

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes

☒ No

Contracting Activity: AFRL/PZLET

Project/Program Name: N-Topology

Purchase Request / Local ID Number:

Estimated Contract Cost (including Options):

Section B: Description of the Supplies/Services Required

This is a single-source justification for the procurement of N-topology. The Aerospace Vehicles Division (AFRL/RQV) has a requirement for:

* 1 - nTopology Software - Regional Floating License; including Core Ongoing Support Package: Team - 12 Months

* 1 - Core Onboarding Package: Team (required with first purchase) - 3 Months -

The total one-time cost for this acquisition is

Contract Type: FFP

Funding: FY25 3600 (RDT&E) funds

Software License Activation Period: Varies by Line Item (3 or 12 month)

Delivery: 7 days after receipt of order (ARO)

It will be awarded as a standalone purchase order

Section C: Justification for Soliciting from a Single Source or Brand Name

In accordance with FAR 6.302-1, FAR 13.106-1(b), DAFFARS 5313.106-1(b) this is a justification for other than full and open competition for a sole source acquisition.

This proprietary software supports topology optimization and various lattice design for lightweight structure design. This software package and modules were specifically chosen because of the compatibility with various CAD packages and additive manufacturing equipment we are using and, especially, their unique lattice structure design and sizing capability combined with topology optimization. The nTopology will allow us to further generate lattice structure from the existing design with minimal effort. The tool will provide an optimal design that minimizes the vehicle structure's weight by converting a solid structure to a lattice-filled structure and sizing based on the stress level.

We estimate that the cost of developing lattice design code combined with topology optimization would add at least an additional cost in labor costs plus the cost of an alternative software package. This figure was based on a research assistant man-hour estimate of approximately 1.5-2 man-year and does not include the indirect costs to the government caused by program delays in the sponsored research supported by this software package. These costs could not be recouped through competition.

Section D: Efforts to Obtain Competition

N-Topology has confirmed in a Sole Source letter dated 02 April 2025 that nTopology Inc. ("nTop") is the actual developer of the nTop software (the "Software"); and, nTop does not have relationships with any third-party resellers in the United States of America and sells its Software only directly to customers in the United States of America. See Sole Source letter in contract file.

Additionally, an intent to award on a sole source basis notice was posted on System for Award Management (SAM) and no

Single Source Justification (Simplified Acquisition)

qualified responses were received that could meet the requirement.

The proposed sole source is the only known source able to satisfy the Government's requirements.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

AFRL/RQV will continue to monitor the market to determine if other existing products would satisfy the Government's requirement. AFRL/RQV will conduct research using communications with external partners, internal searches, trade publications, technical journals, catalogs, and conference papers to locate solutions to meet the Government's requirement.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
