#### 1. Description of Need

There are several sets of replacement bat roosts on the Klamath River, installed as part of the dam removal project; as well as a number of other roosts of White-nose Syndrome (WNS)-susceptible species. Some of those replacement roosts have Biomark RFID readers, but not all. We need same brand RFID equipment to be able to detect whether tagged bats move between the roosts.

#### 2. Market Research Conducted

We need to use the same Biomark systems that are already installed in some of the replacement roots so that we can compare between roosts.

#### 3. Other Capable Sources

see above

#### 4. Barriers to Competition

Explore whether there are other sources of systems that would be cross-compatible with the Biomark systems for future purchases.

**5. Contractor's Qualifications**

Biomark is a supplier of RFID systems that have proven successful in other areas where bats are being monitored

**6. Determination of Fair and Reasonable Cost**

The cost is fair and reasonable from this source as it is the single source that provides the necessary supplies.

**7. Recommendation and Certification by Program Office**

Based on the above justification, I recommend this acquisition to be conducted using sole source acquisition procedures. I hereby certify that this justification is accurate and complete to the best of my knowledge and belief.
