

DEFENSE LOGISTICS AGENCY  
DLA CONTRACTING SERVICES OFFICE – PHILADELPHIA  
700 ROBBINS AVENUE  
PHILADELPHIA, PENNSYLVANIA 19111-5092

DCSO EFO 2025-25

**JUSTIFICATION FOR AN EXCEPTION TO FAIR OPPORTUNITY FAR 16.505(b)(2))  
ADDENDUM 1**

Upon the basis of the following justification, I hereby approve the issuance of the contractual action described below using an exception to fair opportunity, pursuant to the authority cited herein.

**1. IDENTIFICATION OF THE REQUIRING AGENCY AND CONTRACTING ACTIVITY:**

**Requiring Activity:**

Defense Logistics Agency (DLA)  
Enterprise ICAM Program Management Office (J62FG)  
2001 Mission Drive, Bldg. 430  
New Cumberland, PA 17070

**Contracting Activity:**

DLA Contracting Service Office-Philadelphia (DCSO-P)  
700 Robbins Avenue  
Philadelphia, PA 19111-5092

**2. NATURE AND DESCRIPTION OF THE ACTION BEING APPROVED:**

Pursuant to FAR 16.505(b)(2), the action being approved is an exception to fair opportunity. This justification authorizes the procurement of additional Account Management and Provisioning System (AMPS) Legacy Support services via a modification to DLA J6 Enterprise Technology

|                                                                                                                                                                                                                                                              |

Services (JETS) Contract number: SP4709-17-D-0045/SP4709-23-F-0090 awarded to [REDACTED] which was competitively awarded under the JETS Indefinite Delivery Indefinite Quantity (IDIQ) contract vehicle on September 29, 2023.

The initial requirement on the current task order was based on the need to provide support to DLA Information Operations in the areas of application development and sustainment of several identity-related programs including user provisioning Accounts Management Provisioning System (AMPS), Single Sign-On (SSO), and Separation of Duties (SoD).

DLA Information Operations J62FG has identified additional tasks that will need to be administered and sustained within the existing support scope. The awarded task order did not originally cover these new requirements and will require an increased commitment from [REDACTED] to manage, support, and sustain the workload of the DLA Information Operations J62FG landscape. DLA Information Operations J62FG requires new tasks to support audit walkthroughs for financially relevant 110+ systems and applications, PBC (Provided by Client) requests on enterprise level, SAP PAL (privileged access) redesign initiative, Testing of Design/Testing of Effectiveness and a Governance, Risk, and compliance (GRC) Auto provisioning effort.

### **3. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET THE AGENCY'S NEEDS (INCLUDING AN ESTIMATED DOLLAR AMOUNT):**

The DLA Information Operations J62FG Enterprise Identity Credential, and Access Management (ICAM) Program Management Office (PMO) has a requirement to expand capabilities by obtaining additional GRC and AppSec tasks under the current requirement. This change is required to provide additional Legacy AMPS task order support for GRC and Application Support (AppSec) team workload to the DLA Information Operations J62FG.

The subject modification is necessary to update the Performance Work Statement (PWS) to reflect key differences in the current needs and the future needs of the AMPS Portfolio. This requirement was not known until after the award was issued. The Task Order accounted for known variables, but DLA did not know the extent of the tasks when the AMPS Legacy Support Performance Work Statement (PWS) was written, or prior to the award of the AMPS Legacy Support Task Orders.

The new support requirements of the redesign initiative will be reflective of over five hundred privileged role access adjustments for DLA end-users and emergency users. J62FG has an aggressive timeline to close out this Notice of Finding (NFR) from DLA's external auditor on enterprise systems and applications. This work has a major impact within the Separation of Duties (SoD) mandates and creates a vulnerability in DLA's production environment with end-users having overly broad open system access. If the access control material weakness is not able to be addressed and significant progress made, the foundational funding for the financial relevant systems and applications are at risk.

DLA Information Operations J62FG ICAM PMO requires immediate additional support for the remainder of current Base Period and two twelve-month Option Periods. [REDACTED]

**ADDENDUM 1:**

The DLA Information Operations J62FG Enterprise Identity Credential, and Access Management (ICAM) Program Management Office (PMO) has a requirement to expand Cloud Services Provider (CSP) capabilities by obtaining specialized Oracle Cloud Infrastructure (OCI) support under the current CSP requirement. This change is required to satisfy additional Legacy AMPS CSP tasks and expertise beyond the labor categories in the Legacy AMPS PWS.

This modification is necessary to update the Performance Work Statement (PWS) to reflect the current and future needs of the ICAM Portfolio. This specialization was not known until after the award was issued. The Task Order accounted for known variables, but DLA did not know the extent of the CSP tasks when the AMPS Legacy Support Performance Work Statement (PWS) was written, or prior to the award of the AMPS Legacy Support Task Orders.

The additional OCI support will provide tenancy services and deliver additional capabilities to the AMPS OCI hosting environment and extend the IaaS and PaaS infrastructure capabilities.

A tenancy is a secure and isolated partition of Oracle Cloud Infrastructure to create, organize, and administer your cloud support. This could include compute instances, networks, storage, databases, identity, analytics and more.

The OCI support will configure and optimize the AMPS OCI tenancy and OCI cloud services and assure it reflects DLA's organizational and business processes. This support will implement and support the creation, management and sustainment of:

- Oracle Cloud Infrastructure Services available within the AMPS OCI Tenancy
- A set of tenancy Users and Groups
- A set of Policies and Permissions
- A set of service limits.
- Security and governance settings.
- Oracle Applications use of OCI services

- Containers and functions
- Integrated Applications
- Oracle databases – Enterprise and Autonomous database services and security in conjunction with DBAs
- Virtualized environments - VMWare and Kubernetes (OKE)
- Networking services – load balancers and gateways and underlying OCI network services
- Network architecture, configurations and optimization
- Cloud infrastructure security
- Support activities related to Identity and access management
- Managing and configuring Tenancy and resource authentication and authorization using DLA standard Authentication and Authorization methods
- Performance and issue Monitoring and resolving any related issues of OCI related Services supporting the AMPS application. Includes increasing the use of OCI related monitoring services and capabilities. (example, APM - Application Performance Monitoring)
- Capturing Knowledge in Standard Operating Procedure (SOP) and related knowledge management repositories

DLA J62FG ICAM PMO immediately needs the additional support and skills sets for the remainder of AMPS first option year and the entire 2<sup>nd</sup> option year period of performance.

**4. IDENTIFICATION OF THE EXCEPTION TO FAIR OPPORTUNITY AND SUPPORTING RATIONALE, INCLUDING A DEMONSTRATION THAT THE PROPOSED CONTRACTOR'S UNIQUE QUALIFICATIONS OR THE NATURE OF THE ACQUISITION REQUIRES USE OF THE EXCEPTION CITED:**

In accordance with FAR 16.505(b)(2)(i)(B), only one source, [REDACTED], can provide the unique and highly specialized services required at the level of quality needed to meet the mission requirements of DLA Information Operations J62FG ICAM PMO. The use of another contractor would lead to mission failure as two contractors working in this environment would not efficiently be able to support DLA Information Operations J62FG application development and sustainment of identity-related programs, user provisioning Accounts Management Provisioning System (AMPS), Single Sign-On (SSO), and Separation of Duties (SoD).

Specifically, the DLA Information Operations J62FG Governance, Risk, and Compliance (GRC) programs remain an integral part of the IT Modernization Enterprise Resource Planning (ERP) efforts and are being assessed as part of the DLA Information Operations J62 ICAM solution. The GRC/ AppSec contractor team is responsible for supporting all Enterprise IT audit functions for financially relevant DLA owned and DLA managed operations. The GRC/AppSec contractor team also performs audit sustainment functions and production support activities, which includes sustainment, integration and implementation activities, issue investigation, resolution, Segregation of Duties and provisioning activities in accordance with approved DLA policies, procedures Federal government and DoD regulations Most critical for the success of the Enterprise is the support for designing, developing, maintaining and role management of the Enterprise Business System (EBS), Enterprise Data Warehouse (EDW), Warehouse Management System (WMS) and next generation systems. The addition of the configuration management and GRC Auto Provisioning tasks will require a significant expansion to manage, support, and sustain the workload of the DLA Information Operations J62FG ICAM landscape workload without interruptions.

It would be especially difficult to manage multiple contractors at the level of effort required for the DLA Security Center of Excellence (SCoE) mandated support landscape. The work assignments of two contractors would overlap and the outcome would occur with significant complications between the two contractors' enterprise-wide code implementation. For example, in the areas of cost analysis (CA), Access Control (AC), AppSec (AS) and configuration management (CM), both contractors would be making changes to the same set of code, with the risk that either would introduce errors in the other contractor's part of the code - ultimately creating the potential for mission failure.

#### **ADDENDUM 1:**

In accordance with FAR 16.505(b)(2)(i)(B), only one source, [REDACTED], can provide the unique and highly specialized services required at the level of quality needed to meet the mission requirements of DLA Information Operations J62FG ICAM PMO. The needed services and expertise of integrating and optimizing Oracle Cloud Infrastructure within the DLA AMPS environment is available only from BMA. BMA possesses unique and special expertise as BMA minimized the transition impact on DLA by resourcing the program with DLA AMPS seasoned talent. This provided service and support continuity that other contractors would struggle to emulate, if at all. The many months of required training another company's personnel on the integration, interaction, and information and data flow among OCI, SAP, AWS within the DLA environment would cause substantial delays in DLA Information Operations J62FG achieving portfolio goals and timelines. The introduction of another prime contractor in this environment would create an inefficient work environment and create a program management burden on DLA J26FG personnel. As such, soliciting RFQs from other service providers is arguably moot.

Denial or deferment of this EFO will have a severe impact and jeopardize DLA Information Operations J62FG ICAM PMO's portfolio objectives.

**5. DETERMINATION BY THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE:**

As the Contracting Officer, I hereby determine that the anticipated cost to the Government will be fair and reasonable. The Contractor's proposal will be analyzed in accordance with FAR 15.404-1 procedures. It is anticipated that the Government will use various price analysis techniques including, but not limited to: (1) Comparison with competitive price lists in accordance with FAR 15.404-1(b)(2)(iv); (2) Comparison of proposed prices obtained through market research for the same or similar items in order to obtain a fair and reasonable price in accordance with FAR 15.404-1(b)(2)(vi); and (3) Comparison of proposed prices with independent Government cost estimates in accordance with FAR 15.404-1(b)(2)(v).

**6. ANY OTHER FACTS SUPPORTING THE JUSTIFICATION:**

N/A

**7. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS THAT LED TO THE EXCEPTION TO FAIR OPPORTUNITY BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES IS MADE:**

Currently, the additional contractor requirements are the only option of meeting the Government's enduring needs. DLA Information Operations has exercised and continues to exercise competition as often as possible and continues to conduct ongoing reviews to keep abreast of new technology and support options, both in industry and in the Government. DLA uses a variety of tools, vendors, manufacturers, and contracts / orders to fulfill its requirements and will continue its practice of surveying the market to ensure full and open competition to the maximum extent practicable.

**8. CERTIFICATIONS:**

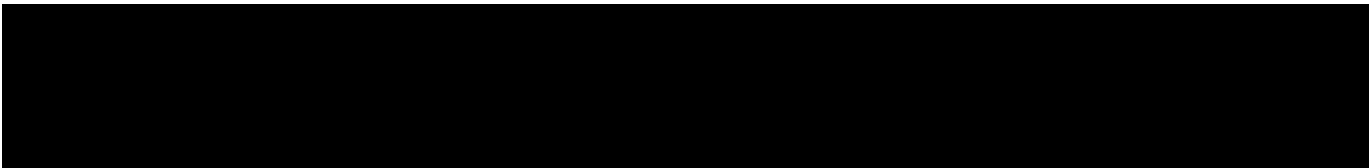

**Technical Certification:** I hereby certify that the supporting data provided for which I am responsible, and which form a basis for this justification are complete and accurate.

J62FG Enterprise, Contracting Officer's Representative

**CONTRACTING OFFICER CERTIFICATION:**

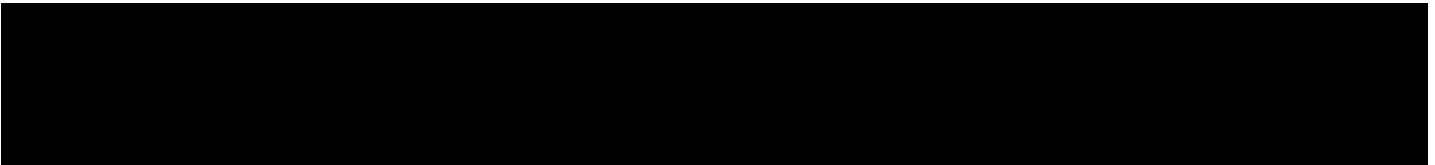

*I certify that this justification is accurate and complete to the best of my knowledge and belief.*

Contracting Officer
