

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: PZ (Arnold) OL Holloman

Project/Program Name: Intercom System Replacement

Purchase Request / Local ID Number: TBD

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

Purchase one (1) Quintron system. The 586 Flight Test Squadron (586 FLTS) requires a replacement of the current communication system which must be compatible with the White Sands Missile Range communication system.

Section C: Justification for Soliciting from a Single Source or Brand Name

The Quintron communication system will be used by the 586 FLTS North Area Avionics Test Site (NAATS) Facility to communicate with White Sands Missile Range (WSMR) personnel and Edwards Air Force Base test programs. WSMR recently upgraded the intercom system to a new Quintron system and the 586 FLTS's current system no longer meets required specifications. As a result, the 586 FLTS must cease test missions. Test Programs are not able to complete required milestones on test items delaying certifications. WSMR is the only range that Test Programs can meet final certifications of specific test items. Currently, the 586 FLTS has 1 mission scheduled and funded with WSMR and would be at a loss \$500K for airspace if denied this acquisition. Additional losses for execution would include \$300K per mission and the 586 FLTS has a requirement for 3 missions planned for FY2025. If the Quintron system acquisition is denied, all efforts will be shifted out at least 1 year, and at a loss of \$1.5M in cost for airspace.

Section D: Efforts to Obtain Competition

A sources sought (FA9101-25-Q-0IRS) was released on 22 Jan 2025 and closed on 3 Feb 2025, one response was received. The estimate is not showing the required items nor is the Quintron equipment required, therefore does not meet the requirements. Quintron is the manufacturer of this required product and is the only vendor able to meet the requirements.

The government searched the Internet and the General Services Administration (GSA) site for intercom companies. Looked at STENTOFON, ALPHACOM, and RAPTOR intercom and none had suitable intercom systems. Each intercom system required its own operating system to be programmed eliminating WSMR's ability to communicate with these different intercom systems thus eliminating any communication between the NAATS facility as required with range safety and other associated personnel.

While these companies offer intercom solutions, none can seamlessly integrate with the existing WSMR and Edwards AFB infrastructure, which utilizes a unique Quintron-based system.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

The 586 FLTS will continue to conduct market research to see if other sources become available in the future for future acquisitions. The 586 FLTS is at the mercy of the lead operating locations, such as WSMR and Edwards Air Force Base.

Single Source Justification (Simplified Acquisition)

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
