

STATEMENT OF WORK

1. Objective/Requirements

We are sourcing [5] InstaTune lasers, part number FP4209-C1 in order to support our experimental build of Fiber optic sensing system (FOSS) to support Launch Service Provider's nanoFOSS project.

2. Characteristics, Scope, and Specs

The contractor shall perform the following duties:

- Ensure that the InstaTune has the center wavelength of 1550 nm, with absolute wavelength accuracy of +/- 15pm
- Ensure that the wavelength swept range is at 40nm.
- Ensure that the output power is at least equals to 5mW

3. Period of Performance

Testing shall be prior to shipping to NASA AFRC.
