

FMT PL Past Performance Relevancy Matrix

The Government will use the following matrix as a guide to assess how your past performance is relevant to the Technical and Program Management Factors for maintenance training systems. Maintenance training systems includes desktop Diagnostic Troubleshooting Trainers (DTTs), Part Task Trainers (PTTs) and Hands-On Trainers (HOTs) for Federal agencies and commercial customers. Specifically describe and compare the type of work and scope of effort (including number of sites and trainers and Period of Performance). Note: It is not the Government's intent to analyze or associate any dollar values to the contract references provided in terms of defining magnitude of effort.

Relevancy	Description	Magnitude	Factor 1: Technical COMPLEXITY/SCOPE	Factor 2: Program Management COMPLEXITY/SCOPE
Very Relevant	Present/Past performance effort involved essentially the same scope and magnitude of effort and complexities this solicitation requires.	Period of Performance for each referenced project is greater than 2 years	1) Contractor has performed and managed system engineering and configuration management processes, and hardware and software design and development on military or commercial maintenance training systems. 2) The scope of the contractor's experience encompasses both desktop virtual training systems and physical fidelity hands-on training systems.	1) Contractor has managed a military maintenance training system or commercial maintenance training system program that includes all of the following: Program Management, Risk Management, and Quality Assurance. 2) The scope of the contractor's experience encompasses both desktop virtual training systems and physical fidelity hands-on training systems.
Relevant	Present/Past performance effort involved similar scope and magnitude of effort and complexities this solicitation requires.	Period of Performance for each referenced project is greater than 1.5 years	1) Contractor has performed and managed system engineering and configuration management processes, and hardware and software design and development on military or commercial training systems. 2) The scope of the contractor's experience encompasses either desktop virtual training systems or physical fidelity hands-on training systems, or both.	1) Contractor has managed a military or commercial training system program to include all of the following: Program Management, Risk Management, and Quality Assurance. 2) The scope of the contractor's experience encompasses either desktop virtual training systems or physical fidelity hands-on training systems, or both.

Relevancy	Description	Magnitude	Factor 1: Technical COMPLEXITY/SCOPE	Factor 2: Program Management COMPLEXITY/SCOPE
Somewhat Relevant	Present/Past performance effort involved some of the scope and magnitude of effort and complexities this solicitation requires.	Period of Performance for each referenced project is greater than 1 year	1) Contractor has performed and managed system engineering and configuration management processes, or hardware design and development, or software design and development on military or commercial training systems, or on other military systems or applications (non-training). 2) The scope of the contractor's experience encompasses desktop virtual training systems, physical fidelity hands-on training systems, non-training software applications, or non-training hardware/software integrated systems.	1) Contractor has managed a training system program (or other military system or application) to include all of the following: Program Management, Risk Management, and Quality Assurance. 2) The scope of the contractor's experience encompasses either software applications or hardware/software integrated systems.
Not Relevant	Present/Past performance effort involved little or none of the scope and magnitude of effort and complexities this solicitation requires.	Period of Performance for any referenced project is less than 1 year	Contractor has performed little to no training system development, upgrades or modifications, and little to no experience with design and development of other military systems or applications.	Contractor has performed little to no Program Management, Risk Management and Quality Assurance functions.

PAST EXPERIENCE CHECKLIST - TECHNICAL			
RELEVANCY	ENGINEERING	DOMAIN	SYSTEM TYPES
Very Relevant	• System Engineering and Configuration Management Processes • Hardware Design & Development • Software Design & Development (ALL OF THE ABOVE)	• Military Maintenance Training • Commercial Maintenance Training (EITHER OF THE ABOVE)	• Desktop Virtual Training Systems • Physical Hands-On Training Systems (BOTH OF THE ABOVE)
Relevant	• System Engineering and Configuration Management Processes • Hardware Design & Development • Software Design & Development (ALL OF THE ABOVE)	• Military Training • Commercial Training (EITHER OF THE ABOVE)	• Desktop Virtual Training Systems • Physical Hands-On Training Systems (EITHER OF THE ABOVE)

Somewhat Relevant	• System Engineering and Configuration Management Processes • Hardware Design & Development • Software Design & Development (ONE OF THE ABOVE)	• Military Training • Commercial Training • Military Non-training Software applications • Military Non-training Software/Hardware Integrated Systems (ONE OF THE ABOVE)	• Desktop Virtual Training Systems • Physical Hands-On Training Systems • Military Non-Training Software Applications • Military Non-Training Software/Hardware Integrated Systems (ONE OF THE ABOVE)
Not Relevant	• Contractor has performed little to no training system development, upgrades or modifications, and little to no experience with design and development of other non-training military systems or applications.		

PAST EXPERIENCE CHECKLIST - MANAGEMENT			
RELEVANCY	MANAGEMENT	DOMAIN	STSTEM TYPES
Very Relevant	• Program Management • Risk Management • Quality Assurance (ALL OF THE ABOVE)	• Military Maintenance Training • Commercial Maintenance Training (EITHER OF THE ABOVE)	• Desktop Virtual Training Systems • Physical Hands-On Training Systems (BOTH OF THE ABOVE)
Relevant	• Program Management • Risk Management • Quality Assurance (ALL OF THE ABOVE)	• Military Training • Commercial Training (EITHER OF THE ABOVE)	• Desktop Virtual Training Systems • Physical Hands-On Training Systems (EITHER OF THE ABOVE)
Somewhat Relevant	• Program Management • Risk Management • Quality Assurance (ALL OF THE ABOVE)	• Military Training • Commercial Training • Military systems or applications (other than training) (ONE OF THE ABOVE)	• Desktop Virtual Training Systems • Physical Hands-On Training Systems • Military Non-Training Software Applications • Military Non-Training Software/Hardware Integrated Systems (ONE OF THE ABOVE)
Not Relevant	• Contractor has performed little to no Program Management, Risk Management and Quality Assurance functions.
