

**JUSTIFICATION FOR EXCEPTION TO FAIR OPPORTUNITY for
SIMPLIFIED ACQUISITIONS VALUED BELOW \$250K**

☒ FAR 13.106-1(b)(1)(i) Soliciting from a single source

☐ FAR 13.106-1(b)(1)(ii) Brand name specification

PURCHASE REQUEST NUMBER:

TBD

DESCRIPTION OF ACTION:

- ☒ New Requirement
☐ Modification

ESTIMATED VALUE (inclusive of options):

\$ [REDACTED]

FUND TYPE:

RDT&E (2040)

YEAR:

FY 2025

1. NAME OF PROPOSED SOLE SOURCE CONTRACTOR / BRAND NAME MANUFACTURER:

Dytran Instruments Inc., 21592 Marilla St., Chatsworth, CA 91311 CAGE CODE: 2W033

2. BRIEF DESCRIPTION OF SUPPLIES OR SERVICES REQUIRED AND THE INTENDED USE:

Supply accelerometer Dytran model 7603D5. The accelerometers are small electro-mechanical devices (transducers) [REDACTED]

resultant data is used by engineers and scientific personnel for many purposes. These particular sensor model has been utilized by ATC for the past 6 years. The existing instrumentation suites are populated with this make and model. Items are currently in the ATC inventory and additional or replacement units must be physically and electrically identical in order to function with existing systems. This requirement reduces test delays due to sensor failures during testing by permitting quick replacement of the damaged sensor with a like unit.

3. UNIQUE SALIENT CHARACTERISTICS THAT LIMIT AVAILABILITY TO ONLY ONE SOURCE, WITH THE REASON NO OTHER SUPPLIES OR SERVICES CAN BE USED:

The existing ATC field vibration sensor package is fabricated with Dytran model 7603D5 accelerometers. The fixtures and mounts are designed around the size and weight of this particular model sensor. No other sensor has been found with the same physical and electrical properties.

4. REASON WHY CONTRACTOR IS THE ONLY SOURCE CAPABLE OF MEETING MISSION REQUIREMENTS; SPECIFICALLY, THE REASON NO OTHER SOURCE CAN MEET THE UNIQUE CAPABILITIES IN SECTION 3:

Dytran is the sole manufacturer of the 7600 series of variable capacitance accelerometers. The existing accelerometer mounting blocks were fabricated with mechanical specifications of the Model 7603D5. Therefore, the brand-name of Dytran and the specified part numbers are required to meet the Army's needs.

Is this a follow-on contract? yes ☐ no ☒ If yes, provide contract number: [REDACTED]

If another source is selected there would be additional costs due to operator training time, the fabrication and/or purchase of new interface cables, and cost of time required to integrate systems.

5. MARKET RESEARCH:

The brand-name Dytran sufficiently meets the Army's need. ATC will continuously conduct market research to see if there are any new products being introduced to the market that can better suit the Army's needs. If a new product is introduced that can better suit the Army's need, research will be done to determine if it is cost effective to re-procure all new equipment.

6. TECHNICAL CERTIFICATION:

I certify that the supporting data under my cognizance, which is included in the sections above, is accurate and complete to the best of my knowledge and belief.

7. ACTIONS TO INCREASE COMPETITION (For Contracting Personnel Use):

JA-25-Inst & Tech-0219

Market Research was conducted by contract specialist on February 20, 2025, to determine if the accelerometers required by US Army Aberdeen Test Center can be purchased from other vendors. A Google Search using www.google.com was conducted using the terms "accelerometers" or "Transducers." The search identified multiple commercial items and production companies that are capable of manufacturing accelerometers.

However, the Items required by ATC for this purchase are sensors from Dytran Instruments, Inc. which meet ATC's requirements and are compatible with the Model 7603D5. The existing accelerometer mounting blocks were fabricated with mechanical specifications by Dytran Instruments, for interface with existing equipment software at ATC. Dytran Instruments have specific characteristics accelerometers to measure vehicle vibration during automotive testing.

Based on the collaborative effort in conducting Market Research between the requiring activity and the contracting office, it was determined that the specific requirement from ATC cannot be met by any other contractor because there are no resellers for the brand name Dytran Transducers.

The item to be purchased is compatible with measurement hardware built into the system utilized by ATC, and is Proprietary and confidential property of Dytran Instruments Inc. All of the design drawings that were presented for the market research are labeled "Proprietary and confidential".

To maintain safety and compliance of the Aberdeen Test Center Automotive Directorate, Automotive Instrumentation Division; and for cost savings by promoting continuity of the test systems, purchase of the Dytran specialized accelerometers that are equipped to sense motion and convert that movement to an electrical signal proportional to the acceleration of the movement for military wheeled vehicles is the preferred option. "Transducers" produced by Dytran Instruments, Inc., is the only product that will meet the requirements of ATC.

It will be advantageous for the Government to set this requirement In Accordance With FAR 13.106-1(b)(1)(i) Soliciting from a single source, and purchase these items as a Sole Source represented by NAICS Code 334519- Other Measuring And Controlling Device Manufacturing, upon approval of the DD2579 and this Justification and Approval (J&A).

A notice of intent (NOI) to award a brand name, sole-source will be posted through SAM.GOV.

8. CONTRACT SPECIALIST/PURCHASING AGENT REVIEW:**SOLE SOURCE**

I have done my due diligence in verifying the information presented above by the requiring activity and have attempted to obtain competition to the maximum extent practicable.
