

**Department of the Army
Justification and Approval
For Other than Full and Open Competition**

1. Contracting Activity: The United States Army Contracting Command-Detroit Arsenal (ACC-DTA), 6501 E. 11 Mile Road, Detroit Arsenal, MI 48397-5000, is the procuring activity for this action.

2. Description of Action: ACC-DTA intends to issue a bridge contract, consisting of Cost Plus Fixed Fee (CPFF), Cost, No Fee and Firm Fixed Price (FFP) components, to CACI Technologies, Inc, 14370 Newbrook Drive, Chantilly, VA, 20151-4206, Commercial and Government Entity Code: 8D014. This contract will provide continued support for the Counterintelligence & Human Intelligence (HUMINT) Analytical Support Element – Global (CHASE-G) support program. The current task order expires on 23 March 2025. ACC-DTA intends to award a competitive follow-on task order for this requirement in April 2025, the procurement is currently in the evaluation phase. The proposed action is a six-month bridge contract, with a period of performance (PoP) from 24 March 2025 to 23 September 2025, comprised of a 3-month base period and three additional 1-month option periods. The Contracting Officer can exercise the option periods incrementally. The Government will fund this requirement with Fiscal Year 2025 Operations & Maintenance, Army funds.

3. Description of Services:

a. The USFOR-G Intelligence mission provides multi-disciplined intelligence operations in support of global United States (US) military and Government operations, including, but not limited to, the Major Commands and Combatant Commands of all military branches. Furthermore, this contract currently provides global intelligence analytical reachback in support of the Department of Defense (DoD), [REDACTED]

[REDACTED]

b. This effort is part of the overall intelligence program designed to support [REDACTED]
[REDACTED] The contractor provides a multi-faceted intelligence operations support program consisting of, but not limited to, All-Source Intelligence Analysts, HUMINT Analysts, Signals Intelligence Analysts, Intelligence Requirements Management, Collection Managers, Special Advisors, Planners, Targeting Support, Counterintelligence (CI) Support, Armed CI teams in support of Counterintelligence, HUMINT Collection and Debriefing Support, CI

Screeners Support, Multi-Media Exploitation Support, Tactical and Operational Intelligence Analysis, Intelligence Information Management, Special Security personnel in support of the Special Security Officer, and Foreign Disclosure Advisors in support of the Foreign Disclosure Officer. The places of performance include various CONUS and Outside the Continental United States (OCONUS) locations, including, but not limited to, CONUS location: Fort Devens, MA; OCONUS location: Qatar.

c. The USFOR-G Intelligence Support Services requirement is a performance-based acquisition in accordance with (IAW) FAR Subpart 37.6 Performance-Based Acquisition. The contract will contain a comprehensive Performance Work Statement (PWS) that reasonably describes the required output in clear and objective terms and specific and measurable outcomes that the contractor can achieve (i.e., Performance Requirements Summary (PRS)). The PRS measures contractor performance in terms of the contractor's delivery of timely, complete, clear, and accurate work products (reports, forms, presentations, etc.) IAW Army and DoD regulations. The Government is using a similar PRS to measure performance on the current USFOR-G Intelligence Support Services task order (W911W4-14-D-0003/W911W4-19-F-0018).

d. The contract type for this requirement is CPFF for labor costs, Cost, No Fee for other direct costs, travel, and Defense Base Act (DBA) insurance costs, and FFP for DBA insurance management costs. This effort requires an estimated 82 Full-Time Equivalents (FTEs) (including surge). The estimated total number of labor hours for this requirement is 206,688 hours. The estimated total value of this action is \$10,713,289.41.

4. Authority Cited: The statutory authority permitting other than full and open competition for this effort is 10 United States Code (U.S.C.) 3204(a)(1) as implemented by Federal Acquisition Regulation (FAR) 6.302-1, "Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements." Specifically, FAR 6.302-1(a)(2)(iii)(B), which states "For DoD, NASA, and the Coast Guard, services may be deemed to be available only from the original source in the case of follow-on contracts for the continued provision of highly specialized services when it is likely that award to any other source would result in- (B) unacceptable delays in fulfilling the agency's requirements."

5. Reason for Authority Cited:

a. Background:

On 15 May 2019, ACC-DTA issued a Request for Task Order Proposal (RTOP) for USFOR-A support services to the vendors in the Unrestricted (large business) Pool of the Intelligence and Security Command (INSCOM) Global Intelligence Support Services (GISS) Indefinite Delivery Indefinite Quantity (IDIQ) Multiple Award Task Order Contract (MATOC). ACC-DTA selected CACI Technologies as the awardee and issued task order W911W4-14-D-0003 / W911W4-19-F-0018 on 20 September 2019, with an

effective date of 23 September 2019. After the US Government's withdrawal from Afghanistan, the Requiring Activity changed the name of the USFOR-A task order to USFOR-G. CACI Technologies is currently performing under the FAR 52.217-8 option period.

Beginning in January 2024, ACC-DTA and the customer diligently worked the competitive follow-on; however, [REDACTED]

[REDACTED] This transfer resulted in the need to revise and refine the requirements package and to revalidate the requirement, which caused a delay in ACC-DTA issuing the RTOP. This delay was primarily associated with the time required to coordinate with the Government stakeholders at the various OCONUS locations. [REDACTED]

[REDACTED] The formal requirements package was finalized in July 2024.

On 22 August 2024, ACC-DTA issued a RTOP for the follow-on task order to the vendors in the Unrestricted Pool (both large and small businesses) of the Defense Intelligence Agency's (DIA's) Solutions for Intelligence Analysis 3 (SIA 3) MATOC. The RTOP closed on 25 September 2024, and the Government has been engaged with source selection evaluations since that time. The existing task order awarded to CACI Technologies under the GISS IDIQ MATOC expires on 23 March 2025. The GISS IDIQ MATOC expired on 25 July 2020; therefore, ACC-DTA cannot extend the current task order to bridge these critical intelligence services. [REDACTED]

b. Unacceptable Delay:

10 U.S.C. 3204(a)(1), as implemented by FAR 6.302-1, is applicable to this action because only CACI Technologies possesses the unique combination of technical knowledge, training, experience, and qualified personnel necessary to meet the Army's requirements without an unacceptable delay or an extended break in critical intelligence support services. CACI Technologies is the incumbent contractor that is currently performing on the existing USFOR-G task order, W91W4-14-D-0003/W911W4-19-F-0018. CACI is the only source capable of providing the continuation of intelligence support services described herein without an unacceptable delay or break in service [REDACTED]

- [REDACTED]
- [REDACTED]
- [REDACTED]

USFOR-G elements provide multi-discipline intelligence reachback support that have a [REDACTED] Without a continuation of services, USFOR-G elements will be unable sustain operations and responsiveness to [REDACTED] and the USFOR-G core mission capabilities will be severely degraded, negatively impacting its ability to accomplish its mission to conduct full spectrum multi-discipline intelligence operations.

The services provided under the USFOR-G contract vehicle touch all U.S. Army intelligence professionals (soldiers, civilians, contractors) [REDACTED] An abundance of [REDACTED] rely on the USFOR-G contracted support for mission critical and mission enhancing support to operations.

100% of the contractor personnel performing on the existing USFOR-G task order possess a Top Secret/Sensitive Compartmented Information (TS/SCI) clearance, with 82 FTEs performing in multiple task areas that require a TS/SCI with a Counterintelligence (CI) polygraph. CACI Technologies has qualified personnel with the required TS/SCI security clearances who are already performing this requirement on the existing task order and can continue to perform on the bridge contract.

CACI Technologies is the only contractor that can meet the schedule and perform the USFOR-G support requirement in the required timeline. CACI Technologies possesses

[REDACTED]

the requisite knowledge, training, experience, and personnel with security clearances necessary to immediately meet the Army's requirement. No other source can provide the intelligence support services described herein without an unacceptable delay or break in service attributable to competing the requirement and contractor transition. The GISS IDIQ MATOC expired on 25 July 2020; therefore, ACC-DTA cannot extend the current task order to bridge these critical intelligence services. As stated, ACC-DTA is currently evaluating proposals for the USFOR-G recompetes and anticipates making an award in April 2025. Once the recompetes is in place, the awardee will need to transition in the workforce as well as have personnel complete CRC Training. Without a bridge contract in place, there will be a lapse in service for [REDACTED]. These critical intelligence services are in support of [REDACTED] and a lapse in service is unacceptable. The base period for this bridge contract will allow the Government to complete its source selection evaluation process and award a new task order under the SIA 3 MATOC, thus, mitigating the risk associated with a potential break in service until performance begins on the follow-on task order. ACC-DTA will utilize the three 1-month option periods if the award of the follow-on task order is protested.

6. Efforts to Obtain Competition:

- a. **Effective Competition:** For the reasons cited in section 5 above, the Government will not be pursuing competition for this bridge contract action. All notices required by FAR 5.201 shall be published and any bids or proposals received shall be considered.
- b. **Subcontracting Competition:** In accordance with FAR 19.702(a)(1), CACI will submit a subcontracting plan for Government approval and incorporation in the contract. All required FAR and Defense Federal Acquisition Regulation Supplement (DFARS) Subcontracting clauses will be incorporated into the contract.

7. Actions to Increase Competition: As previously stated, ACC-DTA is pursuing a competitive follow-on task order and issued a RTOP to the vendors in the Unrestricted Pool of the DIA's SIA 3 MATOC. Source selection evaluations are currently ongoing with anticipated award in April 2025.

8. Market Research: In accordance with FAR 10.002(b)(2)(ii), the Government conducted market research in relation to this stand-alone contract, which included a price analysis of the contract labor floor rates; an examination of the program's acquisition history and the previous contract floor rates used; and a comparison of cost indexes of Government labor in the local area.

On 29 January 2025, ACC-DTA posted a Request for Information (RFI), including a draft PWS, draft Contract Data Requirements List, and draft Government Furnished Pricing Manual attachments on SAM.gov to obtain feedback regarding the capabilities

[REDACTED]

and interest of potential offerors for the USFOR-G bridge requirement. This RFI included a questionnaire that solicited feedback related to the contractors' capabilities, interest, transition-in timeline, and anticipated subcontracting information, including a summary of expected subcontracting to Other-Than-Small-Business entities and different categories of Small Business entities, and it allowed contractors an opportunity to provide questions and comments related to the draft USFOR-G documents. Two contractors responded to the RFI and the results are below:

a)

[REDACTED]

- b) **CACI:** Based on CACI's responses to the RFI questions, the Government determined that CACI is fully qualified to perform the USFOR-G mission without a break in service. CACI is also the current incumbent on current USFOR-A task order (W911W4-19-F-0018) and would be able to transition all work on Day 1.

In conclusion, CACI is the only contractor capable of immediately performing the USFOR-G requirement without a degradation or break in critical intelligence services.

9. Interested Sources: To date, no other sources besides those listed in section 8 above have written to express an interest in this acquisition.

10. Other Facts:

- a. Procurement history:

W911W4-14-D-0003 / W911W4-19-F-0018

(1) Performance: 23 September 2019 – 23 March 2025, total contract value is [REDACTED] award to CACI Technologies.

(2) Competitively awarded via the Unrestricted Pool of the of the GISS IDIQ MATOC.

(3) No authority was utilized to restrict competition.

(4) No justification was prepared to support this procurement.

(5) This procurement is to bridge the current USFOR-G effort to the competitively awarded follow-on effort.

(6) No unusual history exists for this procurement.

(7) No justification was prepared to support this procurement.

- b. Other Facts: This justification includes the follow-on effort as the action to increase competition. As cited in section 5 above, the delay in this follow-on

effort has been due to the development and refinement of the requirements package taking longer than anticipated and the additional time needed to complete the evaluation process. Further details are provided above. As stated above in section 7, this follow-on is anticipated for award in April 2025.

11. Technical Certification: I certify that the supporting data under my cognizance which is included in the justification is accurate and complete to the best of my knowledge and belief.

Printed Name: [REDACTED]	Electronic Signature: [REDACTED]
Title: [REDACTED]	Date: [REDACTED]

12. Requirements Certification: I certify that the supporting data under my cognizance which is included in the justification is accurate and complete to the best of my knowledge and belief.

Printed Name: [REDACTED]	Electronic Signature: [REDACTED]
Title: [REDACTED]	Date: [REDACTED]

13. Contracting Officer's Fair and Reasonable Determination: I hereby determine the cost to the Government for this procurement action will be fair and reasonable. The basis for this determination is: Any exercise of this ceiling will be negotiated and determined fair and reasonable by the Contracting Officer IAW DFARS 252.217-7001.

Printed Name: Tyler J. Wonsowicz	Electronic Signature: //TJW//
Title: Contracting Officer	Date: 11 FEB 2025

14. Contracting Officer Certification: I certify that this justification is accurate and complete to the best of my knowledge and belief.

Printed Name: Tyler J. Wonsowicz	Electronic Signature: //TJW//
Title: Contracting Officer	Date: 11 FEB 2025

APPROVAL

Based on the foregoing justification, I hereby approve the procurement of USFOR-G support services on an other than full and open basis. This approval is pursuant to the authority of 10 United States Code 3204(a)(1) as implemented by FAR Part 6.302-1(a)(2)(iii)(B) "Only one responsible source and no other supplies or services will satisfy agency requirements". The total estimated value for this acquisition is [REDACTED]. This approval is subject to the availability of funds, and provided that the services and property herein described have otherwise been authorized for acquisition.

X

Rachel A. Capaldi
Advocate for Competition
