

**JUSTIFICATION FOR OTHER THAN FULL AND
OPEN COMPETITION (OTFAOC)**

Federal Acquisition Regulation (FAR) Part 6 Justification & Approval (J&A), Supporting
Procurements under FAR Part 12, and FAR Part 15

Purchase Request Number: To be determined (TBD)

Contract Number: TBD

Task/Delivery Order Number: TBD

Procurement Title: Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

Estimated Ceiling Value: [REDACTED]

Statutory and Regulatory Authority: 10 U.S.C. 3204(a)(1) and FAR 6.302-1

Justification for OTFAOC Number: JA25-022

Upon the basis of the following justification, I, as Procuring Activity Competition Advocate,
hereby approve the use of other than full and open competition of the proposed contractual
action pursuant to the authority of FAR 6.302-1.

1. REQUIRING AGENCY AND CONTRACTING ACTIVITY:

Requiring Agency:

[REDACTED]

Contracting Activity:

Defense Information Systems Agency (DISA)/Defense Information Technology
Contracting Organization (DITCO)/PS63
6914 Cooper Avenue
Fort George G. Meade, Maryland 20755

2. NATURE/DESCRIPTION OF ACTION(S): This action will establish a firm-fixed price (FFP) single award indefinite delivery/indefinite quantity (IDIQ) contract vehicle that will support [REDACTED] and [REDACTED] to procure modular SCIFs and support services. Fiscal Year 2025 and later funds will be used. It is anticipated that Operations and Maintenance (O&M) funds will be used; however, other funding types may be used, as appropriate.

JA25-022 Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

CUI

3. DESCRIPTION OF SUPPLIES/SERVICES: The purpose of this effort is to establish a contract vehicle to support the requirements for the aforementioned entities that align with the performance task areas as explained below. Centurion Secure Vault Series Modular SCIFs are currently installed at four (4) residential locations and at one (1) military facility in the Continental United States (CONUS).

- a. Specific taskings issued under this contract will be consistent with the following performance task areas.
 - Task Area 1: Task Order Management (FFP). Includes coordination and management of task orders issued under the SASI contract, planning and coordination of timelines, coordination of suppliers and service providers to ensure efficient implementation of the task orders from design through accreditation.
 - Task Area 2: SCIF Design (FFP). Includes design to ensure SCIFs meet or exceed Intelligence Community Directive (ICD) 705 standards, Sound Transmission Class (STC) 56 rating, and Transient Electromagnetic Pulse Emanation Standards (TEMPEST). Includes customization of SCIF size, to include ceiling height. Includes scaling up and down of current SCIFs as the Government requirements change over time. Includes review of existing drawings, equipment configurations, and conditions, as well as a site survey to evaluate site conditions. Includes the following: determine compatibility, specific requirements, and critical paths; create schedule, power integration plan, site specific design, and preliminary drawings; participate in reviews with the contracting officer's representative, Government security officials, trades, and report any issues as they are detected; provide drawings and submittals; and coordinate with the Government for any security concerns and develop a project specific standard operative procedure.
 - Task Area 3: SCIF Assembly (FFP). Includes all labor, materials, tools, and equipment required for initial delivery and assembly of physical components, reassembly as part of the reutilization of an existing SCIF, repair/replacement of existing finishes damaged by contractor personnel, and soft copies of all project documents. Project documents include any documents used or created during design, construction, and installation of the SCIF. Includes Radio Frequency and STC Testing following installation to validate performance.
 - Task Area 4: Heating, Ventilation, Air Conditioning (HVAC) and Electrical Systems (FFP.) Includes connections to existing building systems/utilities. These systems shall include, but not be limited to: Electrical HVAC systems. All connections must comply with ICD 705, and local building codes as required by law. Includes soft copies of system documents used or created during the design, construction, and installation of the SCIF, including, but not limited to receipts, schematics, blueprints, and warranties.
 - Task Area 5: SCIF Monitoring (FFP). Includes procurement, installation and monitoring of an Intrusion Detection System that will comply with Underwriters Laboratories (UL) 2050 and ICD 705 accreditation. Includes customer service

CUI

JA25-022 Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

CUI

support, which includes priority emergency service response to service calls, staff annual training, and battery testing. Includes Annual UL Certification support.

- Task Area 6: SCIF Disassembly (FFP). Includes all labor, materials, tools, and equipment for SCIF disassembly in a manner that allows for reutilization; mobilization onsite with sufficient personnel to perform the task; tagging every item into the secure disassembly plan; and removal, itemization, packing, protection and palletization of all items and equipment. Includes disposal of any non-reusable structural items and components. Includes salvage any items to be reused (doors, latches, locks, etc.) for future redeployment of SCIFs.
- Task Area 7: SCIF Transportation (FFP). Includes transportation to new location utilizing a Government-approved Secure Shipping Plan; and inspection all items for shipping damage on arrival to new location.
- Task Area 8: SCIF Storage (FFP). Includes secure, climate-controlled storage of SCIF components to prevent damage and allow for reutilization of the components in the future.
- Task Area 9: Furnishing (FFP). Includes interior furnishing of the SCIF, including office chair, work desk, and other furnishings required for a productive work space.
- Task Area 10: SCIF Maintenance (T&M). Includes all labor and materials to repair and/or replace SCIF components due to damage and respond to service calls.

b. The period of performance will be one five-year period and no options. The estimated period of performance start date is March 1, 2025. The contract will include FAR 52.217-8 which allows the Government to exercise an option to extend services under the contract for a period of up to six months. Additionally, the IDIQ will allow for orders to be executed up to the last day of the ordering period, for a period not to exceed 5 years.

c. The estimated value of this effort is [REDACTED].

4. IDENTIFICATION OF STATUTORY AUTHORITY: Only one responsible source and no other supplies or services will satisfy agency requirements, 10 U.S.C. 3204(a)(1) (FAR 6.302-1/DFARS 206.302-1).

5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:

The basis of the determination is that the sole source contractor is the only source as they hold proprietary rights to the design of the Centurion Secure Vault Series modular SCIF panels, as they worked with their manufacturer to design the panels and interlocking mechanism. Furthermore, Centurion Consulting LLC is the only contractor that allows panels to be customized regarding height to accommodate lower ceiling heights in residential locations with eight foot or shorter ceilings. The locations where these modular SCIFs will be installed are primarily residential locations. The Government has previously acquired five (5) Centurion Secure Vault Series SCIFs, which are currently deployed and active in various locations. These SCIFs have various heights, due to the constraints on the physical location where they are deployed. While the Government has reviewed alternative systems, the Centurion Secure Vault

CUI

JA25-022 Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

CUI

Series of SCIFs, available solely from Centurion Consulting LLC, are the only solution that allows for customizable panel height.

Additionally, the Government's requirement for support services on its existing Centurion Secure Vault Series modular SCIFs necessitates the Contractor to have knowledge and experience in assembly and disassembly of Centurion Secure Vault Series modular SCIFs to prevent damage of Government property, and the ability to procure Centurion Secure Vault Series modular SCIF components (such as panels) and parts for SCIF scalability or replacement due to damage. Due to the proprietary nature of the specifications and design of the components, as well as the warranty provided by the Contractor, Centurion Consulting LLC is the sole contractor qualified to meet the support service requirements and ensure the warranty and accreditation is not voided.

(a) Description of events.

- (1) [REDACTED] has previously procured two residential SCIFs from Centurion Consulting LLC that are currently deployed in the NCR (Contract Numbers: [REDACTED]).
- (2) One of the [REDACTED]'s current residential SCIFs utilized existing, disassembled Centurion Consulting LLC components that were purchased through another previous action; thereby necessitating a sole source award to Centurion Consulting LLC to allow the incorporation of those components into the new location.
- (3) In late 2021, [REDACTED] identified a need for a modular SCIF for a residential location. At this time, PS63 utilized market research and initially solicited this requirement as a small business set-aside on General Services Administration (GSA) e-Buy. This returned no quotes. The contracting office then withdrew the set-aside, and resolicited. Still, no quotes were returned. PS63 then solicited this via the Government Point of Entry (www.sam.gov) as a small business set-aside and received three (3) quotes. Using a Lowest Priced Technically Acceptable evaluation methodology, contract [REDACTED] was awarded to Centurion Consulting LLC in March 2022.
- (4) In September 2022, a Notice of Intent for Sole Source – Sources Sought was posted to the GPE and no responses were received. The result of this Sources Sought was a sole source award of purchase order [REDACTED] for one (1) modular SCIF for a residential location and one (1) larger modular SCIF for a [REDACTED] warehouse.
- (5) In April 2023, a Notice of Intent for Sole Source – Sources Sought was posted to the GPE and no responses were received. The result of this Sources Sought was a sole source award of purchase order [REDACTED] for one (1) modular SCIF for a residential location.
- (6) DISA, in support of [REDACTED], has utilized Centurion Consulting LLC for SCIF design, assembly, heating, ventilation, air conditioning, and electrical systems, monitoring, disassembly, transportation, and storage for four modular SCIFs, three (3) residential and one (1) warehouse (Contract: [REDACTED]).
- (7) This new requirement is to establish a single award indefinite delivery, indefinite quantity contract that will allow for expeditious acquisition of additional SCIFs, replacement parts, disassembly, and redeployment of currently owned SCIFs, as well

CUI

JA25-022 Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

CUI

as transportation, storage, and maintenance throughout the lifecycle of these Government assets.

(b) Justification.

(1) Minimum Government requirements.

(a) SCIF Technical Requirements

- (i) Modular SCIF panels with height customization.
- (ii) Non-mechanical panel locking design which extends the life of the components, as there are no mechanical parts to deteriorate over time.
- (iii) Design specifications shall meet or exceed ICD 705 standards, STC 50 rating, and TEMPEST.

(b) SCIF Support Requirements

- (i) Contractor shall have knowledge and experience in assembly and disassembly of Centurion Secure Vault Series modular SCIFs.
- (ii) Contractor shall be able to procure proprietary Centurion Secure Vault Series modular SCIF components (such as panels) and parts for SCIF scalability or replacement due to damage.
- (iii) Contractor shall be able to provide accreditation and warranty on new and existing SCIF components and installed systems, such as HVAC and electrical systems.
- (iv) Contractor shall be able to respond to service calls on SCIF components and installed systems, such as IDS, HVAC, and electrical systems. Only the contractor that has installed these systems will have the required knowledge to service these while not voiding the warranty or accreditation.

(2) Proposed sole source contractor.

- (a) Centurion Consulting LLC, 8SLW7, Small Disadvantaged Business
- (b) Centurion Consulting LLC has installed five (5) Centurion Secure Vault Series modular SCIFs in support of DISA, [REDACTED], [REDACTED], and [REDACTED] since 2021. Each Centurion Secure Vault Series modular SCIF cost approximately [REDACTED]. If the Government is unable to redeploy these units, it would face the duplicative cost of replacing those units at approximately [REDACTED].
- (c) Only Centurion's installation team have the experience and knowledge to disassemble and reassemble its Centurion Secure Vault Series modular SCIFs. More importantly, Centurion provides the accreditation and warranty for the modular SCIFs which are critical aspects of this effort. Any other vendor would require installation training from Centurion Consulting LLC and would permanently void the warranty on the existing components and potentially require reaccreditation following support services. Centurion Consulting LLC's guarantees accreditation and service provided on currently deployed SCIFs by their team would not require reaccreditation.
- (d) Based on previous quotations for the redeployment of existing SCIFs, to include disassembly, transportation, and reassembly, the timeline to redeploy existing facilities within the District of Columbia, Maryland, and Virginia

CUI

CUI

region can be accomplished within [REDACTED] days. The timeline for a new SCIF, to include the lead time for the components can be [REDACTED]

- (e) Centurion Consulting LLC has proprietary rights to their Centurion Secure Vault Series modular SCIF components, as they worked with its manufacturer to design the physical components utilizing their personal knowledge and ongoing experience. Centurion has the sole capability to procure components – either for replacement of damaged panels, scaling up of existing SCIFs, or the deployment of new SCIFs.
 - (f) Procuring additional systems that are not compatible with the five deployed Centurion Secure Vault Series modular SCIFs, would result in the Government having to repurchase the entire suite of modular SCIFs when the locations or sizes required change in the future. By utilizing a single source, the Government has the ultimate flexibility to deploy SCIFs as required to maintain critical support to the [REDACTED], [REDACTED], and [REDACTED] no-fail missions.
 - (g) New Centurion Secure Vault Series modular SCIFs come with a one-year warranty, and Centurion has an extended warranty on the SCIF components/replacement parts. The use of a different vendor to service these SCIFs would void that warranty.
 - (h) In March 2022, DISA procured its first Centurion Secure Vault Series modular SCIF via a competitive procurement. Three quotes were received. Centurion Consulting LLC was awarded that contract based on Lowest Price Technically Acceptable evaluation methodology, in response to a small business set-aside solicited via the GPE, after unsuccessful attempts as a small business set-aside via GSA eBuy and unrestricted via GSA eBuy.
 - (i) In the initial SCIF effort ([REDACTED]), this was competed and was awarded using a Lowest Price Technically Accepted methodology. Odin Security was thrown out for not meeting the administrative requirements. Therefore, it was not evaluated. Centurion was the next lowest price and found technically acceptable. In accordance with the solicitation, Eniwetok was not evaluated. For each subsequent procurement, a Notice of Intent to Sole Source – Sources Sought was posted to the GPE and no other contractors have been identified as capable to meet the requirement.
- (3) Discussion regarding cause of the sole source situation.

The Government has previously procured five (5) modular SCIFs from Centurion Consulting LLC. The [REDACTED] has four (4) SCIFs currently deployed, and one of those reutilized components from a previously deployed SCIF provided by Centurion Consulting LLC. In March 2022, the Government conducted a competitive acquisition for a modular SCIF in the [REDACTED] area with similar compatibility requirements. The result of that acquisition was an award to Centurion Consulting LLC using Lowest Price Technical Acceptable evaluation methodology.

An additional component of this requirement is task areas to allow for the disassembly, transportation, storage, and reassembly, as well as reaccreditation of the currently deployed and active Centurion Secure Vault Series modular SCIFs. While the Government has reviewed alternative systems and sought out additional sources,

CUI

JA25-022 Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

CUI

Centurion Consulting LLC is the only vendor able to procure compatible replacement components, and with the expertise to disassemble and reassemble the current SCIFs without damaging the components or systems or voiding the warranty, as they did the initial installation and accreditation.

(4) Impact.

If Centurion Consulting LLC is not used for this requirement, the Government will be unable to redeploy its existing Centurion Secure Vault Series modular SCIFs. Furthermore, the Government would not be able to acquire compatible components for modifications and/or repairs to existing units with compatible hardware and structures. If another contractor is used for this requirement, additional costs will be incurred as Centurion Consulting LLC will be required to provide training on assembly and disassembly of the existing SCIFs. Furthermore, service on existing SCIFs by another contractor would void the warranty and possibly void the accreditation, which is essential to this requirement, and ultimately disrupt the no-fail missions of [REDACTED], [REDACTED], and [REDACTED].

6. CONTRACT OPPORTUNITIES ANNOUNCEMENT/POTENTIAL SOURCES: The Government posted a Notice of Intent to Sole Source – Sources Sought, in accordance with (IAW) FAR 5.201, on November 4, 2024. This notice yielded one response from BHPE LLC. However, the contractor did not provide a capabilities statement. After research of the company using their website, the Government identified that BHPE offers a variety of goods and services, primarily operating under NAICS 336413 - Other Aircraft Parts and Auxiliary Equipment Manufacturing. BHPE did not provide any information as to its ability to provide Centurion Secure Vault Series SCIF components or the ability to knowledgeably assemble or disassemble those types of SCIFs. Furthermore, BHPE did not provide any information on its ability to transport or store SCIFs. The Government determined that BHPE is not capable of meeting the requirements of this effort.

7. DETERMINATION OF FAIR AND REASONABLE COST: IAW FAR 12.209, the Government intends to establish price reasonableness IAW FAR 13.106-3(a)(2), utilizing a comparison of the proposed price with prices found reasonable on previous purchases and comparison to an independent Government estimate.

8. MARKET RESEARCH: Market research was conducted by the Acquisition Program Manager, [REDACTED], beginning September 2024 through November 2024. This market research included a review of the DISA Market Research Repository, market research reports for similar acquisitions, review of DISA-wide and Government-wide Acquisition contracts, a Notice of Intent to Sole Source – Sources Sought notice, and conversations with knowledgeable persons in Industry.

In October of 2024, the [REDACTED] team identified two results in the Market Research Repository that included keyword “Modular SCIF”. The first was signed in August 2022 and the second was signed in March 2023. Both previous MRRs yielded a sole source decision to Centurion Consulting LLC (Centurion). The team also reviewed market research for DISA awarded

CUI

JA25-022 Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

CUI

contract [REDACTED] and purchase order [REDACTED]. [REDACTED] had personal knowledge in procuring a residential modular SCIF for [REDACTED] in the [REDACTED] area in March 2022 (Contract number: [REDACTED]), two SCIFs in September 2022 (Contract number: [REDACTED]), and one SCIF in March 2023 (Contract number: [REDACTED]).

In November 2024, the Contracting Officer reviewed the websites of four (4) contractors that provide panel based modular SCIFs: Centurion Consulting LLC (Centurion), SCIF Solutions, Inc., Strategic Solutions Unlimited, Inc. (SSUI), and Squadron Defense Group (SDG). All four provided SCIF solutions that met or exceeded ICD 705 standards. The solutions by Centurion and SDG both meet TEMPEST standards with their base offering. Centurion, SSUI, SDG as well as provide STC, RF, and EMI protection. SCIF Solutions, Inc. did not address STC, RF, or EMI protection for its Retrofit SCIF. Centurion indicated that it exceeds the TEMPEST standard, the only one to indicate that. SCIF Solutions, Inc. has an option for TEMPEST, and SSUI did not address TEMPEST on its website. Only Centurion and SSUI indicate an integrated HVAC and Electrical system with its SCIF solution. Only Centurion indicated customization of panel height.

In reviewing the market research for the previously acquired SCIFs, the Government initially solicited its requirement competitively, first as a small business set-aside on General Services Administration (GSA) e-Buy with no quotes. The Government then withdrew the set-aside and solicited via GSA e-Buy as unrestricted with no quotes. Finally, the Government solicited the initial requirement as a small business set-aside on the Government Point of Entry (GPE) and received three quotes. Centurion was awarded the contract using Lowest Price Technically Acceptable evaluation methodology. Subsequent acquisitions of SCIFs utilized Notice of Intent to Sole Source – Sources Sought notices published to the GPE prior to each acquisition. Most recently, the Government published a Notice of Intent to Sole Source – Sources Sought on November 4, 2024. One vendor replied, however, the Government was able to determine, through a review of their website, that they were not able to meet the Government's requirements. There were no other responses to the Notice of Intent to Sole Source - Sources Sought notice that indicated use of a DISA-wide and other Government-wide Acquisition contracts would be suitable for this requirement. On November 4, 2024, the Government held a meeting with Centurion Chief Executive Officer Nicholas Bruno and Project Manager Joe Woddell to gain a better understanding of the specifications of the modular SCIFs currently owned by DISA, which Centurion supplied and installed, and its current capabilities to support a contract vehicle. The primary focus points in the meeting were proprietorship, possible resellers, reaccreditation of existing and new SCIFs, warranties, shelf life of existing SCIFs, replacement components, transportation, and storage of SCIFs, and the ability to deploy SCIFs nationwide. The result of this conversation was that Centurion worked with its manufacturer to design the specific panels used to build the Centurion Secure Vault Series modular SCIFs. No other vendor can purchase these specific panels. Furthermore, Centurion is the only vendor with access to purchase replacement parts for the SCIFs due to damage or end of life. Centurion explained that while it does have a partnership with a reseller on GSA, they are still the ultimate sole supplier of the Centurion Secure Vault Series modular SCIFs, and in the past, the Government did not get a response utilizing the GSA Federal Supply Schedules. This would also not further competition or increase small business participation, as Centurion is a small, disadvantaged business and is still the sole supplier of the products and service and would only result in higher prices. Centurion also explained that only Centurion installers have the knowledge to disassemble and reassemble,

CUI

JA25-022 Sensitive Compartmented Information Facility (SCIF) Assembly and Support
Indefinite Delivery/Indefinite Quantity (SASI)

CUI

as well as reaccredit the currently deployed SCIFs. Any other vendor would require training by Centurion, which would result in additional charges. Centurion also guarantees accreditation on all its SCIFs, and that guarantee would not extend to a different vendor, should they perform the reassembly and accreditation. Finally, Centurion assured the Government that it currently has multiple, concurrent installations on-going, and has the capability to not only provide SCIFs nationwide, but also overseas, and could fully support a contract vehicle.

Based on current market research, dated September 9, 2024-November 5, 2024, it has been determined that only the aforementioned Centurion Vault Series Modular SCIFs and support provided by Centurion Consulting, LLC can fully meet the Government's need.

9. ANY OTHER SUPPORTING FACTS: Centurion Consulting LLC has installed and stored multiple SCIFs in support of the [REDACTED] no-fail mission. All deployments of these modular SCIFs have passed accreditation and testing and are currently in operation.

10. LISTING OF INTERESTED SOURCES:

Based on the results of the above research, the following sources were identified:

Contractor Name	Business Category	Vehicle Type
BSNB LLC d/b/a Centurion Consulting Corporation 25979 Glasgow Drive Chantilly, VA 20152	Small Disadvantaged Business	N/A

11. ACTIONS THE AGENCY MAY TAKE TO REMOVE OR OVERCOME BARRIERS
THAT LED TO THE EXCEPTION TO FULL AND OPEN COMPETITION:

(a) Procurement History.

- (1) [REDACTED] Sole Source to Small Disadvantaged Business
- (2) [REDACTED] Sole Source to Small Disadvantaged Business
- (3) [REDACTED]; Competitive 100% Small Business Set Aside
via GPE
- (4) [REDACTED]; Sole Source to Small Disadvantaged Business
- (5) [REDACTED]; Sole Source to Small Disadvantaged Business

(b) Only the aforementioned provider can fully support the Government's need. No competitor functional replacement products exist in the market at this time to meet the Government's need. The Government will continue to search the marketplace to see if any future contractors can offer compatible components and assembly, disassembly, transportation, storage, and reaccreditation capabilities. Should this suite of modular SCIFs reaches end of life, the Government will explore a competitive acquisition for the replacement at that time.

- (1) Reviewing officials and the approval authority have reviewed the previous J&As, which was routed with this J&A, and determined any planned actions to remove barriers to competition listed on the previous justification were considered. As

CUI

CUI

part of its market research, the Government discussed with Centurion Consulting LLC who has access to procure the components of the Centurion Secure Vault Series SCIFs. As of November 2024, only Centurion Consulting LLC can acquire these components from its manufacturer, as they were involved in the development of the components. Furthermore, the Government discussed the ability for other contractors to assemble and disassemble Centurion Secure Vault Series SCIFs. Centurion explained that only Centurion personnel have the expertise and knowledge on assembly and disassembly of Centurion Secure Vault Series SCIFs. Centurion compared it to how their personnel would not have the expertise to assemble or disassemble another contractor's SCIF. After review of the actions taken, it is determined that a sole source environment still exists.

- (c) The previous [REDACTED] requirement, which resulted in contract [REDACTED], was a stand-alone action, which is why it was competed. Two SCIFs completed in September 2022 via [REDACTED] and single SCIF contract awarded in April 2023 added to this support structure. This requirement continues to expand support of the entire suite of modular SCIFs under the purview and management of [REDACTED] and DISA.
