Justification and Approval Notice

# Justification and Approval Notice

## ATTACHMENT

- Single Source Justification MPT to SAT - 552-18-103 3.11.2025.

**DEPARTMENT OF VETERANS AFFAIRS**

**Justification for Single Source Awards IAW [FAR 13.106-1](#)  
For  
Over Micro-Purchase Threshold but Not Exceeding the SAT (\$250K)**

**Acquisition Plan Action ID: 36C250-25-AP-2069**

**1. Contracting Activity:**

Department of Veterans Affairs, Regional Procurement Office Central, Network Contracting Office (NCO) 10, will enter into a contract that requires the procurement of A/E services which requires justification for other than full and open competition.

**2. Brief Description of Supplies/ Services required and the intended use/Estimated Amount:**

The existing RDC/John Poe Architects, LLLP (RDC/JPA). Design IDIQ contract has no additional capacity to make modifications. This Single Source Award (SSA) is requesting design services to be provided by RDC/JPA to facilitate needed changes to the contract documents. These changes are for the essential engineering, and design of, a fix for the failed roof truss support, and failed window and door lintels in building 116 Headquarters. The notated work is of an investigative and technical nature IAW 6.302-3(b)(2)(ii). These design drawing and specification modifications will supplement and replace current drawings and specifications. These modified drawings and specifications will be used for pricing and construction for Repair Failed Roof Truss, Windows and Door Lintel - 552-18-103 [REDACTED]

**3. Unique characteristics that limit availability to only one source, with the reason no other supplies or services can be used:**

RDC/JPA is the current designer of record for the Renovate Infrastructure Building 116 Phase 2 project and therefore carries the professional liability for the project and its subcontracted design teams. If another design firm were to be engaged to perform drawing modifications for RDC/JPA current design, RDC/JPA would not carry the professional liability for the new design as well as any unforeseen ramifications pertaining to that change. The new design firm would not carry the professional liability for the Renovate Infrastructure Building 116 Phase 2 project as a whole and wouldn't be responsible for issues pertaining to items other than their change to the drawings, and would not be responsible for how their change affects the remainder of the project, seen or unforeseen. This ambiguity as to who carries the professional liability is an extreme risk to the government and needs to be avoided. Having the designer of record for the Renovate Infrastructure Building 116 Phase 2 project perform the drawing modification eliminates this high risk, and that firm would carry the liability for the entire project. In addition, RDC/JPA has the essential engineering and practical application of investigative findings of the technical nature for this 154 year old historical building.

**4. Description of market research conducted and results or statement why it was not conducted:**

Market research was conducted under the original Renovate Infrastructure for History Center B116 contract. The modification to Renovate Infrastructure for History Center B116 design documents needs to be made by RDC/JPA. VetCert queried NAICS 541310 with 699 SD/VOSB results. Market research conducted via A/E Design IDIQ contract. Renovate Infrastructure for History Center B116 design modifications must be performed by RDC/JPA as they're the designer of record. Firm carries professional liability for the project and its subcontracted design teams. The VA and SBA Rule of Two cannot be met. CO will award to RDC/John Poe Architect, LLLP, a small business, IAW FAR 6.302-3(b)(2)(11), Industrial mobilization; engineering, development, or research capability; or expert services.

- 5. Contracting Officer's Certification:** This ambiguity as to who carries the professional liability is an extreme risk to the Government and needs to be avoided. Having the designer of record for the Renovate Infrastructure for History Center B116 perform the drawing modification eliminates this high risk, and that firm would carry the liability for the entire project. This is a follow on to the current A/E contract for the Renovate Infrastructure for History Center B116 Project. I certify that the foregoing justification is accurate and complete to the best of my knowledge and belief.
