

Brand Name Only (“Salient Characteristics”) v 2.0

Brand Name Item: [NMIS Network Software](#)

EER#: [_249739__](#) Quantity: 1 Location of use: [Nuclear Medicine Department](#)

- 1) Essential/significant physical, functional, or performance characteristics.
 - a) The software must store the following:
 - i) Patient name, Date of Birth, Social Security Number (last 4)
 - ii) Radiopharmaceutical dose, procedure type, and radioactive waste
 - iii) Area Survey values and wipe tests by specific room/area
 - iv) Inventory of sealed sources, ion chambers, and Geiger counters
 - v) Quarterly and Annual Linearity and Accuracy values
 - b) The software must generate workload data by date and procedure
 - c) The software must track incoming and outgoing radiopharmaceutical deliveries
 - d) The software must have HL7 Interface for data sharing between hospital or radiology information systems and the software program
 - e) The software must have Dose Calibrator interface to capture radiopharmaceutical activity readings
 - i) Records dose calibrator constancy, accuracy, and geometry
 - f) The software must provide alerts for dose administrations outside of prescribed range
 - g) The software must provide data conversion of stored data in Syntrac to the new software system
 - h) The vendor must provide web training and setup for technologists
- 2) Complete generic identification: NMIS Nuclear Medicine recordkeeping software
- 3) Applicable model/make/catalog number: 100034
- 4) Manufacturer name: ec2 Software Solutions (Mirion Medical)
