

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: AFLCMC/PZIBB

Project/Program Name: Fame in Jet Instrument (FIJI) Fatty Acid Methyl Ester (FAME) Cartridges and Verification Fluid

Purchase Request / Local ID Number: [REDACTED]

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

The Aerospace Fuels Laboratory at the Air Force Petroleum Office utilizes a FAME in Jet Instrument to test for Fatty Acid Methyl Esters (FAME) Content in Aviation Turbine Fuel at the Air Force Petroleum Agency's Aerospace Fuels Laboratories. FIJI FAME cartridges are required to operate the existing equipment. Requirements for this effort include:

- a. 1200 Each FIJI FAME Cartridges for use in the FIJI FAME Instrument, Model SA5000-2
- b. Five (5) 1 standard consisting of 30ppm concentration of FAME and the balance of hydrocarbon
- c. Five (5) 1 standard consisting of 100ppm concentration of FAME and the balance of hydrocarbon

Section C: Justification for Soliciting from a Single Source or Brand Name

Stanhope-Seta is the manufacturer of the utilized instrument as well as the cartridges and fluids required to ensure interoperability and smooth testing performance conducted on the instrument. Stanhope-Seta sells its parts and consumables for the FAME in Jet Instrument strictly through one US authorized distributor, Lazar Scientific Inc. (CAGE: 1YYF9). Additionally, previous orders have been placed for the FIJI FAME cartridges on contracts FA8601-18-P-0096 and FA8601-19-P-A169, both of which used Lazar Scientific Inc.

Section D: Efforts to Obtain Competition

Market research, which yielded zero other results, has been conducted to identify other distribution sources and/or authorized distributors that can meet the Government's requirement. Lazar Scientific Inc. provided the Government a letter verifying they are in fact the sole US authorized distributor for these products.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

In order to preclude further single source acquisitions for the consumables required to operate the FIJI FAME instrument, a new instrument would need to be purchased. Even then, there would still be risk of a single source requirement, assuming the manufacturer also required use of its own manufactured consumable cartridges to ensure compatibility and warranty relevance.

To avoid the above risk, the DoD or Air Force would need to pursue research and development on instruments that could test for FAME content with use of any cartridge to complete the required sample testing.

Dissemination Control: N/A

Single Source Justification (Simplified Acquisition)

Section F: Contracting Officer's Determination

I have determined, in accordance with FAR 13.106-1(b)(1), that the circumstances of this contract action deem only a single source is reasonably available.
