

## STATEMENT OF NEED

### **PURPOSE:**

Purchase of a Food Waste Macerator.

### **TECHNICAL SPECIFICATIONS:**

High capacity throughput

Electrical power: 5.5kW

Motor supply voltage 480V/60Hz

Control voltage 480v 3 phase 60Hz (req for marine installation)

Transformer to step down control voltage to 24V/60Hz required for safety of operation

Acid proof stainless steel cabinet to withstand outdoor sea environment

An installation kit (main circuit breaker, hose with protective steel-covered stocking min inner diameter 9mm for cold water connection, water trap for outlet with associated couplings, vacuum valve for marine installation, mounting bracket, etc).

Be able to grind our food waste, including bones, to chunks smaller than 1 inch for disposal at sea to meet MARPOL requirements

Safety system to prevent injury for operators

### **Deliver to:**

NOAA Vessel Ronald H. Brown
