection date by 1300
G6PD Deficiency Screen	Next business day from collection date by 1000
Fasting Glucose	Next business day from collection date by 1330
B-HCG Quantitative	Next business day from collection date by 1330
ABO and Rh	Next business day from collection date by 1330
Hemoglobin A1C	Next business day from collection date by 1330
Syphilis Antibody Cascading Reflex	Two business days from collection date by 1330
Gonorrhea PCR	Two business days from collection date by 1330
Chlamydia PCR	Two business days from collection date by 1330
Urinalysis	Two business days from collection date by 1330
Urinalysis Microscopic	Two business days from collection date by 1330
Hemoglobinopathy	Two business days from collection date by 1330
Tuberculosis Test (must be 1 tube method)	Two business days from collection date by 1330

D. The FHCC has identified several tests that require strict compliance to different, faster TAT timeframes when sent from the FHCC Main Laboratory. These tests and applicable TATs are identified below.

Tissue Slide Preparation (to include tissue processing, embedding, sectioning, H&E staining, and cover-slipping). FHCC will submit grossed wet tissue that's ready for processing.	Grossed wet tissue will be available for pick-up by 2pm Monday-Friday (excluding federal holidays). H&E slides and paraffin blocks to be delivered back to FHCC by next business day, no later than 9-10am, from pick-up date.
Immunohistochemistry and Special Stains (Technical Component without Interpretation)	Not to exceed 3 business days between picking up the blocks/unstained slides for staining and delivery of the stained slides.

Special Notice

	Must be notified of all delays.
Cytology GYN and HPV with Genotype	Not to exceed 5 business days from pick-up date. Must be notified of all delays.
Urine Cultures	Not to exceed 3 business days from pick-up date and delivery date. Must be notified of all delays.

- E. All reference laboratory testing shall be executed in accordance with standard industry practices. It is preferred that test methods are FDA approved. Any non-FDA approved method being performed shall have a disclaimer and documented validation plan. Upon request, the validation plan and validation results shall be made available to the COR or designee.
- F. Contractor shall notify the COR and FHCC Laboratory personnel of any test information/methodology changes no later than two weeks prior to the implementation date of the test change. If any of these changes affect availability (i.e. discontinued) of the test, price or other information on Attachment A, the Contracting Officer shall also be notified. These changes shall be reflected via contract modification. Any increases in test price must be negotiated and/or approved by the Contracting Officer via contract modification.
- G. Additional tests may be added via contract modification. Any new test(s) not listed in Attachment A must be added to the contract through modification by the Contracting Officer (the COR and FHCC Laboratory personnel do not have this authority) prior to specimen being tested. If a test is not listed on Attachment A, it must be billed under a non-contracted account number.

IV. Specimen Retention

- A. A medico legal specimen shall be retained indefinitely. This type of specimen will be identified by the Government in writing or through telephone communication.
- B. All anatomic pathology materials (e.g., paraffin blocks, slides, or other diagnostic material) generated by the VA and sent to the Contractor laboratory for processing, staining, testing, and diagnostic evaluation shall be returned within 5 days after final diagnosis is reported. Slides and blocks sent for immunohistochemistry and special stains should be sent back the same day as the stained slides.

V. Reporting of Test Results

- A. The primary transmission of laboratory test results shall be through electronic host to host computer interface. Laboratory test results that are not interfaced must be immediately available through the Contractor's electronic web-based portal that the Government facility has access to. In unusual circumstances where electronic delivery either via interface or web-portal is not possible, the Contractor shall deliver the reports without an additional charge by expedited overnight courier shipping, mailing and/or transportation services by hand within 24 hours, or by telephone facsimile to a protected machine identified to the Contractor by the FHCC. Delivery by electronic mail i.e. MS Outlook, etc. is prohibited. Additionally, any test result that includes a pathologist interpretation must be transmitted to a dedicated fax machine at the ordering FHCC facility and when possible, available electronically via an online portal.

Special Notice

Specifications outlining the requirements of the computer system interfaces including computer hardware, maintenance and supply requirements are defined in Section B3.X., Telecommunication Requirements below.

- B. Each test report generated in printed form or through electronic transmission shall, at minimum, include the following information:
- 1) Patient's full name
 - 2) Patient's identification number, e.g. MRN (medical record number), DOB (date of birth), FIN (financial information number), and DoD ID, if specimen is collected from an active duty patient.
 - 3) Physician's name (if provided)
 - 4) FHCC medical record number or laboratory accession number (if provided)
 - 5) FHCC ordering facility name
 - 6) FHCC Account number
 - 7) Test(s) ordered
 - 8) Date/time of specimen collection (when available)
 - 9) Date/time test completed
 - 10) Test result
 - 11) Reference intervals (adjusted for age, sex or race, when appropriate)
 - 12) Toxic and therapeutic ranges (if applicable)
 - 13) Flagged abnormal results
 - 14) Reference laboratory accession number
 - 15) Name and address of testing laboratory
 - 16) Any other information the laboratory has that may indicate a questionable validity of test results.
 - 17) Specimen inadequacy (if applicable) with documentation to support its unsuitability for testing.
- C. Test results determined by the contractor to be a critical value, as well as test results determined by the Illinois Department of Public Health to be Reportable Diseases, shall be communicated by telephone to a designated FHCC contact person(s) at the originating Government laboratory facility upon verification of the critical test result. The telephonic report shall be followed by an electronic report transmission.
- D. Contractor shall provide a daily report by 1:00 p.m. listing all incomplete testing from the Red Rover TAT list that will not be resulted by the required timelines.

VI. Specimen Processors

- A. Contractor shall provide three (3) full-time equivalent Specimen Processing Technicians to the FHCC (two assigned to Red Rover and one assigned to the Main Campus) laboratories to assist with the processing of specimens, e.g. centrifuging, packaging, shipping, ordering, etc. The technicians will need access to Oracle Health (Cerner) for transfer specimen applications to build and send transfer lists for samples to the reference lab. The technician shall also be responsible for retrieving laboratory results, obtaining test information, contacting customer service to obtain results and resolve inquiries, running and reconciling incomplete test lists. The specimen processing technicians will work Monday through Friday, excluding federal holidays, from 6:00 a.m. – 2:30 p.m. for Red Rover Laboratory and 7:00 a.m. – 3:30 p.m. for the Main Campus Laboratory. Lunch breaks will be a half-hour in duration. No overtime is anticipated or approved under this contract.
- B. Contractors must have Tier 3 Favorable background investigation and cleared by FHCC

Special Notice

Informatics. Contractors must complete required training in compliance with DHA physical access and network or information security and privacy requirements.

- C. Contractor shall provide enough back-up personnel to perform services during absences of the primary Specimen Processing Technicians for any reason. Contractor shall also provide for the permanent replacement of a primary Specimen Processing Technicians, if necessary.
- D. The Contractor shall provide a full initial comprehensive orientation and training of all Specimen Processing Technicians who will work at the FHCC Main Laboratory and Red Rover. This training will encompass all policies, procedures, and software related to services provided by the contractor and utilized by the FHCC. However, in the event of a change to the procedures, method, regulation, etc., on the part of either the Government or the Contractor occurring after the initial implementation period, a mutual exchange of training/information shall be accomplished. All on-site contractor personnel must complete all security requirements prior to providing services under this contract.
- E. The Government will provide a work area to be used for administrative functions by the Contractor's employees (Specimen Processing Technicians).
- F. All contract employees performing work on a government facility shall observe and comply with all local rules and regulations prescribed by the installation and other federal authorities concerning fire, safety, sanitation, security and possession of firearms or other lethal weapons. No contract employee will be permitted on the installation when his/her presence could be detrimental to the security of the installation or safety to themselves. Specimen processors working on-site at the FHCC shall be subject to an ANACI background investigation.
- G. Contractor shall obtain all local, state and federal government licenses, passes and permits necessary to enter the government installation, to include motor vehicle registration and insurance, as required by the FHCC.
- H. The Government reserves the right to require removal from the job site any contract employee who endangers persons or property and whose continued employment is inconsistent with the interest of government security. In such cases, the Contracting Officer or COR will advise the Contractor of the reason for requesting an employee's removal or withdrawing their permit to enter the installation.
- I. The Contractor shall remove from duty any contractor employee found to be incapacitated or under the influence of alcohol or drugs, or other incapacitating agents and shall not return such an employee to duty until such employee is fully able to perform the normally assigned duties. Removal of employee(s) for such causes does not relieve the Contractor of the requirement to provide sufficient personnel to adequately perform services specified under this contract.
- J. Neither the Contractor, nor any of its employees, shall disclose or cause to be disseminated any information concerning military activity operations.
- K. Neither the Contractor, nor any of its employees, shall disclose private medical information concerning patients to third parties other than those personnel designated by the FHCC. Results shall be handled as private medical records in accordance with Privacy Act Requirements for Medical Records Systems.
- L. All inquiries, comments or complaints pertaining to patient information or government information, arising from any matter observed, experienced, or discovered as a result of, or

Special Notice

in connection with, the performance of this contract shall be directed to the COR for resolution.

VII. Customer Service

- A. Contractor shall provide toll-free telephonic customer service 24 hours per day, 7 days per week to assist Government staff with tracking and resolving related issues/problems that may arise in the performance under this contract.
- B. Upon award, contractor shall assign a local area account representative and alternate representative to provide direct and on-site support for each of the FHCC facilities. Contractor shall provide the name(s) and telephone number(s) of these representatives and other contractor employees who will address the following customer services throughout the contract performance period:

1. Telephone Inquiries – Telephone inquiries are divided into four major categories with additional subcategories defining the type of inquiry and the Government’s minimum time expectation for meeting this service.

a. Specimen Collection

- 1) Routine inquiries, questions and clarifications regarding collection requirements shall be addressed at the time of the initial call.**
- 2) Esoteric inquiries, questions and clarifications regarding collection requirements that require further research shall be addressed within ½ hour of the initial call.**

b. Testing

- 1) Inquiries regarding the status of pending results shall be addressed at the time of the initial call.**
- 2) Esoteric inquiries when information is requested regarding methodology, correlation, interferences, reflex tests, etc. shall be addressed within two business hours of the initial call.**

c. Technical Expertise

- 1) Test utilization inquiries where information is required as to the most appropriate test to be ordered shall be addressed within two business hours of initial call.**
- 2) Result interpretation inquiries shall be addressed within four business hours of initial call.**
- 3) Consultative services where information is required regarding the clinical significance of tests shall be addressed within twenty-four business hours of the initial call.**

Special Notice

- 4) The contractor shall provide names and telephone numbers of technical directors and pathologists available for consultation.
- d. Account follow-up
 - 1) Information general in nature yet specific to the account, e.g. test pricing, equipment repair, supply ordering, etc. shall be addressed within four hours of the initial call.
- C. The Contractor shall notify the originating laboratory by telephone, of specimens cancelled due to unacceptability for reasons relating to volume, specimen container, identification, loss of specimen, etc.
- D. The Government will notify contractor of the need for additional specimen collection and transportation supplies by telephone or through written or electronic methods.
- E. Contractor shall conduct timely interface testing when there is a change in test reporting and codes.

VIII. Consultative Services/Reports

- A. Contractor shall provide consultative services that are consistent with the services offered to other contracted customers without compensation. These services may include consultations by laboratory professionals or experienced physicians on test or methodology selection or test result interpretation.
- B. Upon request, contractor shall provide a statistical analysis of the FHCC facility's workload testing volumes to assist in the monitoring of ordering trends and utilization patterns and will make recommendations to the FHCC on mechanisms to reduce its costs.
- C. The following reports may be requested by FHCC and shall be delivered to the FHCC by the 20th of the month following the close of the reporting month:
 - 1) A monthly cumulative summary alphabetically by patient indicating patient's name, test ordered, date specimen received and ordering physician.
 - 2) A monthly summary sheet by test frequency for each FHCC Laboratory listing patient name, volume of tests ordered, unit charge, total charges for this month and year to date.
 - 3) A summary sheet listing the type and volume of testing sent to a subcontracted reference laboratory.
 - 4) A monthly summary sheet by dollar volume listing tests in descending order of dollar volume with volume of tests ordered, unit charge for each test, total charges for months and year to date.
 - 5) A utilization summary sheet by test frequency of both FHCC Laboratories listing all tests ordered, the volume of tests ordered, unit charge per tests, total charges and percent abnormal results for the period.
 - 6) A monthly summary sheet of all telephone notifications of specimens cancelled because of unacceptability, i.e. volume, specimen container, identification, loss of specimen, etc.

Special Notice

- D. Contractor shall provide a cumulative workload summary report of tests performed on a monthly basis. The summary must include the facility account number, the test name, the test ordering code, monthly test volume, year-to-date test volume, unit test cost, monthly test expenditures and year-to-date test expenditures. A copy of the report shall be delivered electronically to the Contracting Officer and COR by the 20th of the month following the close of the reporting month.
- E. All reports shall be submitted in an electronic spreadsheet format and have the capability to sort by four (4) different methods:
 - 1) Facility account number
 - 2) Test names listed alphabetically
 - 3) Test names listed in order of year-to-date test frequency (highest to lowest)
 - 4) Test names listed in order of year-to-date total test cost (highest to lowest)
- F. Contractor shall provide a monthly listing of any tests listed in Attachment A that are no longer performed by contractor and shall be removed from Attachment A. This listing shall include, at a minimum, contractor test name and test ordering code.
- G. The Contractor shall provide, a daily cumulative report retrievable by collection date(s) that details patient identifying demographics and the associated test results for the Red Rover Laboratory as identified in B.3.III.C. Designated government contact personnel must be notified when it's available. The daily report shall be available prior to the turnaround time deadline.**

IX. Data Management System

- A. Contractor shall provide to the FHCC and Oracle Health (Cerner) all necessary laboratory test parameters (parameters are required for each test contained in a panel) to ensure accurate test result transmission between the FHCC's and the Contractor's databases. Required test parameters are listed below.
 - 1) Ordering code
 - 2) Logical Observations Identifiers Names and Codes (LOINC) code
 - 3) CPT code(s)
 - 4) Interface code
 - 5) Test cost
 - 6) Reference ranges
 - 7) Units of measurement
 - 8) Test result interpretation or interpretive remarks, if appropriate
 - 9) Testing site (if not performed at the contractor's main laboratory facility)
 - 10) Test methodology
 - 11) Specimen types
 - 12) Specimen collection and handling requirements
 - 13) Instrument Performing test (if more than one Instrument)
 - 14) Indication whether test is a panel/profile test, list of tests included in panel/profile

If test is a panel or profile test, list the tests included (NOTE: the above parameters are required for each test contained in a panel).

The parameters for all tests in the contractor's database shall be kept current and be available to the FHCC throughout the performance period of the contract. Updates to test parameter information must be provided to FHCC and Oracle Health (Cerner) no less than 2 weeks prior to the implementation of any changes in the following situations: when new tests are developed and introduced into the contractor's test menu, testing parameters have changes or when tests are discontinued or

Special Notice

replaced by other tests. The Contractor shall provide telephone access to a technical representative to respond to any question(s) regarding the laboratory test parameter information.

B. The Contractor shall provide a data management system that meets the following requirements:

- 1) Test ordering must be accomplished through a menu that is intuitive, has minimal options and uses a mouse or touch screen. Upon selection of the test, the computer shall alert (flag) the user to the type of specimen required and the storage conditions. It must also alert the user to the location of the laboratory that will be performing the test.
- 2) Test definition, test information and test requirements must be complete, available, and easily accessible.
- 3) Accepts FHCC Oracle Health (Cerner) generated transfer lists that identify specimens sent to the contractor's testing laboratories, transportation conditions, and testing ordered.
- 4) The status and the results of testing must be available within published timeframes and easily retrievable by various methodologies. At a minimum, these options must include sort by patient name; sort by date; sort by test; and sort by incomplete test. Incomplete tests must have an indication of the pending time until completion. Alert messages, or other notifications, must be generated when testing is delayed beyond required and/or published timeframes.
- 5) FHCC must be able to print test results from the contractor's web-based portal as well as retransmitting results to post in the patient's record.

C. A test catalog shall be published on an annual basis and made available to the FHCC. Addendums/updates to the test catalog shall be made available (either electronically or in hard copy) to the FHCC. The test catalog shall include all test information as required by regulatory requirements. A reference guide to test interpretation shall also be available.

X. Telecommunication Interface Requirements

- A. The contractor shall provide an integrated system approach to facilitate and streamline all aspects of specimen testing. All reasonable effort shall be made to improve services, reduce cost to the FHCC, and implement methods that reduce or eliminate manual procedural steps such as bar-coding and specimen labeling. The contractor shall also provide a bi-directional interface system to electronically transmit orders, specimen status and test results between its computer system and the Oracle Health (Cerner) computer systems at the FHCC. All test panels and individual tests must be mapped with Oracle Health Cerner. As such, this contract will require an approved Business Partner Gateway (BPG) Interconnection Security Agreement (ISA) and Memorandum of Understanding (MOU) for interface with Oracle Health (Cerner) as well as laboratory interoperability with the laboratory information system through an approved DoD methodology on a Military Health Systems Medical network.

Special Notice

- B. Contractor shall provide, install, maintain, repair, and remove, if necessary, all required telecommunication equipment, hardware, software, and related consumable supplies to support the transmission of electronic data to the FHCC Laboratories. This may include, but is not limited to:
- 1) Any required lease communication lines
 - 2) Software to receive and send orders, status, and test results
 - 3) Shipping or Transfer list printers
 - 4) Back-up result printers connected directly to Vendor's computer system
 - 5) Consumable supplies to maintain the operation of the equipment listed above, e.g., toner, etc.
- C. Contractor is responsible for the preventive maintenance and repair of Contractor furnished hardware, software, and associated communication lines. In addition, throughout the performance period of the contract, the Contractor shall repair or replace any malfunctioning hardware or software at no additional cost to the Government.
- D. Contractor shall provide in-service training required for the routine loading and care of printers and other hardware located on-site. The training will ensure that FHCC can perform routine servicing of hardware.
- E. Contractor shall provide FHCC with specimen status in response to electronic and verbal queries. Upon testing completion, a formatted Health Level 7 (HL7) message containing specimen results with FHCC's assigned specimen identification shall be returned to the requesting FHCC Laboratory. All electronic messaging between the contractor and FHCC host computer systems shall utilize Health Level Seven (HL7) technical specifications or any later version. HL7 is a registered trademark of Health Level Seven, Inc, and is a Standards Developing Organization accredited by the American National Standards Institute to author consensus-based standards. Information regarding HL7 transmission protocols may be accessed through the Health Level Seven, Inc. web-site: www.HL7.org.
- F. In the event that electronic communication is disrupted, the vendor shall provide hard copy of specimen results upon demand. The hard copy must contain FHCC's assigned unique identification number that is associated with each individual specimen. This specimen identification number will appear on the test order form, on the specimen label and on the shipping manifest or transfer list.
- G. Contractor shall address, within two hours of initial inquiry, interface connection questions where information is required to update, maintain, and support the services of the host-to-host linkage between the FHCC and the Contractor.
- H. Interface with Oracle Health (Cerner). This connection is required for all samples sent from DOD or VA FHCC Laboratories.
- 1) Contractor shall develop and program an interface connection to electronically transmit orders, specimen status, and test results between the Contractor's host computer system and FHCC's host computer system, **Oracle Health (Cerner)**. Contractor must do Interface development work with Oracle Health (Cerner EHRM). It is preferred the contractor have a current VA nationally approved Business Partner Gateway (BPG), Interconnection Security Agreement (ISA), and a Memorandum of Understanding (MOU); but the agreements may also be established directly with the FHCC.

Special Notice

- 2) Contractor shall ensure all necessary preparations, including ability to electronically transfer data correctly, are performed for full contract services prior to contract performance/effective date.
 - a) Contract personnel needing privileged-level account for administrative/maintenance support of systems/applications on the network, will meet DoD requirements for a privileged-level account before being provided access to DoD systems (see B.5.XVI). Contractors must also undergo a successful security screening and background investigation prior to access being granted.
- I. Since the FHCC has changed to Cerner, contractor must be capable of transmitting information through Oracle Health (Cerner). Oracle Health (Cerner) is a joint VA and DoD Electronic Medical Record (EMR/EHR) System.
 - 1) Oracle Health (Cerner) will still require a connection through Reference Lab Network (RLN) to the vendor.
 - 2) Awardee will need to establish the test data bases and have the ability to fully operate on Oracle Health (Cerner).
- J. The following information shall be provided for any interface order(s) or downtime:
 1. Date and time of downtime
 2. Systems involved
 3. Expected system restoration
 4. Scope of impact
 5. Cause or Information around scope of downtime and resolution
 6. Contractor shall provide 24/7 interface and electronic order/resulting support for all equipment and software.
 7. Contractor shall provide a mechanism to retransmit results after any interface communication error or downtime.

XI. Test Database Build & Validation

- A. Contractor must have test database validated upon award of contract. There is no time to create a new test database during this bridge contract.

B.4 SPECIAL CONTRACT REQUIREMENTS

I. Services

- A. The services specified herein may be changed by written modification to this contract. The VA Contracting Officer will prepare the modification (reference FAR clause 52.212-4(c) Changes) and, prior to becoming effective, must be signed by both parties. Only the Contracting Officer is authorized to make commitments or issue changes that affect price, quantity, or quality of performance of this contract. In the event the Contractor effects any such change at the direction of any person other than the Contracting Officer, the change shall be considered unauthorized and no

Special Notice

adjustment will be made in the contract price to cover any increase in costs incurred as a result thereof.

- B. The Government will not sign any separate agreements from the contractor for equipment, web-tools, or specimen processors that will be utilized in the performance of this contract.
- C. This is a non-personal services contract as defined in FAR 37.101. There is no employer-employee relationship between the Government and the contractor or the contractor's employees. Contractor personnel are not subject to the supervision and control of a Government officer or employee. Rather, contractor personnel perform their duties in accordance with the Performance Work Statement. Supervisory functions such as hiring, firing, directing, and counseling of contractor personnel are not performed by the Government. Personnel who furnish services under this contract are subject to Government technical oversight of the services rendered. The Government retains the right to reject services for contractual non-performance.
- D. The Government may evaluate the quality of professional and administrative services provided, but retains no control over the medical, professional aspects of services rendered.
- E. Contractor is required to maintain medical liability insurance for the duration of this contract. Medical Liability insurance must cover the provider(s) for services in all states where services are rendered by the provider. Contractor must indemnify the Government for any liability producing act or omission by the contractor, its employees and agents occurring during contract performance.
- F. Contractor shall, in writing, keep the Contracting Officer informed of any unusual circumstances in conjunction with the contract.
- G. Contractor shall not, under any circumstances, furnish laboratory reports directly to patients.

II. Period of Performance: 4/1/2025 – 9/30/2026

III. Federal Holidays

Contractor is required to provide transportation of specimens from the main campus on Federal Holidays, twice per holiday, to include last minute declared holidays.

IV. Qualifications/Requirements of Laboratory & Contractor Personnel

A. Laboratory

- 1) The contractor must be actively engaged in providing the specific services and laboratory testing identified herein. Contractor must have at least three years of experience in providing laboratory testing services and must have at least one-year experience in transporting biomedical materials.
- 2) Offerors, including subcontractor(s), must continuously hold a Certificate of Compliance or Certificate of Accreditation from the Centers for Medicare & Medicaid Services as meeting the requirements of the Clinical Laboratory Improvement Amendments of 1988 or must demonstrate accreditation by a regulatory agency(s) with deemed status from the Centers for Medicare & Medicaid Services, e.g. The College of American Pathologists, and/or other state regulatory agencies, as appropriate, and as mandated by federal and state statutes. The testing laboratories must maintain valid certifications during the entire performance period of this contract.

Special Notice

- 3) Copies of all relevant permits/licenses and certifications inclusive of any sanctions current or pending throughout the United States of America must be supplied in response to this solicitation. In addition, as these documents are reissued or re-awarded, the awarded Contractor must supply a copy to the CO and COR. The above documents must also be supplied for each testing laboratory that is a subcontractor of the primary contractor.
- 4) Contractor must notify immediately the COR in writing, upon its/any subcontractor's loss of any required certification, accreditation or licensure.
- 5) Contractor shall maintain safety and health standards consistent with the requirements set forth by the Occupational, Health, and Safety Administration (OSHA), and the Center for Disease Control (CDC) and Prevention.
- 6) The Government reserves the right to physically inspect the testing laboratories prior to a contract award and at any time during the contract period to ensure the testing laboratory's compliance with accreditation and quality assurance practices and requirements. The Government will not be liable for any expenses incurred by the contractor as a result of these inspections.
- 7) Contractors requiring a privileged-level account for administrative/maintenance support of systems/applications on the network, will meet DHA requirements for a privileged-level account before being provided access.

B. Personnel

- 1) Contractor shall ensure all testing and supervisory personnel at all contractor-owned, affiliate, or subcontracted laboratories assigned to work under this contract meet and maintain the applicable personnel qualifications set forth under the Clinical Laboratory Improvement Amendments (CLIA) of 1988 regulations.
- 2) Contractor shall ensure its employees have the ability to perform the applicable duties consistent with their license and certification.
- 3) Personnel assigned by the contractor to perform the services covered by this contract shall be proficient in written and spoken English (38 USC 7402).
- 4) Contractor shall comply with any new regulatory requirements for mandatory education and/or competency assessment, which occur during the contract period. These items must be completed by the individual contractor employee(s) within a mutually agreed upon timeframe between the FHCC and the Contractor.
- 5) Contractor couriers entering any Government facility must be attired in a contractor-issued uniform that bears the name of the Contractor's company. In addition, all contractor representatives shall prominently display a contractor-issued identification badge.
- 6) Specimen Processing / Data Entry Technician(s) personnel, who will be working on-site at the MTFs, will initiate and complete base-access requirements, per local procedure, which includes, but is not limited to, initiating a background check, obtaining a CAC Card, and completing required online training.

I. HHS/OIG

Special Notice

To ensure that the individuals providing services under the Contract have not engaged in fraud or abuse regarding Sections 1128 and 1128A of the Social Security Act regarding federal health care programs, the contractor is required to check the Health and Human Services - Office of Inspector General (HHS/OIG), List of Excluded Individuals/Entities on the OIG Website (<https://exclusions.oig.hhs.gov/>) for each person providing services under this contract. Any healthcare provider or entity that employs or enters into contracts with excluded individuals or entities may have a Civil Monetary Penalty (CMP) imposed against them. By signing the proposal, the Contractor is certifying that all persons listed in the contractor's proposal have been compared against the OIG list and are NOT listed as of the date the proposal was signed.

II. Record Keeping – Contractor

Contractor must establish a record keeping system of all tests performed per regulatory guidelines.

III. Medical Records

Clinical or other medical records (i.e. test results) of FHCC veteran patients treated by Contractor under this contract are owned by the FHCC. If requested, test results will be mailed to the FHCC at no additional cost. Mail shall be sent in accordance with VA Directive 6609, Mailing of Sensitive Personal Information. If a subpoena or court order is received for the production of a medical record/test result, the contractor shall notify the Contracting Officer that a subpoena or court order was received.

IV. Confidentiality of Patient Records

A. The Contractor is a FHCC contractor and will assist in the provision of health care to patients seeking such care from or through FHCC. As such, the Contractor is considered as being part of the department health care activity. Contractor is considered to be a FHCC contractor for purposes of the Privacy Act, Title 5 U.S.C. 552a. Further, for the purpose of FHCC records access and patient confidentiality, Contractor is considered to be a FHCC contractor for the following provisions: Title 38 U.S.C. 5701, 5705, and 7332. Therefore, contractor may have access, as would other appropriate components of FHCC, to patient medical records including patient treatment records pertaining to drug and alcohol abuse, HIV, and sickle cell anemia, to the extent necessary to perform its contractual responsibilities. However, like other components of the department, and notwithstanding any other provisions of the contract, the contractor is restricted from making disclosures of FHCC records, or information contained in such records, to which it may have access, except to the extent that explicit disclosure authority from FHCC has been received or disclosure is required by law. The contractor is subject to the same penalties and liabilities for unauthorized disclosures of such records as FHCC.

B. The records referred to above shall be and remain the property of FHCC and shall not be removed or transferred from FHCC except in accordance with 5 U.S.C.552a (Privacy Act), 38 U.S.C. 5701 (Confidentiality of claimants records), 5 U.S.C. 552 (FOIA), 38 U.S.C. 5705 (Confidentiality of Medical Quality Assurance Records) 38 U.S.C. 7332 (Confidentiality of certain medical records) and federal laws, rules and regulations. Subject to applicable federal confidentiality or privacy laws, the Contractor, or its designated representatives, and designated representatives of federal regulatory agencies having jurisdiction over Contractor, may have access to FHCC's records, at FHCC's place of business on request during normal business hours, to inspect and review and make copies of such records.

V. HIPAA Compliance

Contractor must adhere to the provisions of Public Law 104-191, Health Insurance Portability and Accountability Act (HIPAA) of 1996 and the National Standards to Protect the Privacy and Security of Protected Health Information (PHI). As required by HIPAA, the Department of Health and Human Services (HHS) has promulgated rules governing the security and use and disclosure of protected health

Special Notice

information by covered entities, including the FHCC. The FHCC has recognized Diagnostic Laboratory Testing Facilities as healthcare providers, and that the PHI is being disclosed and/or used for treatment. Therefore, no BAA is required for Reference Laboratory Testing Services.

VI. Regulatory Standard

All work under this contract shall be performed in accordance with all regulatory requirements for laboratory services such as those set forth by the Clinical Laboratory Improvement Amendments of 1988 (CLIA), as well as all other applicable laws and regulations.

As the FHCC is a hospital setting, it is subject to inspections and accreditation by The Joint Commission. Contractor shall be aware of all laboratory standards required by The Joint Commission and, in the absence of a contradictory standard from another entity such as CLIA, all work under this contract shall be performed in accordance with those standards. A copy of these standards may be obtained from The Joint Commission, One Renaissance Blvd., Oakbrook Terrace, IL 60181.

VII. Designation of Contract Representative

The FHCC Pathology & Laboratory Medicine (PALM) Regional Laboratory Manager will be designated as the COR to represent the Contracting Officer in furnishing guidance and advice regarding the work being performed under this contract. The COR will provide technical guidance, verify services were actually performed, and also verify that documentation for services performed is received prior to certifying payment. The foregoing is not to be construed as authorization to interpret or furnish advice and information to the Contractor relative to the financial or legal aspects of the contract. Enforcement of these segments is vested in and is the responsibility of the Contracting Officer. The extent and limitations of the COR designation are provided in the COR Delegation Memo.

VIII. Contract Performance Monitoring

- A. For specimen pickup, contract employees shall report to the Designated pick-up areas upon arrival at the Main Campus or Branch Clinics for the pickups. There is also a separate designated pick-up area for the Anatomic Pathology (AP) specimens at the Main Campus.
- B. Monitoring of contractor's performance shall be demonstrated through clinical and administrative record reviews. The COR will be responsible for verifying contract compliance and may designate other FHCC personnel to monitor services through one or a combination of the following mechanisms:
 - 1) Departments being served will monitor Contractor performance to ensure that services called for in the contract have been received by FHCC in a timely manner. Any incidents of Contractor noncompliance as evidenced by the monitoring procedures will be forwarded immediately to the Contracting Officer.
 - 2) Documentation of services performed will be reviewed prior to certifying payment. FHCC will pay only for services provided, and in strict accordance with the Price Schedule/Attachment A. Contract monitoring and recordkeeping procedures shall be sufficient to ensure proper payment and allow audit verification that services were provided. The COR must provide written approval for payment of all invoices.

Special Notice

- 3) Departments being served, through the COR, will provide a written statement annually to the Contracting Officer to include a summary of Contractor actions and a statement that all requirements of the contract have been fulfilled as agreed. This summary evaluation should be submitted 45 days prior to end of completion of a one-year period (annually), or any option period.

C. Contractor's employees may not review/certify invoices for payment.

IX. Quality Assurance Monitoring

- A. Contractor shall maintain a Quality Assurance Program related to the Reference Laboratory Testing Services covered under this contract.
- B. Contractor shall also participate in a joint quality assurance surveillance program (QASP) with the FHCC Laboratories. This program must minimally address the quality aspects representative to the testing process, i.e. pre-analytical, analytical and post-analytical variables and include a description of monitoring and evaluation activities. There must be a mutually agreed upon procedure for responding to issues, problems and/or concerns identified by the Government with details as to whom and in what timeframe the matters will be reconciled. The issues that may need to be addressed may be general in nature or specific to an incident or event. The contractor will meet or communicate with the facility/FHCC staff for process review and improvement of contract performance on an as needed basis.**
- C. Copies of licensure/certifications are also required to be submitted upon request by the FHCC.
- D. Quality factors that FHCC may consider when monitoring quality of care may include, but are not limited to, patient medical records, security/privacy, adverse event reporting (such as missing or losing a specimen), turnaround times, timeliness to customer service requests, missed/delayed routes, emergency pick-up response times, etc.
- E. These monitoring procedures and disincentives for contractor's failure in meeting these tasks are further illustrated in the Performance Requirements Summary Matrix below.

PERFORMANCE OBJECTIVE TASKS	PERFORMANCE STANDARD	ACCEPTABLE (MINIMAL) QUALITY LEVEL (AQL)	MONITORING METHOD/ FREQUENCY
Ensure the safety and integrity of specimens	No loss of specimen or specimen integrity IAW PWS B.3.I.B.	98% of the time	Contractor reporting; Government inquiries.
Testing services will	Results will be reported within 24 hours of specimen	95% of the time.	100% inspection of 6 of the 125

Special Notice

be performed in accordance with the defined turnaround times (TAT)	pickup, or within the 1 hour after test result verification IAW PWS B.3.III.B.		highest volume test codes randomly selected per quarter
	Results will be reported within the TAT listed in that Table at PWS B.3.III.C. and B.3.III.D.	98% of the time.	Contractor reporting; Government inquiries.
Emergency Response Pick-up Time is within the required timeframes	Contractor responds within 4 hours after request for pickup IAW PWS B.3.II.F.	98% of the time	Direct Observation

X. Prohibition of Contract Performance Outside of the United States

The entire performance of the contract shall be within the borders of the United States of America, the District of Columbia and/or Puerto Rico. The Contractor shall not access any FHCC data/information (for example, by remote computer access) from locations that are outside the above-stated borders. Furthermore, the Contractor shall not send, transfer, mail or otherwise transmit any FHCC data/information to locations outside the above-stated borders.

XI. Contractor Certification

- A. Citizenship-Related requirements: The Contractor certifies that the Contractor shall comply with any and all legal provisions contained in the Immigration and Nationality Act of 1965, As Amended; its related laws and regulations that are enforced by Homeland Security, Immigration and Customs Enforcement and the U.S. Department of Labor as these may relate to non-immigrant foreign nationals working under contract or subcontract for the Contractor while providing services to the FHCC patient referrals.
- B. While performing services for the FHCC, the Contractor shall not knowingly employ, contract or subcontract with an illegal alien; foreign national non-immigrant who is in violation their status, as a result of their failure to maintain or comply with the terms and conditions of their admission into the United States. Additionally, the Contractor is required to comply with all “E-Verify” requirements consistent with “Executive Order 12989” and any related pertinent Amendments, as well as applicable Federal Acquisition Regulations.
- C. If the Contractor fails to comply with any requirements outlined in the preceding paragraphs or its Agency regulations, the FHCC may, at its discretion, require that the foreign national who failed to maintain their legal status in the United States or otherwise failed to comply with the requirements of the laws administered by Homeland Security, Immigration and Customs Enforcement and the U.S. Department of Labor, shall be prohibited from working at the Contractor’s place of business that services FHCC patient referrals; or other place where the Contractor provides services to veterans

Special Notice

who have been referred by the FHCC; and shall form the basis for termination of this contract for breach.

- D. This certification concerns a matter within the jurisdiction of an agency of the United States and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under 18 U.S.C. 1001.
- E. The Contractor agrees to obtain a similar certification from its subcontractors. The certification shall be made as part of the offerors' response to the RFP using the subject attachment in Section D of the solicitation document.

XII. Required Registration with Contractor Performance Assessment System (CPARS)

- A. As prescribed in Federal Acquisition Regulation (FAR) Part 42.15, FHCC evaluates contractor past performance on all contracts that exceed the thresholds outlined in FAR Part 42.15 and shares those evaluations with other Federal Government contract specialists and procurement officials. The FAR requires that the contractor be provided an opportunity to comment on past performance evaluations prior to the posting of each report. To fulfill this requirement FHCC uses an online database, the Contractor Performance Assessment Reporting System (CPARS).
- B. Each contractor whose contract award is estimated to exceed the thresholds outlined in FAR Part 42.15 is required to provide to the contracting officer contact information for the contractor's representative with their response to the solicitation. The contractor is responsible to notify the contracting officer of any change to the contractor's representative during the contract performance period. Contractor's representative contact information consists of a name and email address.
- C. The Government will register the contract within thirty days after contract award. For contracts with a period of one year or less, the contracting officer will perform a single evaluation when the contract is complete. For contracts exceeding one year, the contracting officer will evaluate the contractor's performance annually. Intermediate reports will be filed each year until the last year of the contract, when the final report will be completed. Each report shall be forwarded in CPARS to the contractor's designated representative for comment. The contractor's representative will have thirty days to submit any comments and return the report to the VA contracting officer. Failure by the contractor to respond within those thirty days will result in the Government's evaluation being placed on file in CPARS without contractor's comments.

[End of Special Contract Requirements]

B.5 CONTRACT SECURITY REQUIREMENTS

I. General

Contractors, contractor personnel, subcontractors, and subcontractor personnel shall be subject to the same Federal laws, regulations, standards, and VA Directives and Handbooks as FHCC and FHCC personnel regarding information and information system security.

II. FHCC Contractor Personnel Security Requirements

Failure to comply with the contractor personnel security requirements may result in termination of the contract for default.

Special Notice

Contractor and its subcontractors shall have a current process in place for conducting employee screening/background checks as a condition of employment with the contractor or subcontractor. Contractor shall also provide a certification memo indicating that all its employees and subcontractor employees having access to VA and DOD sensitive information (i.e. laboratory technicians and/or technologists, administrative personnel) during the performance of this contract have successfully passed through this process to their standards. The certification memo shall be provided to the Contracting Officer and COR on an annual basis (employee screening/background checks are not required to be re-conducted annually).

All personnel who require access to the Department of Veterans Affairs' or Department of Defense computer systems at FHCC or have access to FHCC sensitive information shall be the subject of a background investigation. The FHCC obtains the Background Investigation through the Electronic Questionnaires for Investigations Process (e-QIP). Upon receiving a request for the investigation from the Contracting Officer, the contractor's employee will be initiated into e-QIP for the Background Investigation followed by an e-mail with instructions to log into e-QIP. Contract employee shall complete all application requirements within 5 days of receipt of e-QIP email. A contractor's employee shall not commence working at the FHCC under contract until the Contracting Officer receives notification from the FHCC Office of Security and Law Enforcement that the contract employee's application was received complete. A favorable adjudication from the VA Office of Security and Law Enforcement must be received in order for a contractor employee to continue contract performance.

A. Position Sensitivity - The position sensitivity has been designated as Low Risk. The positions under this contract are designated as Non-Critical Sensitive (NCS).

B. Background Investigation - The level of background investigation commensurate with the required level of access at FHCC is Access National Agency Check with Written Inquiries (ANACI).

C. Contractor Responsibilities

1) The contractor shall bear the expense of obtaining background investigations. If the Office of Personnel Management (OPM) conducts the investigation, the contractor shall reimburse the FHCC within 30 days. If timely payment is not made within 30 days from date of bill for collection, then the FHCC shall deduct the cost incurred from the contractor's 1st month's invoice(s) for services rendered.

2) It is imperative for the contractor to provide, at the request of the FHCC, a listing of contractor personnel performing services under the contract in order for the background investigation process to commence. This list will include name (first, middle, last) social security number; date of birth; city, state, and country of birth.

3) The contractor or their employees shall submit a complete background investigation packet through the Electronic Questionnaires for Investigations Process (e-QIP). Additional guidance and information will be provided through e-mail from the VA Office of Security and Law Enforcement.

The following required forms must be submitted through the e-QIP system to the VA Office of Security and Law Enforcement **before** contract performance begins:

- (i) e-QIP Signature Pages (two) (print, sign and submit)
- (ii) Optional Form 306, Declaration for Federal Employment
- (iii) Electronic Fingerprint Form (FD 258) or electronic fingerprints

Special Notice

(iv) VA Form 0710 Release of Information

Fingerprinting is required with the background investigation. Fingerprinting can be done at the FHCC or a local VA facility. The Electronic Fingerprint Verification Form must be submitted with the above required forms.

4) The Contractor shall inform the contract employee that when filling out the application, there should be no gaps in employment history. Any gaps in employment history may result in OPM rejecting the documentation for investigation and delay contract performance.

5) The contractor, when notified of an unfavorable determination by the Government, shall withdraw the employee from consideration from working under the contract, and at the request of the FHCC, submit another employee for consideration.

6) The contractor may utilize a private investigating agency if such agency possesses an OPM and Defense Security Service certification. A Cage Code number must be provided to the VA Office of Security and Law Enforcement. VA Office of Security and Law Enforcement will verify the information and advise the contracting officer whether contractor's access to the computer systems can be authorized.

7) All contract employees and subcontractors are required to complete VA's Privacy training annually. All contract employees and subcontractors requiring access to VA/DoD computer network are required to complete Cyber Security training courses annually either on-line or hard copy. Documented proof must be provided to the Contracting Officer and COR.

8) The contractor will notify the COR immediately when contract employee(s) no longer require access to FHCC computer systems.

D. Government Responsibilities

1) The contracting officer will request the contractor employee's background investigation by the Office of Security and Law Enforcement.

2) The VA Office of Security and Law Enforcement will notify the contractor with instructions for the contractor's employees, coordinate the background investigations, and notify the contracting officer and contractor of the results of the investigations.

3) The FHCC will pay for requested investigations in advance. A bill for collection will be sent to the contractor to reimburse the FHCC. The contractor will reimburse the FHCC within 30 days. If timely payment is not made within 30 days from date of bill for collection, then the FHCC shall deduct the cost incurred from the contractor's 1st month's invoice(s) for services rendered.

4) The current fee associated with ANACI background investigations is **\$682.00**.

III. REQUIREMENTS FOR REMOTE ACCESS

The contractor may be allowed remote access to FHCC computer systems in the performance of the contract. FHCC has stringent policies and procedures covering remote computer access; therefore, the following responsibilities are outlined below.

A. FHCC Responsibilities

Special Notice

- 1) FHCC will provide secure and reliable remote access to systems, applications, and information on the VA network to the contractor.
- 2) FHCC will provide firewall and antiviral software with updates to the contractor.
- 3) FHCC will provide security training to contractor's current employees and new employees as needed.
- 4) After contract award, FHCC reserves the right to inspect contractor's facilities, installations, operations, documentation, records and databases.

B. Contractor Responsibilities

- 1) Contractor will ensure adequate LAN/Internet, data, information, and system security in accordance with FHCC standard operating procedures and contract terms and conditions.
- 2) Contractor shall install FHCC provided firewall and antiviral software on all networks and/or individual computers accessing FHCC networks. The Contractor is responsible for the installation and testing of all required patches to ensure the security of the system.
- 3) All remote connections to FHCC networks must be approved to use Office of Cyber and Information Security (OCIS) authorized configurations and access points. Contractor's remote access sessions through the Internet or other networks must be conducted using FHCC's remote access Virtual Private Network (VPN) service.
- 4) Contractor will notify the assigned Information Security Officer and Contracting Officer immediately when their employee(s) no longer require access to FHCC computer systems.
- 5) Contractor will not publish or disclose in any manner details of any safeguards either designed or developed by the Contractor and/or subcontractors under this contract or otherwise provided by the FHCC without prior written approval by the Contracting Officer and the assigned Information Systems Security Officer (ISSO).
- 6) Contractor will require that employees sign FHCC National Rules of Behavior and VPN Rules of Behavior, follow FHCC guidelines. Contractor's own information technology and compliance programs require employees to create strong passwords, do not divulge or share access codes or passwords, safeguard all sensitive information, and follow all Contractor information security and privacy requirements.
- 7) The Contractor will notify the Contracting Officer in writing of any subcontractors performing work under this contract that will require remote access to FHCC computer systems. Contractors will be held responsible for their subcontractors. All subcontractors will be required to follow the same FHCC computer requirements as the prime contractor.
- 8) The Contractor will adhere to the remote access requirements, and ensure that systems are properly configured, and appropriate security mechanisms and monitoring devices are up to date with best practices and technical standards.
- 9) Contractor will report any security violations, suspected or attempted violations, and any unanticipated threats or hazards immediately to the assigned ISSO, CO, and the COR.

IV. SECURITY TRAINING

Special Notice

A. Due to the increased emphasis on privacy and information security, the following special contract requirements are established and hereby made part of the contract entered into with the Department of Veterans Affairs for the FHCC. All contractor employees and subcontractor employees requiring access to FHCC information and FHCC information systems shall complete the following before being granted to FHCC information and its systems.

1) Privacy Training: Contractor and their sub-contractors assigned work under the contract are required to receive annual training on patient privacy as established by HIPAA statutes. Training must meet VA, DOD and the Department of Health and Human Services Standards for Privacy of Individually identifiable health information. Contractor shall provide certification to the FHCC upon request that all employees assigned work and/or having access to Protected Health Information have received annual training.

2) Rules of Behavior or Automated Information Systems: Contractor personnel having access to FHCC Information Systems are required to read and acknowledge understanding of the responsibilities for compliance with the Contractor Rules of Behavior by signing the Contractor Rules of Behavior statement, which outlines rules of behavior related to FHCC Automated Information Systems.

3) FHCC Information Security Awareness Training: Each on-site contract specimen processor assigned work under the contract is required to receive and document completion of FHCC training on Information Security. Contractor shall provide documented proof to the COR prior to access being granted, and yearly after that, for all contractor employees servicing a FHCC contract.

B. Information on fulfilling the training requirements as stated in paragraphs 1-3 can be found at the VA Talent Management System (TMS) at <https://www.tms.va.gov/SecureAuth35/>. Once there, follow the steps to create an account, launch the mandatory training, and complete the content. The training will provide information regarding privacy, information security, rules of behavior, and other pertinent topics relevant to your work at the FHCC. If you experience any difficulty creating an account or completing the mandatory content, contact the VA MSE Help Desk at 1.888.501.4917 or via email at VAMSEHelp@gpworldwide.com.

C. Department of Defense Cybersecurity Awareness Training: Each on-site contract specimen processor assigned work under the contract is required to receive and document completion of Cybersecurity Training. The current training version of this training can be found at:

https://public.cyber.mil/cyber-training/training-catalog/?training_topics=cybersecurity-awareness-cybersecurity-training-eta.

D. Contractor shall provide documented proof to the assigned COR prior to access being granted and yearly after that, for all contractor employees servicing a FHCC contract. Failure to complete the mandatory training and sign the Rules of Behavior annually, within the timeframe required, is grounds for suspension or termination of all physical or electronic access privileges and removal from work on the contract until such time as the training is completed and documents are provided.

Special Notice

E. As FHCC routinely reviews and updates policies and procedures covering security, requirements may change during the term of this contract and new policies and procedures may be implemented unilaterally during the term of this contract.

V. ACCESS TO FHCC INFORMATION AND FHCC INFORMATION SYSTEMS

A. A contractor/subcontractor shall request logical (technical) or physical access to FHCC information and FHCC information systems for their employees, subcontractors, and affiliates only to the extent necessary to perform the services specified in the contract, agreement, or task order.

B. All contractors, subcontractors, and third-party servicers and associates working with FHCC information are subject to the same investigative requirements as those of FHCC appointees or employees who have access to the same types of information. The level and process of background security investigations for contractors must be in accordance with VA Directive and Handbook 0710, *Personnel Suitability and Security Program*. The Office for Operations, Security, and Preparedness is responsible for these policies and procedures.

C. Contract personnel who require access to national security programs must have a valid security clearance. National Industrial Security Program (NISP) was established by Executive Order 12829 to ensure that cleared U.S. defense industry contract personnel safeguard the classified information in their possession while performing work on contracts, programs, bids, or research and development efforts. The Department of Veterans Affairs does not have a Memorandum of Agreement with Defense Security Service (DSS). Verification of a Security Clearance must be processed through the Special Security Officer located in the Planning and National Security Service within the Office of Operations, Security, and Preparedness.

D. Custom software development and outsourced operations must be located in the U.S. to the maximum extent practical. If such services are proposed to be performed abroad and are not disallowed by other FHCC policy or mandates, the contractor/subcontractor must state where all non-U.S. services are provided and detail a security plan, deemed to be acceptable by FHCC, specifically to address mitigation of the resulting problems of communication, control, data protection, and so forth.

E. The contractor or subcontractor must notify the Contracting Officer immediately when an employee working on a FHCC system or with access to FHCC information is reassigned or leaves the contractor or subcontractor's employ. The Contracting Officer must also be notified immediately by the contractor or subcontractor prior to an unfriendly termination.

VI. COMPUTER SECURITY

A. FHCC may provide contractor and subcontractor, if any, with access to FHCC automated patient records and general files maintained on FHCC computer systems. Contractor, contractor's employees, and contractor's subcontractors (if any) shall maintain, access, release, and otherwise manage the information contained in the automated patient record and general file system in accordance with all federal laws governing that information, including federal laws applicable to federal agency records. Contractor shall take reasonable safeguards, both physical and electronic, to safeguard the information and prevent unauthorized disclosures. Contractor, contractor's employees, and contractor's subcontractors (if any) shall follow all VA policies governing access to, release of, and management of the information maintained in the automated system. Contractor shall take steps to ensure that its employees and subcontractors (if any) are bound by this requirement and subject to adverse action, up to and including termination of the relationship with contractor, for failure to follow these requirements and that its employees and subcontractors, if any, meet the same requirements as FHCC employees for access to information contained in the automated record system. Contractor will utilize computers that are

Special Notice

consistent with FHCC requirements and upgrade its computers if instructed to do so by FHCC in order to ensure compatibility with the FHCC system.

B. In performing this agreement, Contractor shall be considered a part of FHCC for purposes of 5 U.S.C. §552a, 38 U.S.C. §§5701 and 7332. Contractor's employees and agents may have access to patient medical records and general files to the extent necessary to perform this contract. Notwithstanding any other provision of this agreement, Contractor and/or its employees may not disclose information contained in general files and patient records and or other individually identified patient information, including information and records generated by the Contractor in performance of this contract, except pursuant to explicit instructions from the FHCC. For the purposes of this paragraph, instruction to disclose may be provided by these officials only: Contracting Officer, Contracting Officer's Representative, the Release of Information supervisor, or FHCC attorneys.

C. Records created by Contractor in the course of performing this agreement are the property of the FHCC and shall not be accessed, released, transferred, or destroyed except in accordance with applicable federal law, regulations, and policy. Access to data will be limited to the minimum necessary for performance of the contract. Contractor will take steps to ensure that access is limited to those employees who need access to the data to perform the contract. Contractor will not copy information contained in the system, either by printing to paper or by copying to another digital format, without the express permission of one of the officials listed in paragraph (b), above, except as is necessary to make single copies in the ordinary course of providing patient care. If possible, Contractor will not commingle the data from the system with information from other sources. Contractor shall report any unauthorized disclosure of FHCC information to the officials listed in paragraph (b).

D. If this agreement is terminated for any reason, contractor will provide the FHCC with all individually-identified FHCC patient treatment records or other information in its possession, as well as any copies made pursuant to paragraph (c), above within seven (7) days of the termination of the agreement.

E. Certain information available from the database and other records created by the contractor under this Contract are medical quality assurance records protected by 38 U.S.C. §5705; it's implementing regulations at 38 U.S.C. §§17.500-511; and VHA Directive 98-016,4.b.(1)(d), 4.6(2)(c) and 4.6(4). These records may be disclosed only as authorized by 38 U.S.C. §5705 and the VA regulations. Disclosure of these records in violation of §5705 is a criminal offense under 38 U.S.C. §5705(e).

F. Contractor shall follow all FHCC policies regarding the retention of records. In the alternative, contractor may deliver the records to FHCC for retention.

G. Any changes in the law or regulations governing the information covered by this contract during the term of this contract shall be deemed to be incorporated into this contract. Contractor shall educate its employees and subcontractors, if any, of the requirements of this section and shall advise its employees and subcontractors, if any, of any changes as they occur. On contractor's request, FHCC will provide trainers who can educate contractor's employees and subcontractors, if any, of their obligations under this section.

H. Contractor shall make its internal policies and practices regarding the safeguarding of medical and/or electronic information available to federal agencies with enforcement authority over the maintenance of those records upon request.

VII. FHCC INFORMATION CUSTODIAL LANGUAGE

A. Information made available to the contractor or subcontractor by FHCC for the performance or administration of this contract or information developed by the contractor/subcontractor in performance or administration of the contract shall be used only for those purposes and shall

Special Notice

not be used in any other way without the prior written agreement of the FHCC. This clause expressly limits the contractor/subcontractor's rights to use data as described in Rights in Data - General, FAR 52.227-14(d) (1).

B. FHCC information should not be co-mingled, if possible, with any other data on the contractors/subcontractor's information systems or media storage systems in order to ensure FHCC requirements related to data protection and media sanitization can be met. If co-mingling must be allowed to meet the requirements of the business need, the contractor must ensure that FHCC's information is returned to the FHCC or destroyed in accordance with FHCC's sanitization requirements. FHCC reserves the right to conduct on-site inspections of contractor and subcontractor IT resources to ensure data security controls, separation of data and job duties, and destruction/media sanitization procedures are in compliance with FHCC directive requirements.

C. Prior to termination or completion of this contract, contractor/subcontractor must not destroy information received from FHCC or gathered/created by the contractor in the course of performing this contract without prior written approval by the FHCC. Any data destruction done on behalf of FHCC by a contractor/subcontractor must be done in accordance with National Archives and Records Administration (NARA) requirements as outlined in VA Directive 6300, Records and Information Management and its Handbook 6300.1 Records Management Procedures, applicable VA Records Control Schedules, and VA Handbook 6500.1, Electronic Media Sanitization. Self-certification by the contractor that the data destruction requirements above have been met must be sent to the VA Contracting Officer within 30 days of termination of the contract.

D. The contractor/subcontractor must receive, gather, store, back up, maintain, use, disclose and dispose of FHCC information only in compliance with the terms of the contract and applicable Federal and FHCC information confidentiality and security laws, regulations and policies. If Federal or FHCC information confidentiality and security laws, regulations and policies become applicable to the FHCC information or information systems after execution of the contract, or if NIST issues or updates applicable FIPS or Special Publications (SP) after execution of this contract, the parties agree to negotiate in good faith to implement the information confidentiality and security laws, regulations and policies in this contract.

E. The contractor/subcontractor shall not make copies of FHCC information except as authorized and necessary to perform the terms of the agreement or to preserve electronic information stored on contractor/subcontractor electronic storage media for restoration in case any electronic equipment or data used by the contractor/subcontractor needs to be restored to an operating state. If copies are made for restoration purposes, after the restoration is complete, the copies must be appropriately destroyed.

F. If FHCC determines that the contractor has violated any of the information confidentiality, privacy, and security provisions of the contract, it shall be sufficient grounds for FHCC to withhold payment to the contractor or third party or terminate the contract for default or terminate for cause under Federal Acquisition Regulation (FAR) part 12.

G. If FHCC contract is terminated for cause, the associated BAA must also be terminated and appropriate actions taken in accordance with VHA Handbook 1600.01, Business Associate Agreements. Absent an agreement to use or disclose protected health information, there is no business associate relationship.

H. The contractor/subcontractor must store, transport, or transmit FHCC sensitive information in an encrypted form, using FHCC-approved encryption tools that are, at a minimum, FIPS 140-2 validated.

Special Notice

I. The contractor/subcontractor's firewall and Web services security controls, if applicable, shall meet or exceed FHCC's minimum requirements. FHCC Configuration Guidelines are available upon request.

J. Except for uses and disclosures of FHCC information authorized by this contract for performance of the contract, the contractor/subcontractor may use and disclose FHCC information only in two other situations: (i) in response to a qualifying order of a court of competent jurisdiction, or (ii) with FHCC's prior written approval. The contractor/subcontractor must refer all requests for, demands for production of, or inquiries about, FHCC information and information systems to the VA contracting officer for response.

K. Notwithstanding the provision above, the contractor/subcontractor shall not release FHCC records protected by Title 38 U.S.C. 5705, confidentiality of medical quality assurance records and/or Title 38 U.S.C. 7332, confidentiality of certain health records pertaining to drug addiction, sickle cell anemia, alcoholism or alcohol abuse, or infection with human immunodeficiency virus. If the contractor/subcontractor is in receipt of a court order or other requests for the above-mentioned information, that contractor/subcontractor shall immediately refer such court orders or other requests to the VA contracting officer for response.

L. For service that involves the storage, generating, transmitting, or exchanging of FHCC sensitive information but does not require C&A or an MOU-ISA for system interconnection, the contractor/subcontractor must complete a Contractor Security Control Assessment (CSCA) on a yearly basis and provide it to the COR and ISSO.

VIII. FHCC SENSITIVE INFORMATION & DATA SECURITY REQUIREMENTS

A. If the contract authorizes release of FHCC sensitive information to a contractor outside the FHCC on-site protected environment: Paper, plastic or other similar based media containing FHCC sensitive data that is not returned to the FHCC will be properly disposed of by the contractor by methods such as shredders with no larger than 1/8 inch width cuts and then cross cut. This media will be destroyed such that information may not be retrieved. Media with small print, such as microfilm will be completely destroyed such as to render the information unrecoverable.

B. The contractor will take due diligence to make sure that FHCC sensitive information and data that is viewed, faxed or similarly transmitted, or discussed verbally is protected from unapproved disclosure.

C. The following statement shall be included on all fax cover sheets: "This fax is intended only for use of the person or office to which it is addressed and may contain information that is privileged, confidential, or protected by law. All other are hereby notified that the receipt of this fax does not waive any applicable privilege or exemption for disclosure and that any dissemination, distribution, or copying of this communication is prohibited. If you have received this fax in error, please notify this office immediately at the telephone number listed above."

D. FHCC sensitive information and data may not be transmitted across the Internet unencrypted (including email and instant messaging) and must be protected by (VA-VPN) VA Virtual Private Network or FHCC approved encryption process (Example: PKI - Public Key Infrastructure).

E. FHCC sensitive information may not reside on non-FHCC systems or devices unless specifically designated and approved as appropriate for the terms of the contract. All systems that store or process FHCC data will be protected with FHCC approved encryption (FIPS 140-2 compliant).

Special Notice

F. Any security violations or suspected violations shall be immediately reported to the VA Contracting Officer and the FHCC Information Security Officer.

IX. INFORMATION SYSTEM DESIGN AND DEVELOPMENT

A. Information systems that are designed or developed for or on behalf of FHCC at non-FHCC facilities shall comply with all VA and DoD – Defense Health Agency directives developed in accordance with FISMA, HIPAA, NIST, and related FHCC security and privacy control requirements for Federal information systems. This includes standards for the protection of electronic PHI, outlined in 45 C.F.R. Part 164, Subpart C, information and system security categorization level designations in accordance with FIPS 199 and FIPS 200 with implementation of all baseline security controls commensurate with the FIPS 199 system security categorization (reference Appendix D of VA Handbook 6500, VA Information Security Program). During the development cycle a Privacy Impact Assessment (PIA) must be completed, provided to the COR, and approved by the FHCC Privacy Service in accordance with Directive 6507, VA Privacy Impact Assessment.

B. To the extent applicable to the connectivity implemented through the engagement, the contractor/subcontractor shall certify to the COR that applications are fully functional and operate correctly as intended on systems using the VA Federal Desktop Core Configuration (FDCC), and the common security configuration guidelines provided by NIST or the FHCC. This includes Internet Explorer configured to operate on Windows 10 and Vista (in Protected Mode on Vista) and future versions, as required.

C. The standard installation, operation, maintenance, updating, and patching of software shall not alter the configuration settings from the FHCC approved and FDCC configuration. Information technology staff must also use the Windows Installer Service for installation to the default "program files" directory and silently install and uninstall.

D. Applications designed for normal end users shall run in the standard user context without elevated system administration privileges.

E. For information systems that are designed or developed for or on behalf of FHCC, the security controls must be designed, developed, approved by FHCC, and implemented in accordance with the provisions of FHCC security system development life cycle as outlined in NIST Special Publication 800-37, Guide for Applying the Risk Management Framework to Federal Information Systems, VA Handbook 6500, Information Security Program and VA Handbook 6500.5, Incorporating Security and Privacy in System Development Lifecycle.

F. The vendor shall ensure the security of all procured or developed systems and technologies, including their subcomponents (hereinafter referred to as "Systems"), throughout the life of this contract and any extension, warranty, or maintenance periods. This includes, but is not limited to workarounds, patches, hotfixes, upgrades, and any physical components (hereafter referred to as Security Fixes) which may be necessary to fix all security vulnerabilities published or known to the vendor anywhere in the Systems, including Operating Systems and firmware. The vendor shall ensure that Security Fixes shall not negatively impact the Systems.

G. The vendor shall notify FHCC within 24 hours of the discovery or disclosure of successful exploits of the vulnerability which can compromise the security of the Systems (including the confidentiality or integrity of its data and operations, or the availability of the system). Such issues shall be remediated as quickly as is practical, but in no event longer than 2 days.

H. When the Security Fixes involve installing third party patches (such as Microsoft OS patches or Adobe Acrobat), to the extent possible, the vendor will provide written notice to the FHCC

Special Notice

that the patch has been validated as not affecting the Systems within 10 working days. When the vendor is responsible for operations or maintenance of the Systems, to the extent possible, they shall apply the Security Fixes within 2 days.

I. All other vulnerabilities shall be remediated as specified in this paragraph in a timely manner based on risk, but within 60 days of discovery or disclosure. Exceptions to this paragraph (e.g. for the convenience of FHCC) shall only be granted with approval of the contracting officer and the VA Assistant Secretary for Office of Information and Technology.

X. INFORMATION SYSTEM HOSTING, OPERATION, MAINTENANCE, OR USE

A. For information systems that are hosted, operated, maintained, or used on behalf of FHCC at non-FHCC facilities, contractors/subcontractors are fully responsible and accountable for ensuring compliance with all HIPAA, Privacy Act, FISMA, NIST, FIPS, and VA security and privacy directives and handbooks as applicable. This includes conducting compliant risk assessments, routine vulnerability scanning, system patching and change management procedures, and the completion of an acceptable contingency plan for each system. The contractor's security control procedures must be equivalent, to those procedures used to secure FHCC systems. All external Internet connections to FHCC's network involving FHCC information must be reviewed and approved by FHCC prior to implementation.

B. Adequate security controls for collecting, processing, transmitting, and storing of Personally Identifiable Information (PII), as determined by the FHCC Privacy Service, must be in place, tested, and approved by FHCC prior to hosting, operation, maintenance, or use of the information system, or systems by or on behalf of FHCC.

C. Outsourcing (contractor facility, contractor equipment or contractor staff) of systems or network operations, telecommunications services, or other managed services requires certification and accreditation (authorization) (C&A) of the contractor's systems in accordance with VA Handbook 6500.3, Certification and Accreditation and/or the VA OCS Certification Program Office. Government- owned (government facility or government equipment) contractor-operated systems, third party or business partner networks require memorandums of understanding and interconnection agreements (MOU-ISA) which detail what data types are shared, who has access, and the appropriate level of security controls for all systems connected to FHCC networks.

D. The contractor/subcontractor's system must adhere to all FISMA, FIPS, and NIST standards related to the annual FISMA security controls assessment and review and update the PIA. Any deficiencies noted during this assessment must be provided to the VA contracting officer and the ISO for entry into VA's POA&M management process. The contractor/subcontractor must use VA's POA&M process to document planned remedial actions to address any deficiencies in information security policies, procedures, and practices, and the completion of those activities. Security deficiencies must be corrected within the timeframes approved by the government. Contractor/subcontractor procedures are subject to periodic, unannounced assessments by FHCC officials, including the VA Office of Inspector General. The physical security aspects associated with contractor/subcontractor activities must also be subject to such assessments. If major changes to the system occur that may affect the privacy or security of the data or the system, the C&A of the system may need to be reviewed, retested and re-authorized per VA Handbook 6500.3. This may require reviewing and updating all of the documentation (PIA, System Security Plan, Contingency Plan). The Certification Program Office can provide guidance on whether a new C&A would be necessary.

E. The contractor/subcontractor must conduct an annual self-assessment on all systems and outsourced services as required. An electronic copy of the assessment must be provided to the COR. The government reserves the right to conduct such an assessment using government

Special Notice

personnel or another contractor/subcontractor. The contractor/subcontractor must take appropriate and timely action (this can be specified in the contract) to correct or mitigate any weaknesses discovered during such testing, generally at no additional cost.

F. FHCC prohibits the installation and use of personally-owned or contractor/ subcontractor-owned equipment or software on FHCC's network. If non-FHCC owned equipment must be used to fulfill the requirements of a contract, it must be stated in the service agreement, SOW or contract. All of the security controls required for government furnished equipment (GFE) must be utilized in approved other equipment (OE) and must be funded by the owner of the equipment. All remote systems must be equipped with, and use, a FHCC-approved antivirus (AV) software and a personal (host-based or enclave based) firewall that is configured with a FHCC-approved configuration. Software must be kept current, including all critical updates and patches. Owners of approved OE are responsible for providing and maintaining the anti-viral software and the firewall on the non-FHCC owned OE.

G. All electronic storage media used on non-FHCC leased or non-FHCC owned IT equipment that is used to store, process, or access FHCC information must be handled in adherence with VA Handbook 6500.1, Electronic Media Sanitization upon: (i) completion or termination of the contract or (ii) disposal or return of the IT equipment by the contractor/subcontractor or any person acting on behalf of the contractor/subcontractor, whichever is earlier. Media (hard drives, optical disks, CDs, back-up tapes, etc.) used by the contractors/ subcontractors that contain FHCC information must be returned to the FHCC for sanitization or destruction or the contractor/subcontractor must self-certify that the media has been disposed of per 6500.1 requirements. This must be completed within 30 days of termination of the contract.

H. Bio-Medical devices and other equipment or systems containing media (hard drives, optical disks, etc.) with FHCC sensitive information must not be returned to the vendor at the end of lease, for trade-in, or other purposes. The options are:

- 1) Vendor must accept the system without the drive;
- 2) FHCC's initial medical device purchase includes a spare drive which must be installed in place of the original drive at time of turn-in; or
- 3) FHCC must reimburse the company for media at a reasonable open market replacement cost at time of purchase.
- 4) Due to the highly specialized and sometimes proprietary hardware and software associated with medical equipment/systems, if it is not possible for the FHCC to retain the hard drive, then;
 - a. The equipment vendor must have an existing BAA if the device being traded in has sensitive information stored on it and hard drive(s) from the system are being returned physically intact; and
 - b. Any fixed hard drive on the device must be non-destructively sanitized to the greatest extent possible without negatively impacting system operation. Selective clearing down to patient data folder level is recommended using FHCC approved and validated overwriting technologies/methods/tools. Applicable media sanitization specifications need to be pre-approved and described in the purchase order or contract.
 - c. A statement needs to be signed by the Director (System Owner) that states that the drive could not be removed and that (a) and (b) controls above are in place and completed. The ISO needs to maintain the documentation.

Special Notice

XI. SECURITY INCIDENT INVESTIGATION

A. The term "security incident" means an event that has, or could have, resulted in unauthorized access to, loss or damage to FHCC assets, or sensitive information, or an action that breaches FHCC security procedures. The contractor/subcontractor shall immediately notify the COR and simultaneously, the designated ISSO and Privacy Officer for the contract of any known or suspected security/privacy incidents, or any unauthorized disclosure of sensitive information, including that contained in system(s) to which the contractor/subcontractor has access. Further, Contractor may provide a quarterly report of suspected security/privacy incidents as a follow-up to the immediate notification.

B. To the extent known by the contractor/subcontractor, the contractor/subcontractor's notice to FHCC shall identify the information involved, the circumstances surrounding the incident (including to whom, how, when, and where the FHCC information or assets were placed at risk or compromised), and any other information that the contractor/subcontractor considers relevant.

C. With respect to unsecured protected health information, the business associate is deemed to have discovered a data breach when the business associate knew or should have known of a breach of such information. Upon discovery, the business associate must notify the covered entity of the breach. Notifications need to be made in accordance with the executed business associate agreement.

D. In instances of theft or break-in or other criminal activity, the contractor/subcontractor must concurrently report the incident to the appropriate law enforcement entity (or entities) of jurisdiction, including the VA OIG and Security and Law Enforcement. The contractor, its employees, and its subcontractors and their employees shall cooperate with FHCC and any law enforcement authority responsible for the investigation and prosecution of any possible criminal law violation(s) associated with any incident. The contractor/subcontractor shall cooperate with FHCC in any civil litigation to recover FHCC information, obtain monetary or other compensation from a third party for damages arising from any incident, or obtain injunctive relief against any third party arising from, or related to, the incident.

XII. LIQUIDATED DAMAGES FOR DATA BREACH

A. Consistent with the requirements of 38 U.S.C. §5725, a contract may require access to sensitive personal information. If so, the contractor is liable to VA for liquidated damages in the event of a data breach or privacy incident involving any SPI the contractor/subcontractor processes or maintains under this contract. However, it is the policy of the VA to forgo collection of liquidated damages in the event the contractor provides payment of actual damages in an amount determined to be adequate by the agency.

B. The contractor/subcontractor shall provide notice to FHCC of a "security incident" as set forth in the Security Incident Investigation section above. Upon such notification, FHCC must secure from a non-Department entity or the VA Office of Inspector General an independent risk analysis of the data breach to determine the level of risk associated with the data breach for the potential misuse of any sensitive personal information involved in the data breach. The term 'data breach' means the loss, theft, or other unauthorized access, or any access other than that incidental to the scope of employment, to data containing sensitive personal information, in electronic or printed form, that results in the potential compromise of the confidentiality or integrity of the data. Contractor shall fully cooperate with the entity performing the risk analysis. Failure to cooperate may be deemed a material breach and grounds for contract termination.

Special Notice

C. Each risk analysis shall address all relevant information concerning the data breach, including the following:

- 1) Nature of the event (loss, theft, unauthorized access);
- 2) Description of the event, including:
 - a) date of occurrence;
 - b) data elements involved, including any PII, such as full name, social security number, date of birth, home address, account number, disability code;
- 3) Number of individuals affected or potentially affected;
- 4) Names of individuals or groups affected or potentially affected;
- 5) Ease of logical data access to the lost, stolen or improperly accessed data in light of the degree of protection for the data, e.g., unencrypted, plain text;
- 6) Amount of time the data has been out of contractor control;
- 7) The likelihood that the sensitive personal information will or has been compromised (made accessible to and usable by unauthorized persons);
- 8) Known misuses of data containing sensitive personal information, if any;
- 9) Assessment of the potential harm to the affected individuals;
- 10) Data breach analysis as outlined in 6500.2 Handbook, Management of Security and Privacy Incidents, as appropriate; and
- 11) Whether credit protection services may assist record subjects in avoiding or mitigating the results of identity theft based on the sensitive personal information that may have been compromised.

D. Based on the determinations of the independent risk analysis, the contractor shall be responsible for paying to the FHCC liquidated damages in the amount of **\$37.50** per affected individual to cover the cost of providing credit protection services to affected individuals consisting of the following:

- 1) Notification;
- 2) One year of credit monitoring services consisting of automatic daily monitoring of at least 3 relevant credit bureau reports;
- 3) Data breach analysis;
- 4) Fraud resolution services, including writing dispute letters, initiating fraud alerts and credit freezes, to assist affected individuals to bring matters to resolution;
- 5) One year of identity theft insurance with \$20,000.00 coverage at \$0 deductible; and
- 6) Necessary legal expenses the subjects of SPI data breach may incur to repair falsified or damaged credit records are not included in the liquidated damages, which the Contractor should anticipate as among the costs of doing business and should consider it in developing its price estimate.

XIII. SECURITY CONTROLS COMPLIANCE TESTING

Special Notice

On a periodic basis, FHCC, including the Office of Inspector General, reserves the right to evaluate any or all of the security controls and privacy practices implemented by the contractor under the clauses contained within the contract. Within 10 working-days, at the request of the government, and on a date acceptable to both parties, the contractor must fully cooperate and assist in a government-sponsored security controls assessment at each location wherein FHCC information is processed or stored, or information systems are developed, operated, maintained, or used on behalf of FHCC, including those initiated by the Office of Inspector General. The government may conduct a security control assessment on shorter notice (to include unannounced assessments) as determined by FHCC in the event of a security incident or at any other time.

XIV. RECORDS MANAGEMENT

- A. Contractor shall treat all deliverables under the contract as the property of the U.S. Government for which the Government Agency shall have unlimited rights to use, dispose of, or disclose such data contained therein as it determines to be in the public interest.
- B. Contractor shall not create or maintain any records that are not specifically tied to or authorized by the contract using Government IT equipment and/or Government records.
- C. Contractor shall not retain, use, sell, or disseminate copies of any deliverable that contains information covered by the Privacy Act of 1974 or that which is generally protected by the Freedom of Information Act.
- D. Contractor shall not create or maintain any records containing any Government Agency records that are not specifically tied to or authorized by the contract.
- E. The Government Agency owns the rights to all data/records produced as part of this contract.
- F. The Government Agency owns the rights to all electronic information (electronic data, electronic information systems, electronic databases, etc.) and all supporting documentation created as part of this contract. Contractor must deliver sufficient technical documentation with all data deliverables to permit the agency to use the data.
- G. Contractor agrees to comply with Federal and Agency records management policies, including those policies associated with the safeguarding of records covered by the Privacy Act of 1974. These policies include the preservation of all records created or received regardless of format [paper, electronic, etc.] or mode of transmission [e-mail, fax, etc.] or state of completion [draft, final, etc.].
- H. No disposition of documents will be allowed without the prior written consent of the Contracting Officer. The Agency and its contractors are responsible for preventing the alienation or unauthorized destruction of records, including all forms of mutilation. Willful and unlawful destruction, damage or alienation of Federal records is subject to the fines and penalties imposed by 18 U.S.C. 2701. Records may not be removed from the legal custody of the Agency or destroyed without regard to the provisions of the agency records schedules.
- I. Contractor is required to obtain the Contracting Officer's approval prior to engaging in any contractual relationship (sub-contractor) in support of this contract requiring the disclosure of information, documentary material and/or records generated under, or relating to, this contract. The

Special Notice

Contractor (and any sub-contractor) is required to abide by Government and Agency guidance for protecting sensitive and proprietary information.

XV. DOD SYSTEM SECURITY REQUIREMENTS

- A. Contractor must meet FHCC Standards for any Medical Devices connected to the FHCC systems.
- B. Contractor agrees to comply with security regulations and guidance listed in Section B.5.XX.
- C. Government will provide templates of all requested technical documentation no later than 14 days from Date of Award. The Contractor shall remit all requested technical documents to the FHCC no later than 45 days from the Date of Award.
- D. Contractor shall provide a Point of Contact (POC) responsible for the cybersecurity of the contractor device or system, throughout the performance of the contract. Contractor shall provide Subject Matter Experts (SMEs) to support all assessments of contracted products and materials.
- E. Contractor shall obtain a recommendation of a full Authorization to Operate (ATO) from a Government-appointed third-party validator within twelve (12) months of contract award for technologies processed through an Assessment & Authorization (A&A).
- F. Contractor shall, after issuance of an ATO, ensure that the contractor's device or system maintains its ATO approval on its operating system platform and patches/updates for the life of the contract.
- G. The contractor shall establish appropriate administrative and technical safeguards to ensure the confidentiality, integrity, and availability of Government data under their control.
- H. The contractor shall notify the FHCC COR and CO in writing with any inability to comply with FHCC security requirements. Contractor will provide anticipated costs and timelines required to address any vulnerabilities in question.

XVI. PRIVILEGED USER TRAINING AND CERTIFICATION REQUIREMENTS

- A. If a contractor requires a Business-To-Business (B2B), access, etc. to government networks to maintain or analyze their system they must adhere to the following requirements.

- 1) The Contractor shall submit to the Government, sections of the B2B Gateway Questionnaire.

- 2) *Information Assurance Contractor Training and Certification.* Contractors requiring a privileged-level account for administrative/maintenance support of systems/applications on the DOD network will meet DOD requirements for a privileged-level account before being granted a network account. Requirements include:

- a) Two-Factor Authentication. Contractors will authenticate using two-factor authentication.

- The only method for authenticating is the Common Access Card (CAC).

- b) IA Training as required.

Special Notice

B. All Contractor systems that communicate with DoD systems shall interconnect through the established MHS Virtual Private Network (VPN) Business to Business (B2B) gateway. For all Web applications, contractors shall connect to a DISA-established Web Demilitarize Zone (DMZ). **Approval of the conditional ATO must be completed within three (3) months of contract award.** Access to website systems should comply with DoD complexity guidelines for password access.

C. Contractor shall follow DoD 6025.18-R, DoD Health Information Privacy Regulation.

D. Contractor shall connect to the B2B gateway via a Contractor furnished Internet Service Provider (ISP) connection. Contractor shall assume all responsibility for establishing and maintaining their connectivity to the B2B gateway. The contractor shall acquire and maintain the circuit to the B2B gateway and acquire a Virtual Private Network (VPN) device compatible with the MHS VPN device.

E. Contractor shall comply with FHCC guidance regarding allowable ports, protocols and risk mitigation strategies and will provide, maintain and configure VPN concentrator that complies with DoD security standards.

F. All costs for VPN hardware and software shall be incurred by the Contractor.

G. Contractor shall initiate, maintain, and document personnel security investigations appropriate to the Business Associate Representative's responsibilities and required access to FHCC Sensitive Information (SI) as determined by the site Chief Information Officer.

H. The Contractor shall validate that systems authenticate users through the use of the Common Access Card (CAC) or CAC alternative as a part of a two-factor authentication mechanism on the business partner side of the VPN. The Contractor shall also identify the exact location from which remote operational control will take place from, the encryption that will be used, and how the vendor's technical users will maintain secure logon.

I. The Contractor shall provide all required information to support and initiate the Laboratory Information Management System accreditation efforts to remain compliant with all current accreditation needs and efforts. This shall include system-specific information presented in the style designated by current DoD regulations and policies.

J. The Contractor shall provide information for the Risk Assessment to the Government for all networking IT applicability.

XVII. ASSESSMENT AND AUTHORIZATION (A&A)

A. Contractor shall provide hardware/software lists, architecture drawings, and workflow drawings within 10 business days after contract award. The contractor shall submit all other RMF-required documentation for review and approval, no later than forty-five (45) days after receipt of the templates provided by the Government.

B. Contractor shall obtain approval from the Government for any contractor-developed RMF policies, plans, and procedures, prior to implementation.

C. Contractor shall provide any additional documentation required by the Government for completion of the A&A process within thirty (30) business days of a request by the Government.

D. Contractor shall provide technical scans within one (1) month of the A&A kickoff meeting.

Special Notice

E. Contractor shall provide updated technical scans on a monthly basis, on the 10th day of each month until an ATO is granted.

F. Contractor shall ensure that their device or system supports the use of approved intrusion detection and prevention, antivirus, and anti-malware applications that are approved at the time of the ATO. The contractor shall provide technical specifications that clearly demonstrate whether the proposed solution can integrate and support either the full security suite or the individual components (e.g. DLP, IPS, Antivirus, etc.) without performance degradation of the contractor device or system. In cases where the operation of security applications are not technically achievable, the contractor shall provide detailed justification and a POA&M describing steps towards compliance with this requirement.

G. The contractor shall ensure that the device or system is configured in such a way that allows the updating of malware definition signatures on a scheduled basis. Scanning shall encompass the entire system (file system, operating system, and real-time processes) by default. In cases where scanning of the entire system may negatively affect its operation, the contractor shall provide a detailed list of exclusions with justifications.

XVIII. CYBERSECURITY REQUIREMENTS

A. *Reauthorization in accordance with DoD RMF requirements:* Per DoDI 8510.01, Enclosure 6, para 2.f.(6).(a), "In accordance with Appendix III of OMB Circular A-130, systems must be reassessed and reauthorized every 3 years or as a result of a system update that negatively affects the security posture (whichever is less)." Program Offices or appropriate logistics organizations plan for this activity. The results of an annual cybersecurity review or a negative change to the system or environment at any time (i.e., a change increasing the residual risk) may result in a need for reauthorization prior to the regular three-year reauthorization.

B. The contractor shall maintain all systems provided pursuant to this contract, to include the supported operating system, by issuing patches/updates to mitigate vulnerabilities [e.g., Information Assurance Vulnerability Alerts (IAVA) or Information Assurance Vulnerability Bulletins (IAVB)] and network security configurations [e.g., Defense Information System Agency (DISA) Security Technical Implementation Guides (STIGs)]. The contractor must adhere to FHCC guidance for remediation or mitigation of vulnerabilities associated with the system.

XIX. CONTINUOUS RISK MANAGEMENT

A. In a testing environment, the contractor shall be able to duplicate all fielded equipment/product that falls under the accreditation boundary. The contractor shall ensure that all fielded devices or systems, falling under one authorization, is tested to maintain the ATO for the life of the contract.

B. Contractor shall update all ATO or approved systems required supporting documentation in the event of a system policy, procedural, logical or technical changes to the system or device.

C. The contractor shall maintain the authorized security configuration and notify the government within forty-eight (48) hours of any major changes for review. A major upgrade such as major software or hardware revision must be reassessed for ATO or addition to the approved products list. Contractor shall support reauthorizations due to major upgrades.

Special Notice

D. Contractor shall ensure the contractor's device or system is in compliance with the Department of Defense (DoD) Information Assurance Vulnerability Management (IAVM) program upon each deployment.

E. Contractor shall ensure any new deployment (including rebuilds) deploys with a fully-patched, accredited version.

F. Contractor shall maintain the system or device and update to comply with updated STIGs made available by the Government within three (3) months of notification by the Government.

G. Contractor shall provide vulnerability and configuration scan results to the Government on a monthly basis. The contractor shall provide raw scan results and administrative reports no later than the 10th calendar day of each month.

H. Contractor shall disclose all discovered vulnerabilities within three (3) months of discovery, or provide a POA&M describing how they will work to close the vulnerability.

I. The contractor shall submit to the Government for approval, all mitigation plans that addresses any open vulnerabilities.

J. The contractor shall review all required policies, plans, and procedures documentation on an annual basis and submit changes to the Government for approval.

K. The contractor shall use the Government-approved method for remote access administration (DISA B2B) of the system or device.
