

DEPARTMENT OF VETERANS AFFAIRS

**Justification for Single Source Awards IAW [FAR 13.106-1](#)
For
Over Micro-Purchase Threshold but Not Exceeding the SAT (\$250K)**

Acquisition Plan Action ID: [36C250-25-AP-2439](#)

- Contracting Activity:** Department of Veterans Affairs, NCO10, Chillicothe VA Medical Center, Chillicothe, Ohio 45601, submitted 2237 #538-25-2-775-0052 for GenMark ePlex Reagents.
- Brief Description of Supplies/ Services required and the intended use/Estimated Amount:**
GenMark ePlex Reagents meets the detection of Respiratory Viruses including COVID-19 and Positive Blood Culture Identification on the GenMark ePlex analyzer and Genmark Reagents ePlex Respiratory Pathogen Panel 2. Estimated usage is 1800 tests a year.

Necessary supplies are:

Item #	Part#	Description	Qty
1	09555641001	ePlex Respiratory Pathogen Panel 2, EUA (12 tests)	1800

- Unique characteristics that limit availability to only one source, with the reason no other supplies or services can be used:** The Chillicothe VA currently owns the GenMark ePlex Analyzer; the requested Reagents are only compatible with the existing GenMark ePlex Analyzer Chillicothe VA Medical Center previously obtained the GenMark ePlex. This system analyzes Ribonucleic Acid (RNA) using Polymerase Chain Reaction (PCR) methodology. Testing can be completed in under 2 hours providing clinicians the information required to move forward with treatment. The ePlex Respiratory Pathogen Panel 2 are the only reagents to complete the required testing. GenMark Diagnostics Inc merged with Roche Diagnostics LLC, (OEM) is the only distributor of this product. If end user cannot perform inhouse testing for COVID-19 then procedures will be delayed, and isolation costs will increase. Also, all the COVID-19 testing would be forced to be sent to a reference lab which could take 5-7 days for results. This will give us more capacity for testing. Market Research found no other comprehensive options on the market to fulfill all Government requirements. The specifications needed by the end-user could not be met or shown compatibility by any other product examined. Substituting a device other than that specifically prescribed is detrimental to the treatment of the Veteran patient.
- Description of market research conducted and results or statement why it was not conducted:** DSBS queried using NAICS 325413 and keywords "ePlex Reagents" for SD/VOSB's with 0 vendors found. VetCert query by same NAICS with 90 results. Requested items were not found on any contract vehicles. (OEM), confirmed these products are proprietary and there are no authorized resellers/distributors. The VA Rule of Two or SBA Rule of Two could not be satisfied. Product is not on the NMR Class Waiver List. No solicitation will be made. CO will publicize an Intend to Sole Source Notice in the SAM (GPE) to the OEM, large business, open market. Price is fair and reasonable.

Revision: 01
