

Statement of Work

NASA requires ongoing maintenance and upgrades to the Numerical Propulsion System Simulation (NPSS) software to ensure it meets current and future needs for analyzing thermodynamic systems, including advanced propulsion and power systems. The RITM number for this software is RITM1829249.

This procurement fulfills Article III of the Software Use and Distribution Agreement signed between NASA and the Ohio Aerospace Institute in 2010. It will provide NASA with software services equivalent to those received by the lowest-level NPSS consortium members at the same pricing structure.

NPSS Maintenance and Support Services Include:

Participation in the Program Advisory Committee (PAC) as a non-voting member, including an invitation to the annual in-person meeting. The ability to propose, discuss, and participate in the selection of NPSS code modifications through the PAC, funded from the Participation Fee pool.
