Taclane 175-G Encryptor Repair for Ronald Reid

19 February 2025

I. AGENCY IDENTITY AND CONTRACTING ACTIVITY

In accordance with Federal Acquisition Regulation (FAR) 13.501(a), the Department of Energy's National Nuclear Security Administration seeks to repair services for Taclane 175-G Encryptor for H-Area, classified network operations for Ronald Reid. The procedures at FAR 13.5, *Simplified Procedures for Certain Commercial Products and Commercial Services*, were used in accordance with 41 U.S.C. 1901.

Requesting Office:
National Nuclear Security Administration (NNSA)
Office of Safeguards & Security
Savannah River Site
PO Box A, Aiken, SC 29802

Contracting Activity:
Department of Energy/National Nuclear Security Administration
Program Support Acquisition Branch (NA-PAS-315)
P.O. Box 5400
Albuquerque NM, 87185-5400

II. NATURE AND/OR DESCRIPTION OF THE ACTION BEING APPROVED

This document sets forth the justification and approval to issue a sole source award in accordance with FAR 13.501(a) and 41 U.S.C. 1901. The Government will issue the award as a firm fixed price contract to General Dynamics Mission Systems, Inc. The award will procure the shipment and repair service for Taclane 175-G Encryptor to support continued operation.

General Dynamics Mission Systems, Inc.
150 Rustcraft RD
Dedhama, Massachusetts, 02026-4534
United States

and Compliance Products (hardware and Perpetual License)

Software)

III. DESCRIPTION OF SUPPLIES AND/OR SERVICES

The Government seeks to procure services for Taelane 175-G Encryptor for H-Area classified network operations for Ronald Reid. The Taelane encryptor is used for classified network operations and classified data encryption classified operations for H-Area daily classified network operations across the NNSA/DOE complex. The Taelane encryptors are for classified traffic operations data communications for NNSA/DOE and Savannah River Nuclear Solutions, LLC personnel (SRNS) across NNSA/DOE complex.

The primary purpose of this requirement is to provide secure COMSEC encryption management for communications on the Internet Protocol (IP) and Asynchronous Transfer Mode (ATM) networks for the individual user or the enclaves of users at the same security level. The classified Taelane encryptor is critical for managing classified networks at the Top Secret and SCI levels.

The total estimated cost of this acquisition is [REDACTED]

Description	Manufacturer Number	Quantity	Unit Cost (estimated)	Full Cost (estimated)
Taelane 175-G Repair For Ronald Reid H-Area, Controlled Cryptographic Item (CCI)	General Dynamics Mission Systems, Inc.	1	[REDACTED]	[REDACTED]

Total estimated cost: [REDACTED]

IV. AUTHORITY

Issuance of a sole source award is authorized in accordance with FAR 13.501(a) and 41 U.S.C. 1901(a)(1).

41 U.S. Code § 3304 “...(a)WHEN NONCOMPETITIVE PROCEDURES MAY BE USED.—An executive agency may use procedures other than competitive procedures only when—(1) the property or services needed by the executive agency are available from only one responsible source and no other type of property or services will satisfy the needs of the executive agency.

V. APPLICATION OF AUTHORITY

The National Nuclear Security Administration (NNSA) Savannah River Site (SRS) NNSA operations, Plans to contract with General Dynamics Mission Systems by means other than full and open competition. NNSA-SR Office of Acquisition Management will execute the action.

The encrypted classified communications network manager capability is needed for leadership to be able to continue to meet NNSA mission requirements for communications between the National Nuclear

Security Administration and DOE National Labs and other Federal Government agencies for the National Nuclear Security Administration missions. The classified Taclane encryptor is certified by the National Security Agency (NSA) as the only approved classified network encryptor for classified voice and data operations. The Taclane is certified to protect classified network encryption at the Top-Secret level and below. In addition to data security, the Taclane provides secure communications up to the Top-Secret SCI level. General Dynamics Mission Systems is the sole vendor for the Taclane encryptor to be used for classified network operations. The National Nuclear Security Administration must use the Electronic Key Management Key System (EKMS) management to receive COMSEC Keying material which is controlled and operated by NSA to communicate with network encryptors on classified networks.

VI. EFFORTS TO IDENTIFY ADDITIONAL SOURCES

The National Security Agency (NSA) has certified General Dynamics Mission Systems as the only certified classified network encryptor for classified network operations. The Taclane encryptor is secured using Keying material from EKMS. The Key loading operations and classified COMSEC encryption at Top Secret and below on commercial, military, and government Internet Protocol networks.

The above-described information constitutes a synopsis of the proposed contract action and satisfies the requirements of FAR 5.201(b)(1)(i).

VII. DETERMINATION OF REASONABLENESS OF COST OR PRICE

Prior to award, the Contracting Officer will determine that prices paid are fair and reasonable in accordance with FAR 13.106-3(a)(2). Notably, the Contracting Officer will be able to determine that prices paid are fair and reasonable by comparing quoted prices to commercially available price lists and the independent Government estimate. Notwithstanding the foregoing, the Government reserves the right to require data other than certified cost and pricing data if deemed necessary by the Contracting Officer.

VIII. MARKET RESEARCH

Market research was conducted in accordance with FAR 10.001(a)(2). General Dynamics Mission Systems, Inc. provided a sole source letter stating they are the sole source manufacturer (Original Equipment Manufacturer – OEM), distributor and owner of the Certified Type 1 Encryptor Product Line for Taclane 175-G Encryptor. General Dynamics does not utilize a third party as an authorized repairer.

IX. OTHER FACTS

Not Applicable.

X. INTERESTED SOURCES

Not Applicable.

XI. STEPS TO FOSTER COMPETITION

Searches will be conducted as this requirement is presented to ensure that no additional vendors are found. However, none are anticipated as General Dynamics is a proprietary service provider for their equipment.

XII. CERTIFICATIONS

Acquisition Initiator/Technical Representative:

I certify that the facts and representations under my cognizance, which are included in this justification, and which form a basis for this justification, are complete and accurate.
