

STATEMENT OF WORK

Elasticsearch License Renewal

OVERVIEW:

Joint Region Marianas (JRM) requires an Elasticsearch Enterprise Resource Unit license renewal package in order to continue all features and capabilities of the currently installed Elastic Stack platform. The Elasticsearch software functions as the Joint Region Marianas Platform Enclave's (JRM-PE) Central Log Server which is a critical Information Assurance (IA) Compliance Requirement. Also, included with this package is consulting for the activation of features and capabilities, and training for the end-users to equip them with the knowledge to manage and maintain the system.

IA COMPLIANCE REQUIREMENTS:

NIST SP 800-53 R5 "Security and Privacy Controls"

- **AU-2 – Event Logging**
 - a. Identify the types of events that the system is capable of logging in support of the audit function: [Assignment: organization-defined event types that the system is capable of logging];
 - b. Coordinate the event logging function with other organizational entities requiring audit-related information to guide and inform the selection criteria for events to be logged;
 - c. Specify the following event types for logging within the system: [Assignment: organization defined event types (subset of the event types defined in AU-2a.) along with the frequency of (or situation requiring) logging for each identified event type];
 - d. Provide a rationale for why the event types selected for logging are deemed to be adequate to support after-the-fact investigations of incidents; and
 - e. Review and update the event types selected for logging [Assignment: organization-defined frequency].
- **AU-3 – Content Of Audit Records**
 - a. What type of event occurred;
 - b. When the event occurred;
 - c. Where the event occurred;
 - d. Source of the event;
 - e. Outcome of the event; and
 - f. Identity of any individuals, subjects, or objects/entities associated with the event.
