

ProCare Services

Stryker Instruments

1941 Stryker Way, Portage, MI 49002

www.stryker.com

Dear Valued Customer,

Stryker is the sole authorized seller, manufacturer, and service provider for its equipment. Purchasing or repairing equipment through unauthorized service providers compromises the quality and reliability of your devices. These devices are not maintained by Stryker's certified technicians, who operate under strict FDA-governed safety and quality system controls. In addition, Stryker is the exclusive source of original parts and components required to maintain and repair your equipment to the highest standard.

Using unauthorized third-party service providers, non-Stryker parts, or accessories with your Stryker equipment may impact the following:

1. **Quality and Safety Standards:** Stryker designs, manufactures, and services its devices to meet required safety standards, certified through independent testing and external audits. When products are repaired by unauthorized service providers, conformance to these standards is not guaranteed. Even small variances from our technical specifications could result in shortened device lifespan, equipment malfunction or operational disruption.
2. **Liability:** Stryker disclaims any liability for products that have been repaired by an unauthorized service provider. Stryker will not indemnify its customers for liability and/or damages caused by products repaired by unauthorized third-party service providers.
3. **Product Warranty:** Stryker's warranty does not apply to products repaired by unauthorized third-party service providers. Additionally, using non-Stryker parts and accessories in conjunction with Stryker equipment may void any applicable manufacturer warranty.
4. **ProCare Service Plan Warranty:** Stryker reserves the right to invalidate any ProCare Service Plan if the equipment is repaired by an unauthorized third-party service provider and/or used with accessories not manufactured by Stryker.

We recommend you evaluate the potential impact on quality, safety, and reliability when choosing third-party service providers for your Stryker equipment. Only Stryker-authorized technicians have access to original parts, specialized training, and certifications, ensuring patient safety and the dependable performance of your devices.

Sincerely,

Mike Filary

Director, Post Market Quality
