Applied Security Technologies (AST) is the only vendor who services the specific type of security equipment that we employee at this facility. All other vendors would have to travel to get to this location and would require a great deal of time. Non-local vendors would not meet the response time requirement and would create a security concern for personnel, assets, and facilities. AST can meet the 8 hour response time.

Market Research. (Describe the informal market research and the results, or state why a market research was not conducted.)
