

Office of the Procurement Executive

U.S. DEPARTMENT of STATE

Use this template when limiting competition using Simplified Acquisition Procedures for procurements not exceeding the simplified acquisition threshold (see [FAR subpart 13.106-1\(b\)\(1\)](#)).

SINGLE SOURCE JUSTIFICATION NOT EXCEEDING THE SIMPLIFIED ACQUISITION THRESHOLD

SECTION 1: IDENTIFICATION OF THE AGENCY AND THE CONTRACTING ACTIVITY

Department of State
Contracting Activity

☒ Overseas post-Kuwait

Requiring Activity

U.S Embassy Kuwait – Facilities office
Replacing four domestic water pumps along with electrical
control panels & related accessories

SECTION 2: NATURE AND/OR DESCRIPTION OF THE ACTION BEING APPROVED

Approval is requested to award on a sole source basis to Arabi Company W.L.L., (REF. # FAB/GN/24/09/USE/02-R0), located in Sabhan, Kuwait, for the services/supplies described in Section 3 on behalf of the Requiring Activity. Contract shall be of firm fixed price and a set performance period type

SECTION 3: DESCRIPTION OF SUPPLIES/SERVICES REQUIRED TO MEET THE AGENCY'S NEEDS

The U.S. Embassy in Kuwait has a requirement to obtain the services of a contractor to completely replace the existing domestic water pumps with new ones, including the replacement of electrical panels and pipes related to the pumps.

- Supplying four new CRN32-4 water pumps of Grundfos make, Denmark, **or equivalent** along with **stainless steel suction pipe** with isolation, bronze foot valve strainer, filling valve and all applicable accessories and electrical panels (VFD control panel ABB brand or equal equivalent) that meet the specifications and requirements of the facilities.
- Installing the new water pumps, valves, water pipes, joints and electrical panels in accordance with manufacturer specifications and applicable codes and regulations.
- Testing and commissioning the new pumps and electrical panel(s) to ensure they are functioning properly and as required.
- Performs manufacturers recommended periodical services during the warranty period.
- Estimated period of performance/installation shall not exceed 1 month.

The estimated value for the entire period of performance is \$ 60,000. (Sixty Thousand U.S. dollars)

SECTION 4: IDENTIFICATION OF THE STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION

In accordance with Federal Acquisition Regulation (FAR) 13.106-1(b)(1), the Contracting Officer has deemed only one source reasonably available based on the following:

☒ Urgency

SECTION 5: DEMONSTRATION THAT THE PROPOSED CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE AUTHORITY CITED

Arabi Co. W.L.L. is uniquely qualified to provide these services/supplies based upon the following:

- 1) Arabi Co. is a well-known regional water treatment/solutions company that plays a major role in the fields of Water Equipment (Contractor, supplying & commissioning of water pumps, water filters, water heaters, valves garage equipment's, pipes/fittings).
- 2) Arabi Co. is an authorized dealer/partner for Grundfos pumps which we are seeking to have procured and installed.
- 3) Arabi Co. has been responsive and reliable in supplying materials and workmanship in other fields/systems.
- 4) Arabi Co. has qualified Engineers/Technicians who are factory trained, to install, maintain, repairing, and troubleshooting the pump(s).
- 5) Arabi Co. installed the sand water filters on compound in 2018 and since then we have not had any major issues/breakdowns related to the equipment they installed.
- 6) Arabi Co. installed the chlorine injector dosing system on compound in 2014 and has been working fine since then.
- 7) Arabi Company's after sales and services are outstanding. They respond to emergency calls 24/7 with their qualified factory trained technicians/engineers.
- 8) The Embassy doesn't have a trusted vendor who is capable in this field with trained/qualified technicians to install, repair, and troubleshoot this kind of system.

Justification for Sole Source and Nature of the Urgency:

This procurement is being requested under unusual and compelling urgency due to the following critical factors:

- **Emergency:** Two out of four pumps are non-operational, significantly reducing the facility's capacity. If replacements are not expedited, the remaining pumps may also fail, causing a total shutdown.
- **Obsolete Technology:** The current pump system is outdated, making it difficult to source compatible spare parts. The obsolete design limits available repair options and increases procurement challenges.
- **Limited Availability of Spare Parts:** Due to the age of the system, spare parts are scarce in the market and, when available, are prohibitively expensive, making repairs inefficient and costly.
- **Continuous Leakage and Breakdowns:** The current pumps suffer from persistent leaks and breakdowns, resulting in increased maintenance efforts and excessive man-hours spent on temporary repairs, further straining operational resources.

Impact of Not Proceeding with Sole Source Procurement:

Failure to act immediately may result in:

- A complete shutdown of the facility due to pump failure.
- Additional costs associated with emergency repairs and extended downtime.
- Potential health and safety risks due to water leakage and system failure.
- Increased operational disruptions affecting dependent systems and personnel.

SECTION 6. DETERMINATION BY THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT IS FAIR AND REASONABLE

The Contracting Officer has determined that the anticipated cost of KWD 18,540.00 for the services outlined in this Single Source Justification is fair and reasonable.

This determination is based on market research, which indicates that the cost of a single Grundfos Vertical Multistage Pump ranges between USD 6,000 and USD 9,000 per unit. Given the requirement to replace a total of four (4) units, the estimated cost solely for the pumps would range from USD 24,000 to USD 36,000, not including shipping charges or lead times associated with procurement and delivery.

In addition to the cost of the units, the proposed price takes into account critical technical factors, including:

- Service Proficiency: Expertise required for proper installation, integration, and testing of the new pumps within the existing system.
- Work Execution Effectiveness: Ensuring minimal downtime and seamless operational continuity of the facility.
- Expanded Scope of Services: The requirement includes removal of the outdated units, system modifications if necessary, and installation of the new pumps, all of which contribute to the overall value of the proposed cost.

Considering these factors, the proposed cost is deemed appropriate, justified, and aligned with industry standards for a procurement of this nature.
